

1. Suggest a mechanism for this reaction.

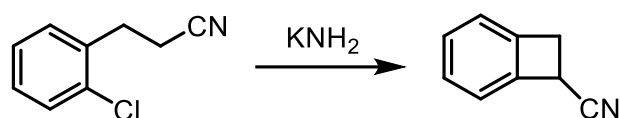

2. Predict the product for this reaction, suggest a mechanism and comment on any selectivity.

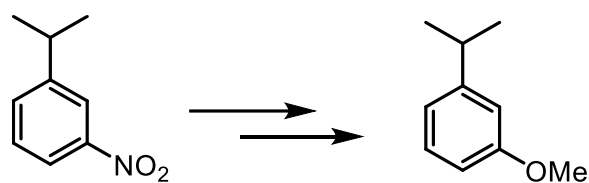

3. Suggest mechanisms for this reaction.

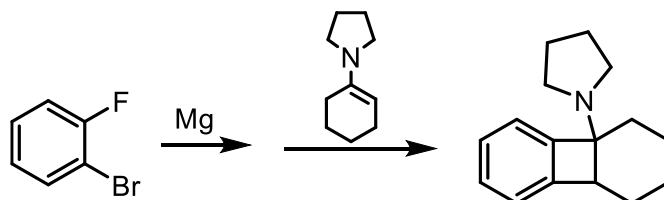

4. Suggest mechanisms for this reaction.

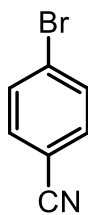

5. Propose a synthetic approach from the starting material to the product.

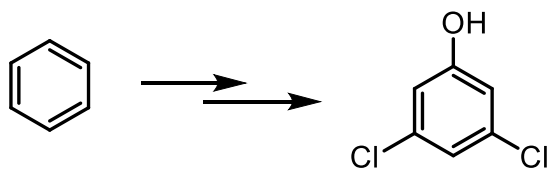

6. Suggest a mechanism for this reaction.

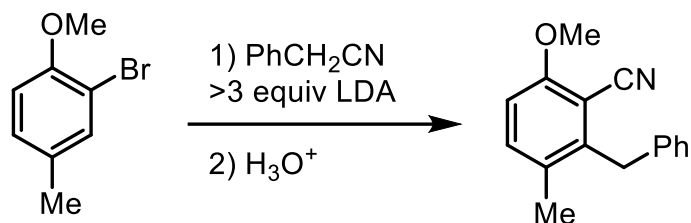

7. Propose a synthetic approach from benzene to this compound.

8. Propose a synthetic route for the following transformation.

9. Suggest a mechanism for this reaction.

10. Explain the selectivity of the following reactions.
