Preface

The Pale Blue Dot

This image of Earth is one of the 60 frames taken in 1990 by the Voyager 1 spacecraft from a distance of more than six billion kilometers. In the image the Earth is a mere point of light, a crescent only 0.12 pixel in size.

Carl Sagan, an astrologist and science writer, delivered a touching speech on the picture. His speech resonates with us especially well in the era of globalization. Let's begin our course with Sagan's remarks.

“From this distant vantage point, the earth might not seem of any particular interest. But for us, it's different. Consider again that dot. That's here. That's home. That's us. On it everyone you love, everyone you know, everyone you ever heard of, every human being who ever was, lived out their lives. The aggregate of our joy and suffering, thousands of confident religions, ideologies, and economic doctrines, every hunter and forager, every hero and coward, every creator and destroyer of civilization, every king and peasant, every young couple in love, every mother and father, hopeful child, inventor and explorer, every teacher of morals, every corrupt politician, every "superstar," every "supreme leader," every saint and sinner in the history of our species lived there--on a mote of dust suspended in a sunbeam.

The Earth is a very small stage in a vast cosmic arena. Think of the rivers of blood spilled by all those generals and emperors so that, in glory and triumph, they could become the momentary masters of a fraction of a dot. Think of the endless cruelties visited by the inhabitants of one corner of this pixel on the scarcely distinguishable inhabitants of some other corner, how frequent their misunderstandings, how eager they are to kill one another, how fervent their hatreds.

Our posturings, our imagined self-importance, the delusion we have some privileged position in the Universe, are challenged by this point of pale light. Our planet is a lonely speck in the great enveloping cosmic dark. In our obscurity, in all this vastness, there is no hint that help will come from elsewhere to save us from ourselves.

The Earth is the only world known so far to harbor life. There is nowhere else, at least in the near future, to which our species could migrate. Visit, yes. Settle, not yet. Like it or not, for the moment the Earth is where we make our stand.

It has been said that astronomy is a humbling and character-building experience. There is perhaps no better demonstration of the folly of human conceits than this distant image of our tiny world. To me, it underscores our responsibility to deal more kindly with one another, and to preserve and cherish the pale blue dot, the only home we've ever known.”

-- Carl Sagan, 1994

Source: <http://www.planetary.org/explore/space-topics/earth/pale-blue-dot.html>

这是一张著名的照片。1990年，旅行者1号探测器即将飞出太阳系的时候，在距离地球60亿公里的地方，美国国家航空航天局命令它回头再看一眼，拍摄了60张照片。这是其中之一。照片上的光带是相机镜头反射的太阳光。这一张上正好包括了地球——就是图中那个小小的白色的点。在这张图片上，我们地球只有0.12个像素那么大。

卡尔·萨根，天体物理学家、也是著名的科学作家，看了这张照片非常感慨，他在1996年的一个典礼上就此说过一段著名的话。咱们就把这段话作为这门课的开始吧——

“从这个遥远的有利位置看，地球似乎没有什么特别的吸引力。但对我们来说，就不一样了。仔细再看看，你会看见一个点。就是这里，就是我们的家，就是我们。在这个小点上，每个你爱的人、每个你认识的人、每个你曾经听说过的人，以及每个曾经存在过的人，都在那里过完一生。这里集合了一切的欢喜与苦难，数千个自信的宗教、意识形态以及经济学说，每个狩猎者和采集者、每个英雄和懦夫、每个文明的创造者与毁灭者、每个国王与农夫、每对相恋中的年轻人、每对父母、每个充满希望的孩子、每个发明家和探险家，每个道德讲师、每个腐败政客、每个超级巨星、每个至高无上的领袖、每个人类历史上的圣人与罪人，都住在这里——一粒悬浮在阳光下的微尘。

地球是这个浩瀚宇宙剧院里的一个小小舞台。想想那些将领和帝王们造成的血流成河，他们的光荣与胜利只为了让他们成为了这一粒小小尘埃上一个小小部分的短暂主宰。想想栖身在这一尘埃上某个角落的人对栖身在几乎区分不开的另一个角落的人施加着怎样的暴力，他们有多经常发生误解？他们有多渴望杀了对方？他们的敌意有多强烈？

我们的装模作样，我们的自以为是，我们的错觉：以为自己在宇宙里的位置有多优越，都被这暗淡的光点所挑战。我们的星球只是在这被漆黑包裹的宇宙里一粒孤单的微粒而已。我们是如此的不起眼——在这浩瀚之中，我们不会从任何地方得到帮助去拯救我们自身。

地球是我们迄今为止知道的唯一一颗有生命的星球。我们没有办法移民定居到任何地方，至少在最近的将来。访问，可以。定居，则不行。不管你喜欢还是不喜欢，地球是目前我们唯一的立足之地。

一直有人说天文学是令人谦卑，同时也是一种塑造性格的学问。对我来说，没有比这张从远处拍摄我们微小世界的照片更好的提示，更好地说明人类的自大是多么愚蠢。对我来说，这张照片强调我们应该更加亲切地去对待身边的每一个人，同时更加保护和珍惜这暗淡的小蓝点，这个我们目前所知唯一的家。”

Unit One

Globalization: A Contested Concept

1 Although the earliest appearance of the term ‘globalization’ in the English language can be traced back to the 1940s, it was not until half a century later that this concept took the public consciousness by storm. The buzzword ‘globalization’ exploded into the ‘Roaring Nineties’ because it captured the increasingly interdependent nature of social life on our planet. Twenty years later, one can track millions of references to globalization in both virtual and printed space.

2 Unfortunately, however, early bestsellers on the subject—for example, Kenichi Ohmae’s *The End of the Nation State* or Thomas Friedman’s *The Lexus and the Olive Tree*—left their readers with the simplistic impression that globalization was an inevitable techno-economic juggernaut spreading the logic of capitalism and Western values by eradicating local traditions and national cultures. This influential notion of globalization as a steamroller flattening local, national, and regional scales also appeared as the spectre of ‘Americanization’ haunting the rest of the world. Such widespread fears or hopes—depending on how one felt about such forces of Westernization—deepened further in the 2000s during the so-called ‘Global War on Terror’ spearheaded by an ‘American Empire’ of worldwide reach. Even the more recent public debates about the alleged decline of the United States in the age of Obama and the corresponding rise of China and India have done little to soften this rigid dichotomy positing the West against the ‘rest’. As a result, many people still have trouble recognizing globalization for what it is: the myriad forms of connectivity and flows linking the local (and national) to the global—as well as the West to the East, and the North to the South.

3 As an illustration of such a more nuanced understanding of globalization as a thickening ‘global-local nexus’—or what some global studies scholars refer to as ‘glocalization’—let us consider the world’s most popular sports event: the Football World Cup. First organized in 1930 by the International Federation of Football Associations (FIFA), the event was soon seen as the ultimate national contest pitting country against country in the relentless pursuit of patriotic glory. The World Cup has since been held every four years (except for 1942 and 1946) in host countries located on all continents except Oceania. In fact, this transnational rotation of host countries coupled with the event’s name ‘World Cup’ (instead of ‘Nations Cup’)—gives us a first indication of why the global should not be rigidly separated from the national. But let us delve more deeply into the matter and consider even more telling facts related to the 2010 World Cup to shed light on the complex ‘glocal’ dynamics that define the phenomenon we have come to call ‘globalization’.

trace back to 追溯到

buzzword ['bʌzɜːd] *n.* 流行词

The global-local nexus and the South African World Cup

4 The nineteenth FIFA World Cup for men's national football was held from 11 June to 11 July 2010 in South Africa (see Figure A). The 32 best national teams from a total of 205 original contestants competed for the coveted golden globe trophy. These included six nations from Africa, three from Asia, thirteen from Europe, three from North Africa, six from South America, and two from Oceania. Played in ten stadiums located in nine South African cities, the games drew hundreds of thousands of football tourists from around the world.

5 The global-local dynamics are rather obvious here: national teams playing in South African stadiums in front of a mixture of local and global spectators as well as virtual global audiences watching the games on TVs and other digital devices. Indeed, the 2010 FIFA World Cup was shown in every single country and territory on Earth. The in-home coverage of the competition reached over 3.2 billion people—47 percent of the global population—who watched at least a few minutes of the event. A whopping 620 million people followed at least twenty consecutive minutes of the championship match between victorious Spain and the Netherlands.

Region/Country	Number of tourists entering South Africa	% increase from June 2009
Europe	124,752	72
England	40,903	15
France	11,451	847
Central & South America	47,188	925
Mexico	12,009	5,334
Brazil	14,100	397
North America	50,902	100
USA	44,894	99
Asia	30,914	120
India	6,561	50
Japan	5,793	276
Australasia	18,450	136
Australia	16,106	155
Middle East	5,139	122
Israel	2,747	825
Africa	398,085	12
Swaziland	45,591	0.4
Algeria	2,342	1744
World	721,311	43

Cup cost South Africa US\$3.5 billion, including \$1.2 billion for infrastructure upgrades, \$1.2 billion for transport, and \$387 million for broadcasting. However, \$1.6 billion was raised in sponsorship revenue, with the most significant contracts signing such powerful transnational corporations (TNCs) as Adidas, Coca Cola, Visa, McDonalds, and BP. In the end, FIFA happily pocketed a handsome profit of \$1 billion, which pushed the organization's 2010 revenue to above \$4 billion.

7 The official World Cup match-ball, too, represents an impressive example of the glocal dynamics constituting globalization. Supplied by Adidas, a gigantic TNC headquartered in Germany, the football was given the name 'Jabulani' which means 'celebrate' in the Zulu language. In spite of their apparent local identity, however, all Jabulani balls were manufactured in mainland China using a latex bladder made in India and a thermoplastic rubber produced in Taiwan (China). These plastics, in turn, were generated from petroleum imported from the Middle East and Norway, and carried on mostly South Korean built ships.

What do Diego Forlán and Shakira have in common?

8 But perhaps the most striking illustration of how globalization erupts simultaneously across all geographical scales involves two of the most celebrated superstars of the World Cup: Uruguayan striker Diego Forlán, the tournament's most valuable player, and Colombian singer-entertainer Shakira, who performed the official anthem of the 2010 World Cup at the opening and closing ceremonies of the mega-event.

9 Born in 1979 into a prominent football-playing family in Montevideo, Uruguay, Diego Forlán was sent from an early age to English-speaking schools. When his older sister Alejandra was left paralysed after a car accident, 12-year-old Diego resolved to earn enough money from a professional football career to pay her hospital bills and afford the best doctors. He kept his promise when, years later, he set up the Alejandra Forlán Foundation. He would also use his global celebrity status in public TV campaigns denouncing dangerous driving.

10 Launching his career with two Uruguayan football clubs, Forlán was transferred in 1998 to the top Argentinean club Atlético Independiente. Scoring thirty-six goals in only seventy-seven games, his global profile rose quickly. In 2002, he signed a contract with the famous English club Manchester United for a transfer sum of US\$10.65 million. After three years, Forlán left England and joined, in short succession, the Spanish clubs Villarreal and Atlético Madrid. Following the 2010 World Cup, he moved to Italy to play for Internazionale Milan, one of Europe's premier football clubs. In June 2012, Diego's abiding global popularity was reflected in the staggering 2,732,586 'likes' gracing his Facebook page.

11 But Diego Forlán's greatest moments came in South Africa where he led his national team to an impressive fourth place finish. This made Uruguay the most successful South American country of the World Cup, surpassing football giants Brazil and Argentina. Proudly wearing the

blue and black colours of his nation, Forlán dazzled local and global fans with his speed, elegance, and goal scoring instincts. Not only did he finish as the tournament's joint top scorer, but he also won the Golden Ball for the best player of the World Cup. 12 Diego Forlán and many of his fellow footballers performing in South African stadiums thus embodied the 'glocal' dynamics of globalization as they played for national teams that entertained local and global audiences while at the same time a large part of their football identity remained firmly linked to their contracted clubs in global cities around the world. 13 A careful deconstruction of World Cup entertainer Shakira reveals even more clearly why we should not approach globalization as a disconnected phenomenon floating above the local and national. Shakira Isabel Mebarak Ripoll was born on 2 February 1977 in Barranquilla, Colombia, to a New York City-born father of Arabic background and a mother of Spanish-Catalan descent. A native Spanish speaker, Shakira showed particular talent for languages and was soon fluent in English and Portuguese, in addition to acquiring some Italian, French, Catalan, and Arabic. She began performing as a singer and dancer at a young age and broke through in 1998 as a rock and roll artist with strong Latin and Arabic influences, when her album <i>Dónde Están los Ladrones?</i> sold over seven million copies worldwide. In many ways, both Shakira's personal background and her style of music can be characterized in terms of 'hybridization'—the mixing of different cultural elements and styles. As we will explore in more detail in Unit 5 of this book, these cultural hybridization processes have been greatly accelerated by globalization. 14 By 2010, Shakira had become one of the top female superstars in the global entertainment business, having won two Grammy Awards, eight Latin Grammy Awards, twelve Billboard Latin Music Awards, and one Golden Globe nomination. On 10 June of that year, the golden-maned, barefoot superstar took centre stage at FIFA's first-ever Kick-off Concert in Johannesburg's Orlando Stadium, accompanied by the popular South African band Freshly Ground. To the delight of tens of thousands of local revellers and millions of digital viewers around the world, Shakira wore what was described as 'African regalia' by its designer, Italian fashion Czar Roberto Cavalli. The global-local ensemble consisted of a silk-fringed, grass-like skirt loosely worn over a zebra-print jumpsuit drastically reduced in size by deep side cut-outs. 'African accessories' such as massive leather fringe bracelets and huge silver disc earrings completed Shakira's fantasy costume (see Illustration 1). 15 Similar hybrid, global-local creations of material culture are also reflected in the 2010 World Cup anthem Waka Waka—controversially translated into English as 'This Time for Africa'. The words and music in the version performed by Shakira stem from the traditional Cameroonian war song 'Zangawela'. First recorded in the 1980s by the African group Golden Sounds, the song was picked up a few years later by the Latin American songwriter Wilfrido Vargas. His faster version of	contracted club 签约的俱乐部 deconstruction [dikən'strʌkʃən] <i>n.</i> 解构; 拆析 descent [di'sent] <i>n.</i> 血统; 下降 hybridization [ˌhaɪbrɪdaɪ'zeɪʃən] <i>n.</i> 混杂; [化学] 杂化 nomination [nɒmɪ'neɪʃ(ə)n] <i>n.</i> 任命, 提名 golden-maned 金发的 take centre stage 到舞台的中心 kick-off <i>n.</i> 开球; 剔除 reveller ['revələ] <i>n.</i> 饮酒狂欢者; 摆设酒宴者 ensemble [ɒn'sɒmb(ə)l] <i>n.</i> 全体; 总效果; 全套服装 silk-fringed 丝绸边的 jumpsuit ['dʒʌmp'su:t] <i>n.</i> 跳伞装; 连身衣裤 drastically ['dræstɪkəlɪ] <i>ad.</i> 彻底地; 激烈地 accessory [ək'ses(ə)rɪ] <i>n.</i> 配饰; 附件 hybrid ['haɪbrɪd] <i>adj.</i> 混合的 anthem ['ænthəm] <i>n.</i> 赞美诗, 圣歌 controversially [ˌkɒntrə'vɜːʃəlɪ] <i>ad.</i> 颇有争议地; 引起争议地 stem from 起源于 rendition [ren'dɪʃn] <i>n.</i> (诗歌或音乐作品的) 演绎; 表演 earworm ['iə,wɜːm] <i>n.</i> (因不断在脑中重复而恼人的) 上口曲调 [非正式] sue [s(j)uː] <i>vt.</i> 控告; 请求
--	--

Waka Waka in turn inspired numerous versions in France, Holland, Suriname, Senegal, Jamaica, and other countries. Shakira's World Cup rendition of Waka Waka quickly turned into a global earworm, selling more than four million copies worldwide. Her video clip on YouTube has become the third most watched music video of all time with over 250 million views. And yet, Golden Sounds benefited little from the global success of the song since the band did not have the resources to sue SONY, Shakira's powerful recording label. Ultimately, however, the transnational media giant settled with the Cameroonian musicians to avoid bad publicity over growing charges of possible copyright piracy.

16 So what—in addition to their multilingual upbringing and their remarkable talent—do the Colombian pop star performing a remixed version of an already globalized World Cup anthem and a Uruguayan football striker playing for various European city clubs have in common? They are both the products and catalysts of globalization processes that make more sense when considered as a global-local nexus. In short, globalization cannot be confined to macro-dynamics isolated from concrete settings but as complex connections and flows linking the global to the local and vice versa. Our deconstruction of the 2010 World Cup has prepared us to tackle the rather demanding task of assembling a working definition of a contested concept that has proven notoriously hard to pin down.

1. Shakira performing Waka Waka at the 2010 FIFA World Cup Kick-off Concert, 10 June 2010

Towards a definition of globalization

17 'Globalization' has been variously used in both the popular press and academic literature to describe a process, a condition, a system, a force, and an age. Given that these competing labels have very different meanings, their indiscriminate usage is often obscure and invites confusion. For example, a sloppy conflation of process and condition encourages circular definitions that explain little. The often repeated truism that globalization (the process) leads to more globalization (the condition) does not allow us to draw meaningful analytical distinctions between causes and effects.

18 Hence, I suggest that we adopt the term globality to signify a social

copyright piracy 盗版

football striker 足球前锋

catalyst ['kæt(ə)list] *n.* [物化] 催化剂; 刺激因素

macro-dynamics 宏观层面的相互作用

notoriously [no'tɔ:riəsli] *ad.* 众所周知地; 声名狼藉地

pin down *v.* 发现, 查明; 确定

indiscriminate [ˌɪndɪ'skrɪmɪnət] *adj.* 任意的; 无差别的

obscure [əb'skjʊə] *adj.* 晦涩的, 不清楚的

sloppy ['slɒpi] *adj.* 草率的; 粗心的

conflation [kən'fleɪʃən] *n.* 合并; 异文合成本

circular definition [计] 循环定义

truism ['tru:ɪz(ə)m] *n.* 老生常谈; 老套; 众所周知

globality [ˌgləʊ'bæləti] *n.* 全球性, 整体性

preclude [pri'klu:d] *vt.* 阻止, 妨碍; 排除

destined ['destɪnd] *adj.* 注定的; 命定的

constellation [kən'stə'leɪʃən] *n.* 群体; [天] 星座

conceivable [kən'si:vəb(ə)l] *adj.* 可想像的; 可相信的

condition characterized by tight global economic, political, cultural, and environmental interconnections and flows that make most of the currently existing borders and boundaries irrelevant. Yet, we should not assume either that globality is already upon us nor that it refers to a determinate endpoint that precludes any further development. Rather, this concept signifies a future social condition that, like all conditions, is destined to give way to new constellations. For example, it is conceivable that globality might eventually be transformed into something we might call ‘planetarity’—a new social condition brought about by the successful colonization of our solar system. Moreover, we could easily imagine different social manifestations of globality: one might be based primarily on values of individualism, competition, and laissez-faire capitalism, while another might draw on more communal and cooperative norms. These possible alternatives point to the fundamentally indeterminate character of globality.

19 The term globalization applies to a set of social processes that appear to transform our present social condition of conventional nationality into one of globality. As we noted in our observations about the 2010 World Cup, however, this does not mean that the national or the local are becoming extinct or irrelevant. In fact, the national and local are changing their character as a result of our movement towards globality. At its core, then, globalization is about shifting forms of human contact. Indeed, any affirmation of globalization implies three assertions: first, that we are slowly leaving behind the condition of modern nationality that gradually unfolded from the 18th century onwards; second, that we are moving towards the new condition of postmodern globality; and, third, that we have not yet reached it. Indeed, like ‘modernization’ and other verbal nouns that end in the suffix ‘-ization’, the term ‘globalization’ suggests a sort of dynamism best captured by the notion of ‘development’ or ‘unfolding’ along discernible patterns. Such unfolding may occur quickly or slowly, but it always corresponds to the idea of change, and, therefore, denotes transformation.

20 Hence, academics exploring the dynamics of globalization are particularly keen on pursuing research questions related to the theme of social change. How does globalization proceed? What is driving it? Does it have one cause or is there a combination of factors? Is globalization a continuation of modernity or is it a radical break? Does it create new forms of inequality and hierarchy? Notice that the conceptualization of globalization as a dynamic process rather than as a static condition forces the researcher to pay close attention to our shifting perceptions of time and space mediated by digital technology.

21 Finally, let us adopt global imaginary as a concept referring to people’s growing consciousness of global connectivity. Again, as we have seen in our deconstruction of the 2010 World Cup, this is not to say that national and local communal frameworks have lost their power to provide people with a meaningful sense of home and identity. But it would be a mistake to close one’s eyes to the weakening of the national imaginary as it has been historically constituted in the 19th and 20th

planetarity 星球化

laissez-faire [ˌleɪsɛɪˈfeɪ] *a.* 自由放任的；放任主义的

communal [ˈkɒmjən(ə)l] *adj.* 公共的；公社的

unsettle [ʌnˈset(ə)l] *v.* 使动摇；使不安定

articulation [ɑːˌtɪkjʊˈleɪʃ(ə)n] *n.* 表达；清晰发音

centuries. The thickening of the global consciousness destabilizes and unsettles the conventional nation-state within which people imagine their communal existence. As we shall see in Unit 7, the rising global imaginary is also powerfully reflected in the current transformation of the principal ideas and values that go into the articulation of concrete political agendas and programs.

22 To argue that globalization constitutes a set of social processes enveloped by the rising global imaginary that propel us towards the condition of globality may eliminate the danger of circular definitions, but it gives us only one defining characteristic of the process: movement towards more intense forms of connectivity and integration. But such a general definition of globalization tells us little about its remaining qualities. In order to overcome this deficiency, it behoves us to identify additional qualities that make globalization different from other sets of social processes. Yet, whenever researchers raise the level of specificity in order to bring the phenomenon in question into sharper focus, they also heighten the danger of provoking scholarly disagreements over definitions. Our subject is no exception. One of the reasons why globalization remains a contested concept is because there exists no scholarly consensus on what kinds of social processes constitute its essence.

23 After all, globalization is an uneven process, meaning that people living in various parts of the world are affected very differently by this gigantic transformation of social structures and cultural zones. Hence, the social processes that make up globalization have been analysed and explained by various commentators in different, often contradictory ways. Scholars not only hold different views with regard to proper definitions of globalization, they also disagree on its scale, causation, chronology, impact, trajectories, and policy outcomes. The ancient Buddhist parable of the blind scholars and their encounter with the elephant helps to illustrate the academic controversy over the nature and various dimensions of globalization.

24 Since the blind scholars did not know what the elephant looked like, they resolved to obtain a mental picture, and thus the knowledge they desired, by touching the animal. Feeling its trunk, one blind man argued that the elephant was like a lively snake. Another man, rubbing along its enormous leg, likened the animal to a rough column of massive proportions. The third person took hold of its tail and insisted that the elephant resembled a large, flexible brush. The fourth man felt its sharp tusks and declared it to be like a great spear. Each of the blind scholars held firmly to his own idea of what constituted an elephant. Since their scholarly reputation was riding on the veracity of their respective findings, the blind men eventually ended up arguing over the true nature of the elephant. (See Illustration 2).

25 The ongoing academic quarrel over which dimension contains the essence of globalization represents a postmodern version of the parable of the blind men and the elephant. Even those few remaining scholars

privilege ['prɪvəlɪdʒ] *vt.* 给予...特权; 特免

who still think of globalization as a singular process clash with each other over which aspect of social life constitutes its primary domain. Many global studies experts argue that economic processes lie at the core of globalization. Others privilege political, cultural, or ideological aspects. Still others point to environmental processes as being the essence of globalization. Like the blind men in the parable, each globalization researcher is partly right by correctly identifying one important dimension of the phenomenon in question. However, their collective mistake lies in their dogmatic attempts to reduce such a complex phenomenon as globalization to one or two domains that corresponds to their own expertise. Surely, a central task for the new field of global studies must be to devise better ways for gauging the relative importance of each dimension without losing sight of the interdependent whole.

2. The globalization scholars and the elephant

26 Despite such differences of opinion, it is nonetheless possible to detect some thematic overlap in various scholarly attempts to identify the core qualities of globalization processes. Consider, for example, the following influential definitions of globalization:

Globalization can thus be defined as the intensification of worldwide social relations which link distant localities in such a way that local happenings are shaped by events occurring many miles away and vice versa. (Anthony Giddens, Former Director of the London School of Economics)

Globalization may be thought of as a process (or set of processes) which embodies a transformation in the spatial organization of social relations and transactions—assessed in terms of their extensity, intensity, velocity and impact—generating transcontinental or interregional flows and networks of activity, interaction, and the exercise of power. (David Held, Professor of Politics and International Relations, Durham University)

Globalization as a concept refers both to the compression of the world and the intensification of consciousness of the world as a whole. (Roland Robertson, Emeritus Professor of Sociology, University of Aberdeen, Scotland)

27 These definitions point to four additional qualities or characteristics at

dogmatic [dɒg'mætɪk] *adj.* 教条的

expertise [ˌekspɜː'tiːz] *n.* 专业知识; 专业技术; 专家的意见

devise [dɪ'vaɪz] *v.* 设计; 想出

gauge [geɪdʒ] *v.* 测量; 估计; 给...定规格

detect [dɪ'tekt] *v.* 察觉; 发现

thematic [θɪ'mætɪk] *adj.* 主题的, 主旋律的

overlap [əʊvə'læp] *n.* 重叠的部分

intensification [ɪn,tensɪfɪ'keɪʃn] *n.* 强化; 加剧

locality [lə(ə)'kælɪtɪ] *n.* 本地性

extensity [ɪk'stensəti] *n.* 广阔性; 广大性; 空间性

velocity [və'lɒsəti] *n.* [物]速度

compression [kəm'preʃ(ə)n] *n.* 压缩, 浓缩

multiplication [ˌmʌltɪplɪ'keɪʃ(ə)n] *n.* 增加, 增值

multiple feed 复馈, 多电源供电

transcend [træn'send] *vt.* 胜过, 超越

the core of globalization. First, it involves both the creation of new social networks and the multiplication of existing connections that cut across traditional political, economic, cultural, and geographical boundaries. As we have seen in the case of the 2010 World Cup, today's media combine conventional TV coverage with multiple feeds into digital devices and networks that transcend nationally based services.

28 The second quality of globalization is reflected in the expansion and the stretching of social relations, activities, and connections. Today's financial markets reach around the globe, and electronic trading occurs around the clock. Gigantic and virtually identical shopping malls have emerged on all continents, catering to those consumers who can afford commodities from all regions of the world—including products whose various components were manufactured in different countries. This process of social stretching applies to FIFA as well as to other non-governmental organizations, commercial enterprises, social clubs, and countless regional and global institutions and associations: the UN, the EU, the Association of South East Asian Nations, the Organization of African Unity, Doctors Without Borders, the World Social Forum, and Google, to name but a few.

29 Third, globalization involves the intensification and acceleration of social exchanges and activities. As the Spanish sociologist Manuel Castells has pointed out, the creation of a global network society fuelled by 'communication power' required a technological revolution—one that has been powered chiefly by the rapid development of new information and communication technologies. Proceeding at breakneck speed, these innovations are reshaping the social landscape of human life. The World Wide Web relays distant information in real time, and satellites provide consumers with instant pictures of remote events. Sophisticated social networking by means of Facebook or Twitter has become a routine activity for more than a billion people around the globe.

30 The intensification of worldwide social relations means that local happenings are shaped by events occurring far away, and vice versa. To make the point again, the seemingly opposing processes of globalization and localization actually imply each other. Rather than sitting at the base and the top of conventional geographical hierarchies, the local and global intermingle, sometimes messily, with the national and regional, in overlapping horizontal scales.

31 Fourth, as we emphasized in our definition of the global imaginary, globalization processes do not occur merely on an objective, material level but they also involve the subjective plane of human consciousness. Without erasing local and national attachments, the compression of the world into a single place has increasingly made global the frame of reference for human thought and action. Hence, globalization involves both the macro-structures of a 'global community' and the micro-structures of 'global personhood'. It extends deep into the core of the self and its dispositions, facilitating the creation of multiple individual and collective identities nurtured by the intensifying relations between the

identical [aɪ'dentɪk(ə)l] *adj.* 同一的；完全相同的

cater to 迎合；为…服务

commodities [kə'mɒdətɪz] *n.* 商品

(commodity的复数)；日用品

association [ə,səʊ'fɪ'eɪʃn] *n.* 协会，联盟，社团

to name but a few 略举数例

fuel [fjuəl] *vt.* 给……提供燃料；刺激，煽动；推动

breakneck ['breɪknek] *adj.* 极快的；非常危险的

relay ['ri:leɪ] *v.* 传达，转发；转播；重新铺设

sophisticated [sə'fɪstɪkətɪd] *adj.* 复杂的

intermingle [ɪntə'mɪŋɡ(ə)l] *vi.* 混合；掺杂

plane [pleɪn] *n.* 程度；平面

attachment [ə'tætʃm(ə)nt] *n.* 依恋；连接物

the frame of reference 参照系

personhood ['pɜ:sənhud] *n.* 人格；个性

disposition [dɪspə'zɪʃ(ə)n] *n.* [心理] 性情

facilitate [fə'sɪlɪteɪt] *vt.* 促进；帮助

succinctly [sək'sɪŋktli] *ad.* 简洁地；简便地

yield [ji:ld] *v.* 出产（产品或作物）；产出（效果、收益等）

personal and the global. 32 Having succinctly identified some of the core qualities of globalization, let us compress them into a single sentence that yields the following very short definition of globalization: Globalization refers to the expansion and intensification of social relations and consciousness across world-time and world-space. 33 Before we draw this unit to a close, we should consider an important objection raised by global studies scholars sensitive to historical matters: Is globalization really all that different from the centuries-old process of modernization? Some critics have responded to this question in the negative, contending that even a cursory look at history suggests that there is not much that is new about contemporary globalization. Hence, before we explore in some detail the main dimensions of globalization in subsequent units of this book, we should give this argument a fair hearing. After all, such a critical investigation of globalization's alleged novelty and its relationship to modernity are closely related to yet another question hotly debated in global studies: What does a proper chronology and historical periodization of globalization look like? Let us turn to Unit 2 to find answers to these questions.	contend [kən'tend] <i>v.</i> 争论; 主张 cursory ['kʊ:s(ə)rɪ] <i>a.</i> 草率的; 匆忙的 alleged [ə'ledʒd] <i>adj.</i> 所谓的; 声称的 novelty ['nɒv(ə)ltɪ] <i>n.</i> 新奇; 新奇的事物 periodization [piəriədaɪ'zeɪʃən] <i>n.</i> (历史等的) 时期 (或时代) 划分

Exercises

Part 1 Dictation -- The Process of Globalization

You will hear the recording three times. While listening, fill in the blanks with the exact words that you hear.

We explain the process of globalization.

Globalization is the term used to describe the way 1) _____
_____, both economically and culturally. Globalization is
an international process 2) _____. This process has effects on the environment, on culture, on
political systems, on economic development and prosperity, and on 3) _____.
_____.

Globalization is not new, though. For thousands of years, people and later, corporations, 4) _____
_____. One such example is the famed
Silk Road across Central Asia that 5) _____.
_____.

But what exactly drives globalization? Over the past 20 years, there have been 6) _____
_____.

The introduction of specialized bulk carriers and containerships has helped to 7) _____. Recent developments in
communications technology, 8) _____
_____ enable people anywhere on earth to have access to and distribute vast amounts of information.

9) _____ is increasingly
dominated by very large companies, known as transnational corporations, TNCs. The business links of TNCs
create a more integrated world economy 10) _____.
_____.

International trade has given countries access to goods and services they are unable to produce themselves or
can obtain more cheaply from other places.

Part 2 Reading-based Exercises

I. Useful Chunks

Below are the Chinese equivalents of some useful chunks from paragraphs 17 - 24. Read the paragraphs closely and note down the English equivalents.

1. 在大众媒体和学术文献中
2. 排除了进一步发展的可能
3. 关于全球性的不同社会表现
4. 本质上不确定的性质
5. 不断变化的人类交往模式
6. 它总是与变化的观念相一致
7. 从事与社会变革主题相关的问题研究
8. 全球意识的增强
9. 一个明确的特点
10. 加剧了.....的危险

II. Translation

Translate the following sentences into Chinese.

1. Rather, this concept signifies a future social condition that, like all conditions, is destined to give way to new constellations. (Para. 18)
2. Indeed, like “modernization” and other verbal nouns that end in the suffix “-ization”, the term “globalization” suggests a sort of dynamism best captured by the notion of “development” or “unfolding” along discernible patterns. (Para. 19)
3. Notice that the conceptualization of globalization as a dynamic process rather than as a static condition forces the researcher to pay close attention to our shifting perceptions of time and space mediated by digital technology. (Para. 20)
4. As we have seen in our deconstruction of the 2010 World Cup, this is no to say that national and local communal frameworks have lost their power to provide people with a meaningful sense of home and identity. (Para. 21)
5. To argue that globalization constitutes a set of social processes enveloped by the rising global imaginary that propel us towards the condition of globality may eliminate the danger of circular definitions, but it gives us only one defining characteristic of the process: movement towards more intense forms of connectivity and integration. (Para. 22)

III. Essay Questions

Write a paragraph to answer one of the questions below. Start your paragraph with a topic sentence and support it with details from the text. While writing, paraphrase instead of copying the exact words from the text.

1. How does the 2010 World Cup illustrate the complex ‘glocal’ dynamics?
2. Why does the author say that globalization is a set of processes?

Unit Two

Globalization and History: Is Globalization a New Phenomenon?

1 If we asked an ordinary person on the busy streets of global cities like New York, Shanghai, or Sydney about the essence of globalization, the answer would probably involve some reference to growing forms of connectivity fuelled by exploding information and communication technologies. People might point to their ultra-thin laptop computers; all sorts of mobile devices such as Cloud-connected smart wireless phones and tablets like the popular iPhone or the Kindle Fire; powerful Internet search engines like Google that sort in a split-second through gigantic data sets; individual video-postings on YouTube; ubiquitous social networking sites like Twitter; the rapidly expanding blogosphere, satellite- and computer-connected HDTVs; interactive 3-D computer and video games; the new generation of super-jetliners like the Airbus A380 or Boeing's Dreamliner; and the international space station.

2 As important as technology is for the intensification of global connectivity, it provides only a partial explanation for the latest wave of globalization since the 1980s. Yet, it would be foolish to deny that these new innovations have played a crucial role in the compression of world-time and world-space. The Internet, in particular, has assumed a pivotal function in facilitating globalization through the creation of the World Wide Web that connects billions of individuals, civil society associations, and governments. Since most of these technologies have been around for less than three decades, it seems to make sense to agree with those commentators who claim that globalization is, indeed, a relatively new phenomenon.

3 Still, the definition of globalization we arrived at in the previous unit stresses the dynamic nature of the phenomenon. The global expansion of social relations and the rise of the global imaginary are gradual processes with deep historical roots. The engineers who developed personal computers and supersonic jet planes stand on the shoulders of earlier innovators who created the steam engine, the cotton gin, the telegraph, the phonograph, the telephone, the typewriter, the internal-combustion engine, and electrical appliances. These products, in turn, owe their existence to much earlier technological inventions such as the telescope, the compass, water wheels, windmills, gunpowder, the printing press, and oceangoing ships. In order to acknowledge the full historical record, we might reach back even further to such momentous technological and social achievements as the production of paper, the development of writing, the invention of the wheel, the domestication of wild plants and animals, the slow outward migration of our common African ancestors, and, finally, the emergence of language at the dawn of human evolution.

ultra-thin laptop computer 超薄笔记本电脑

Cloud-connected smart wireless phones and tablets 云连接的无线智能手机与平板电脑

ubiquitous [ju:'bɪkwɪtəs] *adj.* 到处存在的

blogosphere ['blɒɡəsfɪə] *n.* 博客世界

assume a pivotal function 起到关键作用

pivotal ['pɪvətl] *adj.* 关键的

dynamic [daɪ'næmɪk] *adj.* 动态的; 有活力的

supersonic jet plane 超音速飞机

steam engine 蒸汽机

cotton gin 轧棉机

phonograph ['fəʊnəgrɑ:f] *n.* 留声机; [电子] 电唱机

internal-combustion engine 内燃机

printing press 印刷机

oceangoing ship 远洋船

momentous [mə(u)'mentəs] *adj.* 重要的; 重大的

domestication [dəʊ.mes'tɪkeɪʃən] *n.* 驯养; 教化

4 Thus, the answer to the question of whether globalization constitutes a new phenomenon depends upon how far we are willing to extend the web of causation that resulted in those recent technologies and social arrangements that most people have come to associate with our buzzword. Some scholars consciously limit the historical scope of globalization to the post-1989 era in order to capture its contemporary uniqueness. Others are willing to extend this timeframe to include the ground-breaking developments of the last two centuries. Still others argue that globalization really represents the continuation and extension of complex processes that began with the emergence of modernity and the capitalist world system in the 1500s. And a few remaining researchers refuse to confine globalization to time periods measured in mere decades or centuries. Rather, they suggest that these processes have been unfolding for millennia.

5 No doubt, each of these contending perspectives contains important insights. As we will see in subsequent units, the advocates of the first approach have marshalled impressive evidence for their view that the dramatic expansion and acceleration of global exchanges since the 1980s represents a quantum leap in the history of globalization. The proponents of the second view correctly emphasize the tight connection between contemporary forms of globalization and the explosion of technology known as the Industrial Revolution. The representatives of the third perspective rightly point to the significance of the time-space compression that occurred in the 16th century when Eurasia, Africa, and the Americas first became connected by enduring trade routes. Finally, the advocates of the fourth approach advance a rather sensible argument when they insist that any truly comprehensive account of globalization falls short without the incorporation of ancient developments and enduring dynamics into our planetary history.

6 While the short chronology outlined below is necessarily fragmentary and general, it identifies five historical periods that are separated from each other by significant accelerations in the pace of social exchanges as well as a widening of their geographical scope. Thus, we could say that globalization is an ancient process that, over many centuries, has crossed distinct qualitative thresholds. In this context, it is important to bear in mind that my chronology does not necessarily imply a linear unfolding of history, nor does it advocate a conventional Eurocentric perspective of world history. Full of unanticipated surprises, violent twists, sudden punctuations, and dramatic reversals, the history of globalization has involved all major regions and cultures of our planet.

The prehistoric period (10,000 BCE–3500 BCE)

7 Let us begin 12,000 years ago when small bands of hunters and gatherers reached the southern tip of South America. This event marked the end of the long process of settling all five continents that was begun by our hominid African ancestors more than one million years ago. Although some major island groups in the Pacific and the Atlantic were not inhabited until relatively recent times, the truly global dispersion of our

causation [kə:'zeɪʃn] *n.* 原因, 因果关系

extend the timeframe 延长时限

ground-breaking *adj.* 独创的; 开拓性的

millennia [mɪ'lenɪə] *n.* 千年期; 千周年纪念日 (millennium 的复数)

contending perspectives 对比的观点

subsequent ['sʌbsɪkw(ə)nt] *adj.* 后来的; 随后的

marshal ['mɑ:ʃ(ə)l] *vt.* 整理; 引领; 编列

a quantum leap 巨大突破

quantum ['kwɒntəm] *adj.* (大小、数量的) 猛然剧增; (质量的) 突飞猛进

proponent [prə'pəʊnənt] *n.* 支持者; 建议者

chronology [krə'nɒlədʒɪ] *n.* 年表; 年代学

a linear unfolding of history 历史的线性展开

a conventional Eurocentric perspective 传统的以欧洲为中心的观点

reversal [rɪ'vɜ:s(ə)l] *n.* 翻转; 倒转; 反转

hominid ['hɒmɪnɪd] *adj.* 人类及其祖先的

species was finally achieved. The successful endeavor of the South American nomads rested on the migratory achievements of their Siberian ancestors who had crossed the Bering Strait into North America at least a thousand years earlier.

8 In this earliest phase of globalization, contact among thousands of hunter and gatherer bands spread all over the world was geographically limited and mostly coincidental. This fleeting mode of social interaction changed dramatically about 10,000 years ago when humans took the crucial step of producing their own food. As a result of several factors, including the natural occurrence of plants and animals suitable for domestication as well as continental differences in area and total population size, only certain regions located on or near the vast Eurasian landmass proved to be ideal for these growing agricultural settlements. These areas were located in the Fertile Crescent, north-central China, North Africa, northwestern India, and New Guinea. Over time, food surpluses achieved by these early farmers and herders led to population increases, the establishment of permanent villages, and the construction of fortified towns.

9 Roving bands of nomads lost out to settled tribes, chiefdoms, and, ultimately, powerful states based on agricultural food production. (See Map 1). The decentralized, egalitarian nature of hunter and gatherer groups was replaced by centralized and highly stratified patriarchal social structures headed by chiefs and priests who were exempted from hard manual labour. Moreover, for the first time in human history, these farming societies were able to support two additional social classes whose members did not participate in food production. One group consisted of full-time craft specialists who directed their creative energies toward the invention of new technologies, such as powerful iron tools, beautiful ornaments made of precious metals, complex irrigation canals, sophisticated pottery and basketry, and monumental building structures. The other group was comprised of professional bureaucrats and soldiers who would later play a key role in the monopolization of the means of violence in the hands of a few rulers, the precise accounting of food surpluses necessary for the growth and survival of the centralized state, the acquisition of new territory, the establishment of permanent trade routes, and the systematic exploration of distant regions.

Map 1. Early human migrations

dispersion [dɪ'spɜːʃ(ə)n] *n.* 散布

nomad ['nəʊməd] *n.* 游牧民; 流浪者

migratory ['maɪgrət(ə)rɪ] *adj.* 迁移的; 流浪的

Siberian [sɪə'biəriən] *adj.* 西伯利亚的; 西伯利亚人的

fleeting ['fliːtɪŋ] *adj.* 飞逝的; 转瞬即逝的

domestication [də,mestɪ'keɪʃn] *n.* 驯养; 教化

landmass ['lændməs] *n.* 大陆

the Fertile Crescent 由尼罗河平原、黎凡特地区和两河流域组成的新月沃地

surplus ['sɜːpləs] *n.* 剩余; [贸易] 顺差

fortify ['fɔːtɪfaɪ] *vt.* 加强; 增强

roving ['rəʊvɪŋ] *adj.* 流动的

decentralize [di:'sentərəlaɪz] *vt.* 使分散; 使分权; 疏散

egalitarian [ɪ,gæli'teəriən] *adj.* 平等主义的

stratify ['strætɪfaɪ] *vt.* 分层; 使形成阶层

patriarchal [peɪtrɪ'ɑːk(ə)l] *adj.* 家长的; 族长的; 由族长统治的

exempt [ɪg'zem(p)t; eg-] *adj.* 被免除(责任或义务)的, 获豁免的

irrigation canal 灌溉渠

bureaucrat ['bjʊərəkræt] *n.* 官僚; 官僚主义者

monopolization [mə,nɒpələ'zeɪʃən] *n.* 垄断; 专卖; 独占

acquisition of new territory 占领新的疆域

10 For the most part, however, globalization in the prehistoric period was severely limited. Advanced forms of technology capable of overcoming existing geographical and social obstacles were largely absent; thus, enduring long-distance interactions never materialized. It was only toward the end of this epoch that centrally administered forms of agriculture, religion, bureaucracy, and warfare slowly emerged as the key agents of intensifying modes of social exchange that would involve a growing number of societies in many regions of the world.

11 Perhaps the best way of characterizing the dynamic of this earliest phase of globalization would be to call it ‘divergence’—people and social connections stemming from a single origin but moving and diversifying greatly over time and space.

The premodern period (3500 BCE–1500 CE)

12 The invention of writing in Mesopotamia, Egypt, and central China between 3500 and 2000 BCE (see Illustration 3) roughly coincided with the invention of the wheel around 3000 BCE in Southwest Asia. Marking the close of the prehistoric period, these monumental inventions amounted to one of those technological and social boosts that moved globalization to a new level.

13 Thanks to the auspicious east-west orientation of Eurasia’s major continental axis—a geographical feature that had already facilitated the rapid spread of crops and animals suitable for food production along the same latitudes—the diffusion of these new technologies to distant parts of the continent occurred within only a few centuries. The importance of these inventions for the strengthening of globalization processes should be obvious. Among other things, the wheel spurred crucial infrastructural innovations such as animal-drawn carts and permanent roads that allowed for the faster and more efficient transportation of people and goods. In addition to the spread of ideas and inventions, writing greatly facilitated the coordination of complex social activities and thus encouraged large state formations. Of the sizeable territorial units that arose during this period, only the Andes civilizations of South America managed to grow into the mighty Inca Empire without the benefits of either the wheel or the written word.

3. Assyrian clay tablet with cuneiform writing, c. 1900–1800 BCE

epoch [ˈi:pɒk; ˈepɒk] *n.* 新纪元; 新时代

bureaucracy [ˌbjʊ(ə)ˈrɒkrəsi] *n.* 官僚主义; 官僚机构; 官僚政治

infrastructural [ˌɪnfɪəˈstrʌktʃərəl] *adj.* 基础设施的

the Inca Empire 印加帝国

Assyrian clay tablet with cuneiform writing 亚述楔形文字泥板

14 The later premodern period was the age of empires. As some states succeeded in establishing permanent rule over other states, the resulting vast territorial accumulations formed the basis of the Egyptian Kingdoms, the Persian Empire, the Macedonian Empire, the American Empires of the Aztecs and the Incas, the Roman Empire, the Indian Empires, the Byzantine Empire, the Islamic Caliphates, the Holy Roman Empire, the African Empires of Ghana, Mali, and Songhay, and the Ottoman Empire. All of these empires fostered the multiplication and extension of long-distance communication and the exchange of culture, technology, commodities, and diseases. The most enduring and technologically advanced of these vast premodern conglomerates was undoubtedly the Chinese Empire. A closer look at its history reveals some of the early dynamics of globalization.

15 After centuries of warfare between several independent states, the Qin Emperor's armies, in 221 BCE, finally unified large portions of northeast China. For the next 1,700 years, successive dynasties known as the Han, Sui, T'ang, Yuan, and Ming ruled an empire supported by vast bureaucracies that would extend its influence to such distant regions as tropical Southeast Asia, the Mediterranean, India, and East Africa (see Illustration 4). Dazzling artistry and brilliant philosophical achievements stimulated new discoveries in other fields of knowledge such as astronomy, mathematics, and chemistry. The long list of major technological innovations achieved in China during the premodern period include redesigned plowshares, hydraulic engineering, gunpowder, the tapping of natural gas, the compass, mechanical clocks, paper, printing, lavishly embroidered silk fabrics, and sophisticated metalworking techniques. The construction of vast irrigation systems consisting of hundreds of small canals enhanced the region's agricultural productivity while at the same time providing for one of the best river transport systems in the world. The codification of law and the fixing of weights, measures, and values of coinage fostered the expansion of trade and markets. The standardization of the size of cart axles and the roads they travelled on allowed Chinese merchants for the first time to make precise calculations as to the desired quantities of imported and exported goods.

4. The Great Wall of China, begun in the 7th century BCE by warlords, was enlarged and rebuilt repeatedly

axle ['æks(ə)] *n.* 车轴; [车辆] 轮轴

16 The most extensive of these trade routes was the Silk Road. It linked the Chinese and the Roman Empires, with Parthian traders serving as skilled intermediaries. Even 1,300 years after the Silk Road first reached the Italian peninsula, in 50 BCE, a truly multicultural group of Eurasian and African globetrotters—including the famous Moroccan merchant Ibn Battuta and his Venetian counterparts in the Marco Polo family—relied on this great Eurasian land route to reach the splendid imperial court of the Mongol Khans in Beijing.

17 By the 15th century CE, enormous Chinese fleets consisting of hundreds of 400-foot-long ocean-going ships were crossing the Indian Ocean and establishing short-lived trade outposts on the east coast of Africa.

18 However, a few decades later, the rulers of the Chinese Empire implemented a series of fateful political decisions that halted overseas navigation and mandated a retreat from further technological development. Thus, the rulers cut short their empire's incipient industrial revolution, a development that allowed much smaller European states to emerge as the primary historical agents behind the intensification of globalization.

19 Toward the end of the premodern period, then, the existing global trade network (see Map 2) consisted of several interlocking trade circuits that connected the most populous regions of Eurasia and northeastern Africa. Although both the Australian and the American continents still remained separate from this expanding web of economic, political, and cultural interdependence, the empires of the Aztecs and Incas had also succeeded in developing major trade networks in their own hemisphere.

20 The existence of these sprawling networks of economic and cultural exchange triggered massive waves of migration, which, in turn, led to further population increase and the rapid growth of urban centres. In the resulting cultural clashes, religions with only local significance were transformed into the major 'world religions' we know today as Judaism, Christianity, Islam, Hinduism, and Buddhism. But higher population density and more intense social interaction over greater distances also facilitated the spread of new infectious diseases like the bubonic plague. The enormous plague epidemic of the mid-14th century, for example, killed up to one-third of the respective populations of China, the Middle East, and Europe. However, these unwelcome by-products of unfolding globalization processes did not reach their most horrific manifestation until the fateful 16th-century collision of the 'old' and 'new' worlds. Although the precise population size of the Americas before contact remains a contentious issue, it is estimated that the deadly germs of European invaders killed an estimated 18–20 million Native Americans—an inconceivable 90–95 percent of the total indigenous population.

Parthian ['pa:θiən] *adj.* 帕提亚的; 帕提亚人的

The early modern period (1500–1750)

21 The term ‘modernity’ has become associated with the 18th-century European Enlightenment project of developing objective science, achieving a universal form of morality and law, and liberating rational modes of thought and social organization from the perceived irrationalities of myth, religion, and political tyranny. But it is important to acknowledge the existence of multiple forms of modernity that often developed in various parts of the world in resistance to European modernity. The label ‘early modern’, then, refers to the period between the European Renaissance and the Enlightenment. During these two centuries, Europe and its social practices emerged as the primary catalyst for globalization after a long period of Asian predominance.

22 Indeed, having contributed little to technology and other civilizational achievements between about 500 CE–1000 CE, Europeans north of the Alps greatly benefited from the diffusion of technological innovations originating in Islamic and Chinese cultural spheres. Despite the weakened political influence of China and the noticeable ecological decline of the Fertile Crescent some 500 years later, European powers failed to penetrate into the interior of Africa and Asia. Instead, they turned their expansionistic desires westward, searching for a new, profitable sea route to India. Their efforts were aided by such innovations as mechanized printing, sophisticated wind and water mills, extensive postal systems, revised maritime technologies, and advanced navigation techniques. Add the enormous impact of the Reformation and the related liberal political idea of limited government, and we have identified the main forces behind the qualitative leap that greatly intensified demographic, cultural, ecological, and economic flows between Europe, Africa, and the Americas.

23 Of course, the rise of European metropolitan centres and their affiliated merchant classes represented another important factor responsible for strengthening globalization tendencies during the early modern period. Embodying the new values of individualism and unlimited material accumulation, European economic entrepreneurs laid the foundation of what later scholars would call the ‘capitalist world system’. However, these fledgling capitalists could not have achieved the

perceive [pə'si:v] *vt.* 察觉, 感觉; 理解; 认知

irrationality [ɪ,ræʃə'næləti] *n.* 不合理, 无理性

predominance [prɪ'dɒmɪnəns] *n.* 优势; 卓越

demographic [ˌdemə'græfɪk] *adj.* 人口统计学的; 人口学的

affiliate [ə'fɪliət] *vt.* 使附属; 接纳; 使紧密联系

global expansion of their commercial enterprises without substantial support from their respective governments. The monarchs of Spain, Portugal, the Netherlands, France, and England all put significant resources into the exploration of new worlds and the construction of new interregional markets that benefited them much more than their exotic 'trading partners'.

24 By the early 1600s, national joint stock companies like the Dutch and British East India companies were founded for the express purpose of setting up profitable overseas trade posts. As these innovative corporations grew in size and stature, they acquired the power to regulate most intercontinental economic transactions, in the process implementing social institutions and cultural practices that enabled later colonial governments to place these foreign regions under direct political rule (see Illustration 5). Related developments, such as the Atlantic slave trade and forced population transfers within the Americas, resulted in the suffering and death of millions of non-Europeans while greatly benefiting white immigrants and their home countries.

5. The sale of the island of Manhattan in 1626

25 To be sure, religious warfare within Europe also created its share of dislocation and displacement for Caucasian populations. Moreover, as a result of these protracted armed conflicts, military alliances and political arrangements underwent continuous modification. This highlights the crucial role of warfare as a catalyst of globalization. Evolving from the Westphalian states system, the sovereign, territorial nation-state emerged in 18th-century Europe as the modern container of social life. As the early modern period drew to a close, interdependencies among nation-states were multiplying as well as increasing in density.

The modern period (1750-1980)

26 By the late 18th century, Australia and the Pacific islands were slowly incorporated into the European-dominated network of political, economic, and cultural exchange. Increasingly confronted with stories of the 'distant' and images of countless 'Others', Europeans and their descendants on other continents took it upon themselves to assume the role

sovereign ['sɒvrɪn] *adj.* 至高无上的; 有主权的; 拥有最高统治权的

of the world's guardians of civilization and morality. In spite of their persistent claims to universal leadership, however, they remained strangely oblivious to their racist practices and the appalling conditions of inequality that existed both within their own societies and between the global North and South. Fed by a steady stream of materials and resources that originated mostly in other regions of the world, Western capitalist enterprises gained in stature.

27 Daring to resist powerful governmental controls, economic entrepreneurs and their academic counterparts began to spread a philosophy of individualism and rational self-interest that glorified the virtues of an idealized capitalist system supposedly based upon the providential workings of the free market and its 'invisible hand'.

28 Written in 1847 by the German political radicals Karl Marx and Friedrich Engels, the passage below taken from their famous *Communist Manifesto* captures the qualitative shift in social relations that pushed globalization to a new level in the modern period.

Marx and Engels on globalization

The discovery of America prepared the way for mighty industry and its creation of a truly global market. The latter greatly expanded trade, navigation, and communication by land. These developments, in turn, caused the further expansion of industry. The growth of industry, trade, navigation, and railroads also went hand in hand with the rise of the bourgeoisie and capital which pushed to the background the old social classes of the Middle Ages ... Chased around the globe by its burning desire for ever-expanding markets for its products, the bourgeoisie has no choice but settle everywhere; cultivate everywhere; establish connections everywhere ... Rapidly improving the instruments of production, the bourgeoisie utilizes the incessantly easing modes of communication to pull all nations into civilization—even the most barbarian ones ... In a nutshell, it creates the world in its own image. (Translated by the author)

29 Indeed, the volume of world trade increased dramatically between 1850 and 1914. Guided by the activities of multinational banks, capital and goods flowed across the borders relatively freely as the sterling-based gold standard made possible the worldwide circulation of leading national currencies like the British pound and the Dutch guilder. Eager to acquire their own independent resource bases, most European nation-states subjected large portions of the global South to direct colonial rule. On the eve of World War I, merchandise trade measured as a percentage of gross national output totalled almost 12 percent for the industrialized countries, a level unmatched until the 1970s. Global pricing systems facilitated trade in important commodities like grains, cotton, and various metals. Brand name packaged goods like Coca-Cola drinks, Campbell soups, Singer sewing machines, and Remington typewriters made their first appearance. In order to raise the global visibility of these

commodity [kə'mɒdɪtɪ] *n.* 商品, 货物; 日用品

corporations, international advertising agencies launched the first full-blown trans-border commercial promotion campaigns.

30 As Marx and Engels noted, however, the rise of the European bourgeoisie and the related intensification of global interconnections would not have been possible without the 19th-century explosion of science and technology. To be sure, the maintenance of these new industrial regimes required new power sources such as electricity and petroleum. The largely unregulated use of these energy sources resulted in the annihilation of countless animal and plant species as well as the toxification of entire regions. On the upside, however, railways, mechanized shipping, and 20th-century intercontinental air transport managed to overcome the last remaining geographical obstacles to the establishment of a genuine global infrastructure, while at the same time lowering transportation costs.

31 These innovations in transportation were complemented by the swift development of communication technologies. The telegraph and its transatlantic reach after 1866 provided for instant information exchanges between the two hemispheres. Moreover, the telegraph set the stage for the telephone and wireless radio communication, prompting newly emerging communication corporations like AT&T to coin advertising slogans in celebration of a world 'inextricably bound together'. Finally, the 20th-century arrival of mass circulation newspapers and magazines, film, and television further enhanced a growing consciousness of a rapidly shrinking world.

32 The modern period also witnessed an unprecedented population explosion. Having increased only modestly from about 300 million at the time of the birth of Christ to 760 million in 1750, the world's population reached 3.7 billion in 1970. Enormous waves of migration intensified existing cultural exchanges and transformed traditional social patterns. Popular immigration countries like the United States of America, Canada, and Australia took advantage of this boost in productivity. By the early 20th century, these countries entered the world stage as forces to be reckoned with. At the same time, however, they made significant efforts to control these large migratory flows, in the process inventing novel forms of bureaucratic control and developing new surveillance techniques designed to accumulate more information about nationals while keeping 'undesirables' out.

33 When the accelerating process of industrialization sharpened existing disparities in wealth and wellbeing beyond bearable limits, many working people in the global North began to organize themselves politically in various labour movements and socialist parties. However, their idealistic calls for international class solidarity went largely unheeded. Instead, ideologies that translated the national imaginary into extreme political programs captured the imagination of millions of people around the world. There is no question that interstate rivalries intensified at the outset of the 20th century as a result of mass migration, urbanization, colonial competition, and the excessive liberalization of world trade. The ensuing

period of extreme nationalism culminated in two devastating world wars, genocides, a long global economic depression, and hostile measures to protect narrowly conceived political communities.

34 The end of World War II saw the explosion of two powerful atomic bombs that killed 200,000 Japanese, most of them civilians. Nothing did more to convince people around the world of the linked fate of geographically and politically separated 'nations'. Indeed, the global imaginary found a horrifying expression in the Cold-War acronym 'MAD' (mutually assured destruction). A more positive result was the process of decolonization in the 1950s and 1960s that slowly revived global flows and international exchanges. A new political order of sovereign but interdependent nation-states anchored in the charter of the United Nations raised the prospect of global democratic governance. However, such cosmopolitan hopes quickly faded as the Cold War divided the world for four long decades into two antagonistic spheres: a liberal-capitalist 'First World' dominated by the United States, and an authoritarian-socialist 'Second World' controlled by the Soviet Union. Both blocs sought to establish their political and ideological dominance in the 'Third World'. Indeed, superpower confrontations like the Cuban Missile Crisis raised the spectre of a global conflict capable of destroying virtually all life on our planet.

The contemporary period (from the 1980s)

35 As we noted at the beginning of this unit, the dramatic creation, expansion, and acceleration of worldwide interdependencies and global exchanges that have occurred since the early 1980s represent yet another quantum leap in the history of globalization. The best way of characterizing this latest globalization wave would be to call it 'convergence'—different and widely spaced people and social connections coming together more rapidly than ever before. This dynamic received another boost with the 1991 collapse of the communist Soviet Empire and 'neoliberal' attempts to create a single global market. Indeed, the deregulation of national economies combined with the Information and Communication Technology (ICT) Revolution kicked globalization into a new gear. The unprecedented development of horizontal networks of interactive communication that connected the local and global was made possible through the worldwide diffusion of the Internet, wireless communication, digital media, and online social networking tools.

36 But how exactly has globalization accelerated in these last three decades? Why does what has been happening justify the creation of a buzzword that not only captured the public imagination, but has also elicited conflicting emotional responses? Is contemporary globalization a 'good' or a 'bad' thing? Throughout this book we will consider possible answers to these crucial questions. In doing so, we will limit the application of the term 'globalization' to the contemporary period while keeping in mind that the forces driving these processes actually can be traced back thousands of years.

outset ['autset] *n.* 开始; 开端

elicit [rɪ'lɪsɪt] *vt.* 引出; 诱出

37 Before we embark on this next stage of our journey, let us pause and recall an important point we made in Unit 1. Globalization is not a single process but a set of processes that operate simultaneously and unevenly on several levels and in various dimensions. We could compare these interactions and interdependencies to an intricate tapestry of overlapping shapes and colours. Yet, just as an auto mechanic apprentice must turn off and disassemble the car engine in order to understand its operation, so must the student of globalization apply analytical distinctions in order to make sense of the web of global connectivity. In ensuing units, we will identify, explore, and assess patterns of globalization in each of its main domains—economic, political, cultural, ecological, and ideological—while keeping in mind its operation as an interacting whole on all geographical scales. Although we will study the various dimensions of globalization in isolation, we will resist the temptation to reduce globalization to a single ‘most important’ aspect. Thus, will we avoid the blunder that kept the blind men from appreciating the full nature of the elephant.

embark [ɪmˈbɑːk; em-] *vi.* 着手, 从事

intricate [ˈɪntrɪkət] *adj.* 复杂的; 错综的

tapestry [ˈtæpɪstri] *n.* 挂毯

disassemble [dɪsəˈsemb(ə)l] *vt.* 拆开; 拆卸

distinction [dɪˈstɪŋ(k)ʃ(ə)n] *n.* 区别; 差别; 特性

blunder [ˈblʌndə] *n.* 大错

Exercises

Part 1 Dictation -- Different Phases of Globalization

You will hear the recording three times. While listening, fill in the blanks with the exact words that you hear.

The first phase of globalization is heavily characterized by the exchange of knowledge and less by the exchange of goods. Notable events during that phase, which took place from the 15th to the 18th century, 1) _____, the introduction of the Gregorian calendar and the discovery of the heliocentric view of the solar system. The 18th and the 19th century

2) _____. The American Declaration of Independence in the year 1776 helped the spread of democratic ideals, which many countries use even now.

In the 19th century the industrialization took place, which gave the world significant technological progress and allowed for 3) _____. Only a few decades later the phase of imperialism and international expansion started: International trade relations became stronger thanks to the free trade and the first international competitions like the Olympics or the Nobel Prize Awards were held.

The second phase of globalization 4) _____ of transportation systems, communications, commerce and science. During the second half of the 19th century, the Western world experienced 5) _____ due to four advancing technologies — trains, steamships, the telegraph, and the postal system. At the turn of the 20th century, an affluent inhabitant of London had access to many products of foreign origin before the events of August 1914 disrupted this world of global connectivity.

The third phase of globalization that began in 1945, 6) _____ that followed after the end of the Second World War. The period from the late 1940s to the early 1970s is called the Golden Age of Capitalism. This new global economic order was aimed at preventing a return of the catastrophic economic conditions from the Great Depression of the 1930s. 7) _____, as opposed to the destructive economic competitions between nations of the 1930s. New international financial agreements and institutions, such as the International Monetary Fund and the World Bank, 8) _____.

The Golden Age of Capitalism ended during the early 1970s. It has been replaced by slower growth and a series of global financial crises related to the triumph of neoliberal market globalism. The neoliberal globalism is characterized by free trade, 9) _____ and competition between certain companies instead of competition between countries. Improved communication, and especially the Internet, 10) _____. All those historical phases bring us to the world we are living in today – with easy access to lots of information and the ability to buy goods from all around the world.

Part 2 Reading-based Exercises

I. Useful Chunks

Below are the Chinese equivalents of some useful chunks from paragraphs 26 - 34. Read the paragraphs closely and note down the English equivalents.

1. 慢慢融入
2. 日益面临着
3. 源源不断的物资和资源
4. 促进重要商品的贸易
5. 通信技术的快速发展
6. ...与...相辅相成
7. 进一步增强了对...的认识
8. 见证前所未有的人口爆炸
9. 让全世界的人信服
10. 燃起对全球民主治理的希望

II. Translation

Translate the following sentences into Chinese.

1. Daring to resist powerful governmental controls, economic entrepreneurs and their academic counterparts began to spread a philosophy of individualism and rational self-interest that glorified the virtues of an idealized capitalist system supposedly based upon the providential workings of the free market and its ‘invisible hand’. (Para. 27)
2. On the upside, however, railways, mechanized shipping, and 20th-century intercontinental air transport managed to overcome the last remaining geographical obstacles to the establishment of a genuine global infrastructure, while at the same time lowering transportation costs. (Para. 30)
3. Moreover, the telegraph set the stage for the telephone and wireless radio communication, prompting newly emerging communication corporations like AT&T to coin advertising slogans in celebration of a world ‘inextricably bound together’. (Para. 31)
4. At the same time, however, they made significant efforts to control these large migratory flows, in the process inventing novel forms of bureaucratic control and developing new surveillance techniques designed to accumulate more information about nationals while keeping ‘undesirables’ out. (Para. 32)
5. Nothing did more to convince people around the world of the linked fate of geographically and politically separated ‘nations’. (Para. 34)

III. Essay Questions

Write a paragraph to answer one of the questions below. Start your paragraph with a topic sentence and support it with details from the text. While writing, paraphrase instead of copying the exact words from the text.

1. Based on what you have read in this part, write a summary about the main characteristics of “The Modern Period”.
2. Nothing did more than the war to convince people around the world of the linked fate of geographically and politically separated ‘nations’. To what extent do you agree to the statement? Why?

Unit Three

The Economic Dimension of Globalization

1 At the beginning of the previous unit we noted that new forms of technology centred on the Internet are one of the hallmarks of contemporary globalization. Indeed, technological progress of the magnitude seen in the last three decades is a good indicator for the occurrence of profound social transformations centred on the market. Changes in the way in which people undertake economic production and organize the exchange of commodities represent one obvious aspect of the great transformation of our age. Economic globalization refers to the intensification and stretching of economic connections across the globe. Gigantic flows of capital mediated by digital technology have stimulated trade in goods and services. Extending their reach around the world, markets have migrated to cyberspace and created new linkages among national and regional economies. Huge transnational corporations, powerful international economic institutions, and gigantic regional trading systems like Asian Pacific Economic Cooperation (APEC) or the European Union (EU) have emerged as the major building blocks of the 21st century's global economic order.

The emergence of the global economic order

2 Contemporary economic globalization can be traced back to the gradual emergence of a new international economic order assembled at an economic conference held towards the end of World War II in the sleepy New England town of Bretton Woods (see Illustration 6). Under the leadership of the United States of America and Great Britain, the major economic powers of the global North reversed their protectionist policies of the interwar period (1918–39). In addition to arriving at a firm commitment to expand international trade, the participants of the conference also agreed to establish binding rules on international economic activities. Moreover, they resolved to create a more stable money exchange system in which the value of each country's currency was pegged to a fixed gold value of the US dollar. Within these prescribed limits, individual nations were free to control the permeability of their borders. This allowed states to set their own political and economic agendas.

hallmark ['hɔ:lma:k] *n.* 特点; 品质证明

magnitude ['mægnɪtju:d] *n.* 大小; 量级

transformation [trænsfə'meɪʃ(ə)n]

n. 转换; 改革; 变形

commodity [kə'mɒdɪtɪ] *n.* 商品; 日用品

intensification [ɪn'tensɪfɪ'keɪʃn] *n.* 强化; 加剧; 激烈化; 增强明暗度

mediate ['mi:diət] *v.* 以...为媒介; 调解; 斡旋; 居中

cyberspace ['saɪbəspeɪs] *n.* (电子计算机创造的) 通讯、信息空间

Asian Pacific Economic Cooperation (APEC)
亚太经济合作组织

sleepy ['sli:pɪ] *adj.* (地方) 冷清的, 寂静的; (生意, 产业等) 没有活力的; 困倦的, 瞌睡的

commitment [kə'mɪtm(ə)nt] *n.* 承诺, 保证; 委托; 承担义务; 献身

peg [peg] *v.* 使工资、价格等与……挂钩; 限定 (价格等);

prescribed [prɪ'skraɪbd] *adj.* 规定的

permeability [pɜ:mɪə'bɪlɪtɪ] *n.* 开放度; 渗透性; 透磁率, 导磁系数; 弥漫

6. Bretton Woods Conference of 1944

3 Bretton Woods also set the institutional foundations for the establishment of three new international economic organizations. The International Monetary Fund (IMF) was created to administer the international monetary system. The International Bank for Reconstruction and Development, later known as the World Bank, was initially designed to provide loans for Europe's postwar reconstruction. During the 1950s, however, its purpose was expanded to fund various industrial projects in developing countries around the world. Finally, the General Agreement on Tariffs and Trade (GATT) was established in 1947 as a global trade organization charged with fashioning and enforcing multilateral trade agreements. In 1995, the World Trade Organization (WTO) was founded as the successor organization to GATT. By the late 1990s, the WTO had become the focal point of intense public controversy over the design and the effects of economic globalization.

4 In operation for almost three decades, the Bretton Woods regime contributed greatly to the establishment of what some observers have called the 'golden age of controlled capitalism'. Even the most conservative political parties in Europe and the United States embraced some version of state interventionism propagated by British economist John Maynard Keynes, the architect of the Bretton Woods system. Existing mechanisms of state control over international capital movements made possible full employment and the expansion of the welfare state. Rising wages and increased social services secured in the wealthy countries of the global North a temporary class compromise. By the early 1970s, however, the Bretton Woods system collapsed. Its demise strengthened those integrationist economic tendencies that later commentators would identify as the birth pangs of the new global economic order. What happened?

5 In response to profound political changes in the world that were undermining the economic competitiveness of US-based industries, President Richard Nixon abandoned the gold-based fixed rate system in 1971. The ensuing decade was characterized by global economic instability in the form of high inflation, low economic growth, high unemployment, public sector deficits, and two unprecedented energy crises due to Organization of Petroleum Exporting Countries (OPEC)'s ability to control a large part of the world's oil supply. Political forces in the global North most closely identified with the model of controlled capitalism suffered a series of spectacular

deficit ['defɪsɪt] n. 赤字; 不足额

election defeats at the hands of conservative political parties who advocated what came to be called a ‘neoliberal’ approach to economic and social policy.

6 In the 1980s, British Prime Minister Margaret Thatcher and US President

Ronald Reagan acted as the co-leaders of the neoliberal revolution against Keynesianism. Soon thereafter, business elites in the US and Japan consciously linked the novel term ‘globalization’ to a political agenda aiming at the ‘liberation’ of state-regulated economies around the world.

7 Neoliberalism is rooted in the classical liberal ideals of Adam Smith (1723–90) and David Ricardo (1772–1823), both of whom viewed the market as a self-regulating mechanism tending toward equilibrium of supply and demand, thus securing the most efficient allocation of resources. These British philosophers considered that any constraint on free competition would interfere with the natural efficiency of market mechanisms, inevitably leading to social stagnation, political corruption, and the creation of unresponsive state bureaucracies. They also advocated the elimination of tariffs on imports and other barriers to trade and capital flows between nations. British sociologist Herbert Spencer (1820–1903) added to this doctrine a twist of social Darwinism by arguing that free market economies constitute the most civilized form of human competition in which the ‘fittest’ would naturally rise to the top.

8 This budding neoliberal economic order received further legitimation with the 1989–91 collapse of communism in the Eastern Europe and the Soviet Union.

9 Since then, the three most significant developments related to economic globalization have been the internationalization of trade and finance, the increasing power of transnational corporations and large investment banks, and the enhanced role of international economic institutions like the IMF, the World Bank, and the WTO. Let us briefly examine these important features.

The internationalization of trade and finance

10 Many people associate economic globalization with the controversial issue of free trade. After all, the total value of world trade exploded from \$57 billion in 1947 to an astonishing \$14.9 trillion in 2010. In that year, China, the world’s leading manufacturer, was responsible for 11 percent of global exports while the US, the world’s most voracious consumer, accounted for 13 percent of global imports.

11 Indeed, the public debate over the alleged benefits and drawbacks of free trade still rages at a feverish pitch as wealthy Northern countries and regional trading blocs have increased their efforts to establish a single global market through far-reaching trade-liberalization agreements. While admitting that these new sets of trade rules often override national legislation, free trade proponents have nonetheless assured the public that the elimination or

neoliberal [ˌniːəʊˈlɪbəərəl] *a.* 新自由主义的（主张不受政府调控的全球自由市场，工商企业由私有者经营以获利）

Keynesianism [ˈkeɪnəz(ə)nɪz(ə)m] *n.* 凯恩斯主义，凯恩斯理论；凯恩斯学说

equilibrium [ˌiːkwɪˈlɪbrɪəm] *n.* 均衡；平静；保持平衡的能力

allocation [æləˈkeɪʃ(ə)n] *n.* 分配，配置；安置

stagnation [stæɡˈneɪʃən] *n.* 停滞；滞止

unresponsive [ʌnrɪˈspɒnsɪv] *a.* 反应迟钝的；无反应的

bureaucracy [ˌbjʊ(ə)ˈrɒkrəsi] *n.* 官僚主义；官僚机构；官僚政治

budding [ˈbʌdɪŋ] *adj.* 萌芽的；发育期的

legitimation [lɪˌdʒɪtəˈmeɪʃən] *n.* 合法化

transnational corporation 跨国公司

investment bank 投资银行

voracious [vəˈreɪʃəs] *a.* 贪婪的；贪吃的

rage [reɪdʒ] *vi.* 流行，风行；大怒，发怒

a feverish pitch 狂热程度；白热化

bloc [blɒk] *n.* （政治利益一致的）集团

override [əʊvəˈraɪd] *vt.* 凌驾于；推翻

reduction of existing trade barriers among nations will increase global wealth and enhance consumer choice. The ultimate benefit of integrated markets, they argue, would be secure peaceful international relations and technological innovation for the benefit of all.

12 Concrete neoliberal measures

- 1 Privatization of public enterprises.
- 2 Deregulation of the economy.
- 3 Liberalization of trade and industry.
- 4 Massive tax cuts.
- 5 'Monetarist' measures to keep inflation in check, even at the risk of increasing unemployment.
- 6 Strict control on organized labour.
- 7 The reduction of public expenditures, particularly social spending.
- 8 The down-sizing of government.
- 9 The expansion of international markets.
- 10 The removal of controls on global financial flows.

13 To be sure, there is evidence that some national economies have increased

their productivity as a result of free trade. Millions of people have been lifted out of poverty in developing countries like China, India, or Indonesia. A 2012 World Bank report shows that for the first time the proportion of people living in extreme poverty—on less than \$1.25 a day—fell in every developing region from 2005 to 2008. The progress has been so drastic that the United Nations' Millennium Goals to cut extreme poverty in half has been met three years before its 2015 deadline. Moreover, there are some clear material benefits that accrue to societies through specialization, competition, and the spread of technology. But it is less clear whether the profits resulting from free trade have been distributed fairly within and among populations. A number of studies suggest that the gap between rich and poor countries is actually widening at a fairly rapid pace (see Figure B).

14 The internationalization of trade has gone hand in hand with the liberalization of financial transactions. Its key components include the deregulation of interest rates, the removal of credit controls, the privatization of government-owned banks and financial institutions, and the explosive growth of investment banking. Globalization of financial trading allows for increased mobility among different segments of the financial industry, with fewer restrictions and greater investment opportunities. This new financial infrastructure emerged in the 1980s with the gradual deregulation of capital and securities markets in Europe, the Americas, East Asia, Australia, and New Zealand (see Figure C). A decade later, Southeast Asian countries, India, and several African nations followed suit. During the 1990s, new satellite systems and fibre-optic cables provided the nervous system of Internet-based technologies that further accelerated the liberalization of financial transactions. As captured by the snazzy title of Microsoft Chief Executive Officer (CEO) Bill Gates' best-selling book, many people conducted business@the-speed-of-thought. Millions of individual investors utilized global electronic investment networks not only to place their orders,

integrated market 一体化市场

massive tax cut 大规模减税

in check 受控制的；受抑制的

down-sizing n. 缩小规模；裁减人员；小型化

securities market [金融] 证券市场

fibre-optic ['faɪbə'ɒptɪk] *adj.* 光导纤维的

fibre-optic cable 纤维光缆

snazzy ['snæzi] *adj.* 时髦的；漂亮的；新潮的

but also to receive valuable information about relevant economic and political developments. In 2005, internet publishing, broadcasting and marketing firms traded approximately US\$10 trillion in the United States alone. In early 2007, just before the Global Financial Crisis (GFC) hit, NASDAQ attempted to take over the London Stock Exchange, offering US\$5.3 billion, a move that was rejected by the vast majority of shareholders in the London Stock Exchange.

15 Yet, a large part of the money involved in this ‘financialization’ of global capitalism has little to do with supplying capital for such productive investments as putting together machines or organizing raw materials and employees to produce saleable commodities. Most of the financial growth has occurred in the form of high-risk ‘hedge funds’ and other purely money-dealing currency and securities markets that trade claims to draw profits from future production. In other words, investors are betting on commodities or currency rates that do not yet exist. For example, in 2010, the equivalent of US\$4 trillion was exchanged daily in global currency markets alone (see Illustration 7). Dominated by highly sensitive stock markets that drive high-risk innovation, the world’s financial systems have become characterized by extremely high volatility, rampant competition, and general insecurity. Global speculators often take advantage of weak financial and banking regulations to make astronomical profits in emerging markets of developing countries. However, since these international capital flows can be reversed swiftly, they are capable of creating artificial boom-and-bust cycles that endanger the social welfare of entire regions.

Total external debt of emerging and developing economies in 1970

B. The global South: a fate worse than debt ²C. The advance of deregulation and liberalization, 1980–98³

16 In early 2008, this increasing volatility of financial flows combined with

two decades of neoliberal deregulation to produce the GFC—the most serious economic crisis since the Great Depression of the 1930s. Before we continue our exploration of economic globalization with respect to the increasing power of transnational corporations and the enhanced role of international economic institutions, let us pause for a moment to examine briefly the causes and evolution of this crisis.

7. The New York Stock Exchange. Billions of shares change hands on an average trading day

The Global Financial Crisis

17 The possible negative consequences of a deregulated global financial infrastructure were already visible in the 1997–8 Southeast Asia Crisis. In the early 1990s, the governments of Thailand, Indonesia, Malaysia, South Korea, and the Philippines had gradually abandoned control over the domestic movement of capital in order to attract foreign direct investment. The ensuing influx of global investment translated into soaring stock and real estate markets all over Southeast Asia. But when those investors realized that prices

the Great Depression 20世纪30年代美国经济大萧条

influx ['ɪnflʌks] *n.* 流入; 汇集; 河流的汇集处 [复数 influxes]

soaring ['sɔ:riŋ] *a.* 翱翔的; 高耸的; 猛增的

real estate *n.* 不动产, 房地产

plummet ['plʌmɪt] *v.* (价值、数量等) 骤然下跌; 陡直落下, 快速落下

throe [θrəʊ] *n.* 阵痛; 剧痛

avert [ə'veɜ:t] *vt.* 避免, 防止; 转移

bail-out ['beɪl,aʊt] *n.* (经济上的) 紧急援助

bail-out package 救助计划; 救市计划

rock-bottom ['rɒk'bɒtəm] *a.* 最低的; 底层的

initiative [ɪ'nɪʃɪətɪv; -ʃə] *n.* 新方案; 倡议

repeal [rɪ'pi:l] *n.* 废除, 撤销

the Glass-Steagall Act 《格拉斯—斯蒂格尔法案》, 也称作《1933年银行法》

partake [pɑ:'teɪk] *v.* 参与; 分担; 分享; 带有某种性质

speculative [ˌspekju'lətɪv] *adj.* 投机的; 推测的; 思索性的

had become inflated much beyond their actual value, economic output fell, unemployment increased, and wages plummeted. By late 1997, the entire region found itself in the throes of a financial crisis that threatened to push the global economy into recession. This disastrous result was only narrowly averted by a combination of international bail-out packages and the immediate sale of Southeast Asian commercial assets to foreign corporate investors at rock-bottom prices.

18 A decade later, the world was not as lucky. The crash of 2008 has its roots

in the 1980s and 1990s, when three successive US governments under Presidents Reagan, Bush I, and Clinton pushed for the significant deregulation of the domestic financial services industry. Perhaps the most important initiative in this regard was the 1999 repeal of the Glass-Steagall Act, which was signed into law by President Roosevelt in 1933 to prohibit commercial banks from engaging in investment activities on Wall Street. After all, the 1929 Crash and ensuing Great Depression had exposed the dangers of the savings and loan industry partaking in the speculative frenzy on Wall Street, which had ultimately led to the bankruptcy of many commercial banks and the loss of their customers' assets.

19 The neoliberal deregulation of US finance capital resulted in a frenzy of mergers that gave birth to huge financial-services conglomerates eager to plunge into securities ventures in areas that were not necessarily part of their underlying business. Derivatives, financial futures, credit default swaps, and other esoteric financial instruments became extremely popular when new computer-based mathematical models suggested more secure ways of managing the risk involved in buying an asset in the future at a price agreed to in the present. Relying far less on savings deposits, financial institutions borrowed from each other and sold these loans as securities, thus passing the risk on to investors in these securities. Other 'innovative' financial instruments such as 'hedge funds' leveraged with borrowed funds fuelled a variety of speculative activities. Billions of investment dollars flowed into complex 'residential mortgage-backed securities' that promised investors up to a 25 percent return on equity.

20 Assured by monetarist policies aimed at keeping interest rates low and credit flowing, investment banks eventually expanded their search for capital by buying risky 'subprime' loans from mortgage brokers who, lured by the promise of big commissions, were accepting applications for housing mortgages with little or no down payment and without credit checks. Increasingly popular in the United States, most of these loans were adjustable-rate mortgages tied to fluctuations of short-term interest rates. Investment banks snapped up these high-risk loans knowing that they could resell these assets—and thus the risk involved—by bundling them into composite securities no longer subject to government regulation. Indeed, one of the most complex of these 'innovative' instruments of securitization—so-called 'collateralized debt obligations'—often hid the problematic loans by bundling them together with lower-risk assets and reselling them to unsuspecting investors.

frenzy ['frenzi] *n.* 狂怒, 暴怒, 狂暴

merger ['mɜ: dʒə] *n.* (企业等的) 合并; 并购

conglomerates [kən'glɒm(ə)rət] *n.* 企业集团

speculative [ˌspekjələtɪv] *a.* 投机的; 推测的

vested ['vestɪd] *adj.* 既定的

toxic asset 有毒资产; 不良资产

foreclosure [fɔ:'kləʊʒə] *n.* 取消抵押品赎回权; 取消抵押品赎回权的法律手续

21 But why, given the poor quality of collateral, did individual and institutional investors continue to buy these mortgage-backed securities? One can think of three principal reasons. First, as noted above, esoteric forms of securities often concealed the degree of risk involved, and investors failed to grasp the complexity of these new investment funds. Second, investors relied on the excellent reputation of such financial giants as Bank of America or Citicorp. Third, they trusted the positive credit ratings reports issued by Standard and Poor's or Moody's, failing to see how these firms were themselves implicated in the expanding speculative bubble. Seeking to maximize their profits, these credit ratings giants had a vested interest in the growth of securities markets and thus took an extremely rosy view of the inherent risks.

22 The high yields flowing from these new securities funds attracted more and more investors around the world, thus rapidly globalizing more than US\$1 trillion worth of what came to be known as 'toxic assets'. In mid-2007, however, the financial steamroller finally ran out of fuel when seriously overvalued American real estate began to drop and foreclosures shot up dramatically. Investors finally realized the serious risks attached to the securities market and lost confidence. Consequently, the value of securitized mortgage funds fell and banks desperately, but in vain, tried to somehow eliminate the debts showing on their balance sheets.

23 Some of the largest and most venerable financial institutions, insurance companies, and government-sponsored underwriters of mortgages such as Lehman Brothers, Bear Stearns, Merrill Lynch, Goldman Sachs, AIG, Citicorp, J. P. Morgan Chase, IndyMac Bank, Morgan Stanley, Fannie Mae, and Freddie Mac—to name but a few—either declared bankruptcy or had liberal Obama administrations championed spending hundreds of billions of dollars on distressed mortgage securities in return for a government share in the businesses involved. Britain and most other industrialized countries followed suit with their own multi-billion dollar bailout packages, hoping that such massive injections of capital into ailing financial markets would help prop up financial institutions deemed 'too large to be allowed to fail'. But these generous rescue packages allowed large financial conglomerates to lose even more money without having to declare bankruptcy. The cost passed on to the world's taxpayers is truly staggering: future generations will have to repay trillions of dollars used for financing these bailout packages.

24 When reading about the GFC, huge numbers are splashed around very liberally. In spite of their similar spellings, million, billion, and trillion represent radically different orders of magnitude. Consider this hypothetical situation: If you spent US\$1 every second, you would spend US\$1 million in about twelve days. At the same rate, it would take you approximately thirty-two years to spend US\$1 billion. Taking this to the next level, US\$1 trillion would take you 31,546 years to spend!

25 However, one of the major consequences of the failing financial system was that banks trying to rebuild their capital base could hardly afford to keep lending large amounts of money. The flow of global credit froze to a trickle

venerable ['ven(ə)rəb(ə)l] *adj.* 庄严的, 值得尊敬的

underwriter ['ʌndə,raɪtə] *n.* 承保人; 核保人

ailing ['eɪlɪŋ] *adj.* 生病的; 病态的; 处境困难的, 不景气的

prop up *v.* 支撑; 支持

splash around 四处飞溅; 玩水

hypothetical [ˌhaɪpəˈθetɪk(ə)l] *adj.* 假设的; 爱猜想的

trickle ['trɪk(ə)l] *n.* 滴, 淌; 细流

profitability [ˌprɒfɪtəˈbɪləti] *n.* 盈利能力; 收益性; 收益率

lay off 解雇; 休息; 停止工作

solidify [səˈlɪdɪfaɪ] *vi.* 团结; 凝固

anaemic [əˈniːmɪk] *adj.* 贫血的, 患贫血症的; 无活力的

spawn [spɔːn] *v.* 酿成, 造成

sovereign debt 外债; 国债

escalating ['eskəleɪtɪŋ] *a.* 逐步上涨的

turmoil ['tɜːmɔɪl] *n.* 混乱, 骚动

and businesses and individuals who relied on credit found it much more difficult to obtain. This credit shortage, in turn, impacted the profitability of many businesses, forcing them to cut back production and lay off workers. Industrial output declined, unemployment shot up as the world's stock markets dropped dramatically. By 2009, 14.3 trillion dollars, or 33 percent of the value of the world's companies, was wiped out by the GFC. The developing world was especially hard hit with a financial shortfall of \$700 billion by the end of 2010.

26 As the Global Financial Crisis solidified into a global economic crisis, Group of Twenty (G20) leaders met repeatedly to devise a common strategy to combat a global depression. (see Map 3). Although most countries were slowly pulling out of what came to be known as the 'Great Recession', economic growth between 2011 and 2013 in many parts of the world remained anaemic and unemployment numbers came down only very slowly. By 2011, it also became clear that the GFC and its ensuing global recession had spawned a severe sovereign debt crisis and a banking crisis, especially in the European Union. This rapidly escalating financial turmoil affecting first Greece, then Spain, and then other countries in the Eurozone continues to threaten the fragile recovery of the global economy. We will return to the impact of various 'global crises' on the future trajectory of globalization in the final unit.

Map 3. Countries falling into recession as a result of the Global Financial Crisis, 2008

The power of transnational corporations

27 As we noted at the outset of this unit, the increasing power of transnational corporations is another principal feature of economic globalization. Transnational corporations (TNCs) are the contemporary versions of the early modern commercial enterprises we discussed in the previous unit. Powerful firms with subsidiaries in several countries, their numbers skyrocketed from 7,000 in 1970 to about 80,000 in 2012. Enterprises like General Motors, Wal-Mart, Exxon-Mobil, Mitsubishi, and Siemens belong to the 200 largest TNCs, which account for over half of the world's industrial output. None of these corporations maintains headquarters outside of North America, Mexico, Europe, China, Japan, and South Korea. This geographical concentration reflects existing asymmetrical power

trajectory [trə'dʒekt(ə)rɪ] *n.* [物] 轨道, 轨线

subsidiary [səb'sɪdɪəri] *n.* 子公司; 辅助者

asymmetrical [eɪsɪ'metrɪkl] *adj.* 非对称的; 不均匀的, 不对等的

rival ['raɪvl] *v.* 与...竞争; 比得上某人

prominent ['prɒmɪnənt] *a.* 突出的, 显著的; 杰出的

merge [mɜːdʒ] *v.* 合并; 融合

entertainment giant 娱乐巨头

gross domestic products (GDPs) 国内生产总值

corporate globalization 公司全球化

relations between the North and the South.

28 Rivalling nation-states in their economic power, these corporations control much of the world's investment capital, technology, and access to international markets. In order to maintain their prominent positions in the global marketplace, TNCs frequently merge with other corporations. Some of these recent mergers include the US\$162 billion marriage of the world's largest Internet provider, AOL, with entertainment giant Time-Warner; the purchase of Chrysler Motors by Daimler-Benz for US\$43 billion; and the US\$115 billion merger between Sprint Corporation and MCI WorldCom. In 2007, global telecommunications TNCs Nokia and Siemens merged in a deal worth approximately US\$38 million. In 2008, at the height of the GFC, Bank of America acquired Merrill Lynch for US\$50 billion. A 2009 comparison of gross domestic products (GDPs) and corporate sales reveals that forty-four of the world's hundred largest economies are corporations; fifty-six are countries. (see Figure D). Hence, it is not surprising that some critics have characterized economic globalization as 'corporate globalization' or 'globalization-from-above'.

29 TNCs have consolidated their global operations in an increasingly deregulated global labour market. The availability of cheap labour, resources, and favourable production conditions in the global South has enhanced corporate mobility and profitability. Accounting for over 70 percent of world trade, TNCs have boosted their foreign direct investments by approximately 15 percent annually. As the 2012 UNCTAD World Investment Report shows, the total foreign direct investment of the world's hundred largest TNCs in 2011 amounted to over US\$374 billion. Their ability to disperse manufacturing processes into many discrete phases carried out in many different locations around the world reflects the changing nature of global production. Such transnational production networks allow TNCs like Wal-Mart, General Motors, and Volkswagen to produce, distribute, and market their products on a global scale.

30 No doubt, the growing power of TNCs has profoundly altered the structure and functioning of the international economy. These giant firms and their global strategies have become major determinants of trade flows, the location of industries, and other economic activities around the world.

31 A ground-breaking study published in 2011 analysed the relationships between 43,060 large TNCs in terms of share ownerships linking them. The findings revealed that a relatively small core of 1,318 corporations appeared to own collectively through their shares the majority of the world's large blue chip and manufacturing firms. In fact, an even smaller number of these TNCs—147 super-connected corporations to be exact—controlled 40 percent of the total wealth in the network. Most of them were financial institutions like Barclays Bank, which topped the list. Ironically, it was this very bank that found itself at the centre of a huge scandal that rocked the financial world in July 2012 when it was revealed that Barclays and fifteen other major banks had rigged the world's most important global interest rate for years. Indeed, TNCs have become extremely important players that influence the economic, political, and social welfare of many nations. Here is

consolidate [kən'solidet] *vt.* 巩固, 使固定

availability [ə'veɪlə'bɪləti] *n.* 可用性

disperse [dɪ'spɜːs] *vt.* 分散; 使散开; 传播

discrete [dɪ'skri:t] *adj.* 离散的, 不连续的

transnational production 跨国生产

determinant [dɪ'tɜːmɪnənt] *n.* 决定因素

D. Transnational corporations versus countries: a comparison ⁴

The enhanced role of international economic institutions

32 The three international economic institutions most frequently mentioned in the context of economic globalization are the IMF, the World Bank, and the WTO. These three institutions enjoy the privileged position of making and enforcing the rules of a global economy that is sustained by significant power differentials between the global North and South. Since we will discuss the WTO in some detail in Unit 8, let us focus here on the other two institutions. As pointed out above, the IMF and the World Bank emerged from the Bretton Woods system. During the Cold War, their important function of providing loans for developing countries became connected to the West's political objective of containing communism. Starting in the 1970s, and especially after the fall of the Soviet Union, the economic agenda of the IMF and the World Bank has synchronized neoliberal interests to integrate and deregulate markets around the world.

privileged [ˈprɪvələdʒd] *a.* 享有特权的

differential [ˌdɪfəˈrenʃ(ə)l] *n.* 差别; 微分

synchronize [ˈsɪŋkrənaɪz] *vt.* 使……同步;
使……合拍

converging [kənˈvə:dʒɪŋ] *vt.* 汇聚, 整合, 收敛;
a. 会聚的

amass [əˈmæs] *vt.* 积聚, 积累

tax revenue 税收; [税收] 赋税收入

in the wake of 紧紧跟随; 随着……而来

wield [wi:ld] *vt.* 使用; 行使; 挥舞

concession [kənˈseɪʃ(ə)n] *n.* 特许(权);
让步

Nokia's role in the Finnish economy

33 Named after a small town in southwest Finland, Nokia Corporation rose from modest beginnings nearly two decades ago to become the world's largest TNC engaged in the manufacturing of mobile phones and converging Internet industries. Its products connect more than a billion people in an invisible web around the globe. Employing over 100,000 people in 120 countries, Nokia amassed a global revenue of over US\$50 billion in 2010, which translated into a profit of US\$2.5 billion. However, Nokia's gift to Finland—the distinction of being the most interconnected nation in the world—came at the price of economic dependency. Nokia is the engine of Finland's economy, representing two-thirds of the stock market's value and one-fifth of the nation's total export. It employs 22,000 Finns, not counting the estimated 20,000 domestic employees who work for companies that depend on Nokia contracts. The corporation produces a large part of Finland's tax revenue, and its US\$25 billion in annual sales almost equals the entire national budget. Yet, when Nokia's growth rate slowed in the wake of the GFC—10,000 employees were let go in 2012 and some Finnish factories shut down—company executives successfully pressured the Finnish government to reduce its corporate tax rates. Today, many Finnish citizens fear that such influence wielded by relatively few Nokia managers will translate into further tax concessions that might adversely affect the country's generous and egalitarian welfare system.

34 In return for supplying much-needed loans to developing countries, the IMF and the World Bank demand from their creditor nations the implementation of so-called 'Structural Adjustment Programs'. Unleashed on developing countries in the 1990s, this set of neoliberal policies is often referred to as the 'Washington Consensus'. It was devised and codified by John Williamson, who was an IMF adviser in the 1970s. The various sections of the programme were mainly directed at countries with large foreign debts remaining from the 1970s and 1980s. The official purpose of the document was to reform the internal economic mechanisms of debtor countries in the developing world so that they would be in a better position to repay the debts they had incurred. In practice, however, the terms of the programme spelled out a new form of colonialism. The ten points of the Washington Consensus, as defined by Williamson, required governments to implement the following structural adjustments in order to qualify for loans:

1. A guarantee of fiscal discipline, and a curb to budget deficits.
2. A reduction of public expenditure, particularly in the military and public administration.
3. Tax reform, aiming at the creation of a system with a broad base and with effective enforcement.
4. Financial liberalization, with interest rates determined by the market.
5. Competitive exchange rates, to assist export-led growth.
6. Trade liberalization, coupled with the abolition of import licensing and a reduction of tariffs.
7. Promotion of foreign direct investment.
8. Privatization of state enterprises, leading to efficient management and improved performance.
9. Deregulation of the economy.

Washington Consensus 华盛顿共识

incur [ɪn'kʊː] v. 遭受, 招致; 引致, 带来

fiscal discipline [财政] 财政纪律

budget deficit [财政] 预算赤字

public expenditure 公用事业费用; 市政开支

import licensing 进口许可

property right 产权

coincidence [kəʊ'ɪnsɪd(ə)ns] n. 巧合; 一致

development loan 开发贷款

exorbitant [ɪg'zɔːbrɪtənt] a. (要价等) 过高的; (性格等) 过分的

mandated ['mændetɪd] adj. 强制执行的, 依法的; 获得授权的

outstanding debt [会计] 未偿还的债务

blanket debt forgiveness 全面减免债务

forging ['fɔːdʒɪŋ] n. 形成; 锻造; 伪造

paradigm ['pærədaim] n. 范例; 词形变化表

sceptical ['skeptɪk(ə)l] adj. 怀疑的; 怀疑论的

flesh out 充实, 具体化

10. Protection of property rights.

35 It is no coincidence that this programme is called the ‘Washington Consensus’, for, from the outset, the United States has been the dominant power in the IMF and the World Bank. Unfortunately, however, large portions of the ‘development loans’ granted by these institutions have either been pocketed by authoritarian political leaders or have enriched local businesses and the Northern corporations they usually serve. Sometimes, exorbitant sums are spent on ill-considered construction projects. Most importantly, however, structural adjustment programmes rarely produce the desired result of ‘developing’ debtor societies, because mandated cuts in public spending translate into fewer social programmes, reduced educational opportunities, more environmental pollution, and greater poverty for the vast majority of people. Typically, the largest share of the national budget is spent on servicing outstanding debts. For example, in 2005, developing countries paid US\$355,025.5 million in debt servicing, while receiving only US\$80,534.1 million in aid. Pressured by anti-corporate globalist forces, the IMF and the World Bank were only recently willing to consider a new policy of blanket debt forgiveness in special cases. With the rise of China, however, some commentators have predicted the forging of a new ‘Beijing Consensus’ the institutional architecture of which might be quite different from the current US-dominated economic paradigm.

36 As this unit has shown, economic perspectives on globalization can hardly be discussed apart from an analysis of political process and institutions. After all, the intensification of global economic interconnections does not simply fall from the sky; rather, it is set into motion by a series of political decisions. Hence, while acknowledging the importance of economics in our story of globalization, this unit nonetheless ends with the suggestion that we ought to be sceptical of one-sided accounts that identify expanding economic activity as both the primary aspect of globalization and the engine behind its rapid development. The multidimensional nature of globalization demands that we flesh out in more detail the interaction between its political and economic aspects.

Exercises

Part 1 Dictation-- What is Global Trade?

You will hear the recording three times. While listening, fill in the blanks with the exact words that you hear.

In this day and age, global trade happens on a massive scale and 1) _____.
 _____. Global trade is simply the
 exchange of goods between countries. 2) _____.
 _____. When you have a product shipped to you from another country, that's
 importing. Global trade is part of our day-to-day life. 3) _____

_____, are products that are imported from other countries. Global trade has been happening for centuries. Even before the Egyptians built the pyramids, 4) _____.

At one point in history, Nutmeg was actually worth more than gold.

5) _____, but it also has a huge economic impact on services. For instance, the US is a global leader in 6) _____

_____ and services like royalty and licensing agreements. The US export 7) _____

_____ last year alone. Of course, a huge driver of global trade is the Internet. If you've ever had a product shipped to you from another country, then you are an importer. The web is 8) _____.

Whether your company is very large or very small, the Internet creates 9) _____.

Importing and exporting happens all the time and 10) _____.

Whether you are a business person that trades globally or just another person in line for a latte, global trade plays an important role in your life.

Part 2 Reading-based Exercises

I. Useful Chunks

Below are the Chinese equivalents of some useful chunks from paragraphs 18-27. Read the paragraphs closely and note down the English equivalents.

1. 放松监管的全球金融基础设施

2. 随之而来的全球投资涌入

3. 经济产出下降，失业率上升，工资直线下降

4. 促使全球经济衰退

5. 起源于

6. 最重要的动议

7. 把风险转移给

8. 在证券市场的发展中拥有既得利益

9. 对内在风险持极其乐观的态度

10. 未来轨迹

II. Translation

Translate the following sentences into Chinese.

1. Investment banks snapped up these high-risk loans knowing that they could resell these assets—and thus the risk involved—by bundling them into composite securities no longer subject to government regulation. (Para. 20)

2. The flow of global credit froze to a trickle and businesses and individuals who relied on credit found it much more difficult to obtain. (Para. 25)

3. This credit shortage, in turn, impacted the profitability of many businesses, forcing them to cut back production and lay off workers. (Para. 25)
4. As the Global Financial Crisis solidified into a global economic crisis, Group of Twenty leaders met repeatedly to devise a common strategy to combat a global depression. (Para. 26)
5. This rapidly escalating financial turmoil affecting first Greece, then Spain, and then other countries in the Eurozone continues to threaten the fragile recovery of the global economy. (Para. 26)

III. Essay Questions

Write a paragraph to answer one of the questions below. Start your paragraph with a topic sentence and support it with details from the text. While writing, paraphrase instead of copying the exact words from the text.

1. Globalization of the companies is an important part of economic globalization. Can you explain why it is important and how it affects the world?
2. Please briefly analyze the causes and effect of 2008 Global Financial Crisis.

Unit Four

The Political Dimension of Globalization

1 Political globalization refers to the intensification and expansion of political interrelations across the globe. These processes raise an important set of political issues pertaining to the principle of state sovereignty, the growing impact of intergovernmental organizations, and the future prospects for regional and global governance, and environmental policies affecting our planet. Obviously, these themes respond to the evolution of political arrangements beyond the framework of the nation-state, thus breaking new conceptual and institutional ground. After all, for the last few centuries, humans have organized their political differences along territorial lines that generated a sense of ‘belonging’ to a particular nation-state.

2 This artificial division of planetary social space into ‘domestic’ and ‘foreign’ spheres corresponds to people’s collective identities based on the creation of a common ‘us’ and an unfamiliar ‘them’. Thus, the modern nation-state system has rested on psychological foundations and cultural assumptions that convey a sense of existential security and historical continuity, while at the same time demanding from its citizens that they put their national loyalties to the ultimate test. Nurtured by demonizing images of the Other, people’s belief in the superiority of their own nation has supplied the mental energy required for large-scale warfare—just as the enormous productive capacities of the modern state have provided the material means necessary to fight the ‘total wars’ of the last century.

3 Contemporary manifestations of globalization have led to the partial permeation of these old territorial borders, in the process also softening hard conceptual boundaries and cultural lines of demarcation. Emphasizing these tendencies, commentators belonging to the camp of ‘hyperglobalizers’ have suggested that the period since the late 1960s has been marked by a radical ‘deterritorialization’ of politics, rule, and governance. Considering such pronouncements premature at best and erroneous at worst, ‘globalization sceptics’ have not only affirmed the continued relevance of the nation-state as the political container of modern social life but have also pointed to the emergence of regional blocs as evidence for new forms of territorialization. Some of these critics have gone so far as to suggest that globalization is actually accentuating people’s sense of nationality. As each group of global studies scholars presents different assessments of the fate of the modern nation-state, they also quarrel over the relative importance of political and economic factors.

4 Out of these disagreements there have emerged three fundamental questions that probe the extent of political globalization. First, is it

pertain [pə'teɪn] *vi.* 存在; 适用

demonize ['di:mənaɪz] *vt.* 使成为魔鬼; 使着魔

permeation [pə'mri:ʃən] *n.* 渗透; 弥漫; 扩散

demarcation [di:mɑ:'keɪʃ(ə)n]

n. (工种, 人群, 土地等的) 划分, 区分

commentator ['kɒmentətə] *n.* 评论员

premature ['premətʃʊə] *adj.* 未成熟的; 过早的

erroneous [ɪ'reʊniəs] *adj.* 错误的; 不正确的

accentuate [ək'sentʃueɪt] *vt.* 强调; 着重使突出

really true that the power of the nation-state has been curtailed by massive flows of capital, people, and technology across territorial boundaries? Second, are the primary causes of these flows to be found in politics or in economics? Third, are we witnessing the emergence of new global governance structures? Before we respond to these questions in more detail, let us briefly consider the main features of the modern nation-state system.

The modern nation-state system

5 The origins of the modern nation-state system can be traced back to 17th-century political developments in Europe. In 1648, the Peace of Westphalia concluded a series of religious wars among the main European powers following the Protestant Reformation. Based on the newly formulated principles of sovereignty and territoriality, the ensuing model of self-contained, impersonal states challenged the medieval mosaic of small polities in which political power tended to be local and personal in focus but still subordinated to a larger imperial authority. While the emergence of the Westphalian model did not eclipse the transnational character of vast imperial domains overnight, it nonetheless gradually strengthened a new conception of international law based on the principle that all states had an equal right to self-determination. Whether ruled by absolutist kings in France and Prussia or in a more democratic fashion by the constitutional monarchs and republican leaders of England and the Netherlands, these unified territorial areas constituted the foundation for modernity's secular and national system of political power. According to political scientist David Held, the Westphalian model contained the following essential points:

1. The world consists of, and is divided into, sovereign territorial states which recognize no superior authority.
2. The processes of law-making, the settlement of disputes, and law enforcement are largely in the hands of individual states.
3. International law is oriented to the establishment of minimal rules of co-existence; the creation of enduring relationships is an aim, but only to the extent that it allows state objectives to be met.
4. Responsibility for cross-border wrongful acts is a 'private matter' concerning only those affected.
5. All states are regarded as equal before the law, but legal rules do not take account of asymmetries of power.
6. Differences among states are often settled by force; the principle of effective power holds sway. Virtually no legal fetters exist to curb the resort to force; international legal standards afford only minimal protection.
7. The collective priority of all states should be to minimize the

curtail [kɜ:'teɪl] *vt.* 限制;缩短;缩减

ensuing [ɪn'sju:ɪŋ] *adj.* 接着发生的

medieval [ˌmedi'i:vəl] *adj.* 中世纪的; 原始的

mosaic [məʊ'zeɪk] *n.* 马赛克; 镶嵌画般的东西

eclipse [ɪ'klips] *vt.* 使黯然失色;使相形见绌;使失去重要性

absolutist [ˈæbsələtɪst] *n.* 绝对论者; 专制主义者

secular [ˈsekjʊlə] *adj.* 世俗的; 现世的; 非宗教的

be oriented to 面向, 朝向

take account of 考虑到; 顾及

asymmetry [eɪ'sɪmɪtri] *n.* 不对称

fetter ['feta] *n.* 束缚; 桎梏; 羁绊

impediments to state freedom. 6 The centuries following the Peace of Westphalia saw the further centralization of political power, the expansion of state administration, the development of professional diplomacy, and the successful monopolization of the means of coercion in the hands of the state. Moreover, states also provided the military means required for the expansion of commerce, which, in turn, contributed to the spread of this European form of political rule around the globe. 7 The modern nation-state system found its mature expression at the end of World War I in US President Woodrow Wilson's famous 'Fourteen Points' based on the principle of national self-determination. But his assumption that all forms of national identity should be given their territorial expression in a sovereign 'nation-state' proved to be extremely difficult to enforce in practice. Moreover, by enshrining the nation-state as the ethical and legal pinnacle of his proposed interstate system, Wilson unwittingly lent some legitimacy to those radical ethnonationalist forces that pushed the world's main powers into another war of global proportions. 8 Yet, President Wilson's commitment to the nation-state coexisted with his internationalist dream of establishing a global system of collective security under the auspices of a new international organization, the League of Nations. His idea of giving international cooperation an institutional expression was eventually realized with the founding of the United Nations in 1945. While deeply rooted in a political order based on the modern nation-state system, the UN and other fledgling intergovernmental organizations also served as catalysts for the gradual extension of political activities across national boundaries, thus undermining the principle of national sovereignty. 9 As globalization tendencies grew stronger during the 1970s, it became clear that the international society of separate states was rapidly turning into a global web of political interdependencies that challenged conventional forms of national sovereignty. In 1990, at the outset of the Gulf War, US President George H. W. Bush effectively pronounced dead the Westphalian model by announcing the birth of a 'new world order' whose leaders no longer respected the idea that cross-border wrongful acts were a matter concerning only those states affected. Did this mean that the modern nation-state system was no longer viable?	curb [kɜ:b] <i>vt.</i> 抑制; 控; 、限定; 约束 monopolization [mə,nəpəlaɪ'zeɪʃən] <i>n.</i> 独占; 垄断; 霸占 coercion [kəʊ'ɜ:(ə)n] <i>n.</i> 强迫; 胁迫 enshrine [ɪn'fraɪn] <i>vt.</i> 把(法律、权利等)奉为神圣; 把...庄严地载入 pinnacle ['pɪnək(ə)l] <i>n.</i> 顶点; 顶峰; 鼎盛时期 unwittingly [ʌn'wɪtɪŋli] <i>adv.</i> 稀里糊涂地; 茫然; 无意地 legitimacy [lɪ'dʒɪtɪməsi] <i>n.</i> 合法; 合理; 正统 ethnonationalist ['eθnəʊn'æʃnəlɪst] <i>n.</i> 种族民族主义族群 auspice ['ɔ:spɪs] <i>n.</i> 在...帮助(或支持、保护)下 fledgling ['fledʒlɪŋ] <i>adj.</i> 初出茅庐的人; 无经验的组织; 新体系 catalyst ['kætəlɪst] <i>n.</i> 催化剂; 刺激因素 sovereignty ['sɒvrənti] <i>n.</i> 主权; 主权国家 viable ['vaɪəbl] <i>adj.</i> 可实施的; 切实可行的
---	---

8. The Security Council of the United Nations in session. The Council is comprised of 15 states, five of which—the USA, the UK, France, Russia, and China—are permanent members. According to Article 25 of the UN Charter, member nations must comply with Security Council resolutions

The demise of the nation-state?

10 Hyperglobalizers respond to the above question affirmatively. At the same time, most of them consider political globalization a mere secondary phenomenon driven by more fundamental economic and technological forces. They argue that politics has been rendered almost powerless by an unstoppable techno-economic juggernaut that will crush all governmental attempts to reintroduce restrictive policies and regulations. Endowing economics with an inner logic apart from, and superior to, politics, these commentators look forward to a new phase in world history in which the main role of government will be to serve as a superconductor for global capitalism.

11 Pronouncing the rise of a ‘borderless world’, hyperglobalizers seek to convince the public that globalization inevitably involves the decline of bounded territory as a meaningful concept for understanding political and social change. Consequently, this group of commentators suggests that political power is located in global social formations and expressed through global networks rather than through territorially based states. In fact, they argue that nation-states have already lost their dominant role in the global economy. As territorial divisions are becoming increasingly irrelevant, states are even less capable of determining the direction of social life within their borders. For example, since the workings of genuinely global capital markets dwarf their ability to control exchange rates or protect their currency, nation-states have become vulnerable to the discipline imposed by economic choices made elsewhere, over which states have no practical control. Hyperglobalizers insist that the minimalist political order of the future will be determined by regional economies linked together in an almost seamless global web of production and exchange.

12 The group of globalization sceptics disagrees, highlighting instead the

demise [dɪ'maɪz] *n.* 终止；失败；倒闭

render ['rendə] *vt.* 使变得；使成为；
使处于某种状态

juggernaut ['dʒʌɡənɔ:t] *n.* 世界主
宰；强大的破坏力

endow...with 给与；赋予

dwarf [dwɔ:f] *vt.* 使显得矮小；使相形
见绌

minimalist ['mɪnɪm(ə)list] *n.* 极简主义
的

seamless ['si:mlɪs] *adj.* 无缝的；无缝
合线的；无空隙的

central role of politics in unleashing the forces of globalization, especially through the successful mobilization of political power. In their view, the rapid expansion of global economic activity can be reduced neither to a natural law of the market nor to the development of computer technology. Rather, it originated with political decisions to lift international restrictions on capital made by neoliberal governments in the 1980s and 1990s. Once those decisions were implemented, global markets and new technologies came into their own. The clear implication of this perspective is that territory still matters. Hence, globalization sceptics insist on the continued relevance of conventional political units, operating either in the form of modern nation-states or global cities.

13 The arguments of both hyperglobalizers and sceptics remain entangled in a particularly vexing version of the chicken-and-the-egg problem. After all, economic forms of interdependence are set into motion by political decisions, but these decisions are nonetheless made in particular economic contexts. As we have noted in previous units, the economic and political aspects of globalization are profoundly interconnected. There is no question that recent economic developments such as trade liberalization and deregulation have significantly constrained the set of political options open to states, particularly in the global South. For example, it has become much easier for capital to escape taxation and other national policy restrictions. Thus, global markets frequently undermine the capacity of governments to set independent national policy objectives and impose their own domestic standards. Hence, we ought to acknowledge the decline of the nation-state as a sovereign entity and the ensuing devolution of state power to regional and local governments as well as to various supranational institutions.

14 On the other hand, such a concession does not necessarily mean that nation-states have become impotent bystanders to the workings of global forces. Governments can still take measures to make their economies more or less attractive to global investors. In addition, nation-states have retained control over education, infrastructure, and, most importantly, population movements. Indeed, immigration control, together with population registration and monitoring, has often been cited as the most notable exception to the general trend toward global integration. Although only 2 percent of the world's population live outside their country of origin, immigration control has become a central issue in most advanced nations. Many governments seek to restrict population flows, particularly those originating in the poor countries of the global South. Even in the United States, annual inflows of about 1,400,000 immigrants during the 2000s only equalled the levels recorded during the first two decades of the 20th century.

15 Finally, the series of drastic national security measures that were implemented worldwide as a response to the terrorist attacks of 9/11 reflect political dynamics that run counter to the hyperglobalizers' predictions of a borderless world. Some civil rights advocates still fear

unleash [ʌn'li:ʃ] *vt.* 发泄；突然释放；使爆发

entangle [m'tæŋg(ə)l] *vt.* 使纠缠；使陷入

vexing ['veksɪŋ] *adj.* 令人烦恼的

deregulation [diː'regju'leɪʃən]
n. 撤销对（贸易，商业活动等）的管制；解除控制

trade liberalization and deregulation 贸易自由化及放松对贸易的管制

devolution [diːvə'luːʃ(ə)n] *n.* （中央政府向地方政府的）权力下放，权力转移，分权

concession [kən'seɪʃ(ə)n] *n.* 让步

impotent ['ɪmpət(ə)nt] *adj.* 无能为力的；不起作用的

retain [rɪ'teɪn] *vt.* 保持；保留

that the enormous expansion of national security measures around the world might enable states to re-impose restrictions on the freedom of movement and assembly. At the same time, however, the activities of global terrorist networks have revealed the inadequacy of conventional national security structures based on the modern nation-state system, thus forcing national governments to engage in new forms of international cooperation.

16 Overall, then, we ought to reject premature pronouncements of the impending demise of the nation-state while acknowledging its increasing difficulties in performing some of its traditional functions. Contemporary globalization has weakened some of the conventional boundaries between domestic and foreign policies while fostering the growth of supraterritorial social spaces and institutions that, in turn, unsettle traditional political arrangements. In the second decade of the 21st century, the world finds itself in a transitional phase between the modern nation-state system and postmodern forms of global governance.

Political globalization and global governance

17 Political globalization is most visible in the rise of supraterritorial institutions and associations held together by common norms and interests. In this early phase of global governance, these structures resemble an eclectic network of interrelated power centres such as municipal and provincial authorities, regional blocs, international organizations, and national and international private-sector associations.

18 On the municipal and provincial level, there has been a remarkable growth in the number of policy initiatives and transborder links between various sub-state authorities. For example, Chinese provinces and US federal states have established permanent missions and points of contact, some of which operate relatively autonomously with little oversight from their respective national governments. Various provinces and federal states in Canada, India, and Brazil are developing their own trade agendas and financial strategies to obtain loans. An example of international cooperation on the municipal level is the rise of powerful city networks like the World Association of Major Metropolises that develop cooperative ventures to deal with common local issues across national borders. 'Global Cities' like Tokyo, London, New York, and Singapore tend to be more closely connected to each other than they are to many cities in their home countries.

run counter to 与...背道而驰

assembly [ə'sembli] *n.* 集会; 集合

impending [im'pendɪŋ] *adj.* 即将发生的; 迫在眉睫的

supraterritorial [soprə,terɪ'tɔ:riəl] *adj.* 超越国界的; 超越国家的

common norms and interests 共同的准则与利益

eclectic [ɪ'klektɪk] *adj.* 不拘一格的; 兼容并蓄的

initiative [ɪ'nɪʃiətv] *n.* 倡议; 新方案

oversight ['əʊvəsaɪt] *n.* 负责; 照管

venture ['ventʃə] *n.* (尤指有风险的) 企业; 商业; 投机活动; 经营项目

E. The nation-state in a globalizing world⁵

19 On the regional level, there has been an extraordinary proliferation of multilateral organizations and agreements. Regional clubs and agencies have sprung up across the world, leading some observers to speculate that they will eventually replace nation-states as the basic unit of governance. Starting out as attempts to integrate regional economies, these regional blocs have, in some cases, already evolved into loose political federations with common institutions of governance. For example, the European Community began in 1950 with French Foreign Minister Robert Schuman's modest plan to create a supranational institution charged with regulating French and German coal and steel production. Half a century later, 15 member states have formed a close community with political institutions that create common public policies and design binding security arrangements. Following the dissolution of the Soviet Union in 1991, many of the formerly communist countries in Eastern Europe have submitted their formal accession applications to the EU.

20 On a global level, governments have formed a number of international organizations, including the UN, NATO, WTO, and OECD. Full legal membership of these organizations is open to states only, and the decision-making authority lies with representatives from national governments. The proliferation of these transnational bodies has shown that nation-states find it increasingly difficult to manage sprawling networks of social interdependence.

21 Finally, the emerging structure of global governance shaped by 'global civil society', a realm populated by thousands of voluntary, non-governmental associations of worldwide reach. International NGOs like Doctors Without Borders or Greenpeace represent millions of ordinary citizens who are prepared to challenge political and economic decisions made by nation-states and intergovernmental organizations. We will examine the 'justice-globalist' activities of some of these organizations in Unit 7.

proliferation [prəˌlɪfə'reɪʃn] *n.* 激增；增加

speculate ['spekjuleɪt] *vt.* 推测；推断

dissolution [ˌdɪsəˈluːʃn] *n.* （议会等的）解散；（契约等的）解除

submit [səb'mɪt] *v.* 提交；呈递（文件、建议）等

sprawling ['sprɔːlɪŋ] *adj.* 蔓延的；杂乱无序拓展的

global civil society 全球公民社会

⁵ Source: Jan Aart Scholte, 'The globalization of world politics', in John Baylis and Steve Smith (eds.), *The Globalization of World Politics*, 2nd edn. (Oxford University Press, 2001), p. 22

22 Some globalization researchers believe that political globalization might facilitate the emergence of democratic transnational social forces anchored in this thriving sphere of global civil society. Predicting that democratic rights will ultimately become detached from their narrow relationship to discrete territorial units, these optimistic voices anticipate the creation of a democratic global governance structure based on Western cosmopolitan ideals, international legal arrangements, and a web of expanding linkages between various governmental and non-governmental organizations. If such a promising scenario indeed will come to pass, then the final outcome of political globalization might well be the emergence of a cosmopolitan democracy that would constitute the basis for a plurality of identities flourishing within a structure of mutual toleration and accountability. According to David Held, one of the chief proponents of this view, the cosmopolitan democracy of the future would contain the following political features:

Map 4. The European Union

1. A global parliament connected to regions, states, and localities;
2. A new charter of rights and duties locked into different domains of political, social, and economic power;
3. The formal separation of political and economic interests;
4. An interconnected global legal system with mechanisms of enforcement from the local to the global.

23 A number of less optimistic commentators have challenged the idea that political globalization is moving in the direction of cosmopolitan democracy. Most criticisms boil down to the charge that such a vision indulges in an abstract idealism that fails to engage current political developments on the level of public policy. Sceptics have also expressed the suspicion that the proponents of cosmopolitanism do not consider in sufficient detail the cultural feasibility of global democracy. In other words, the worldwide intensification of cultural, political, and economic interaction makes the possibility of resistance and opposition just as real

justice-globalist 正义全球化主义者

anchor ['æŋkə] v. 使扎根; 使基于

Exercises

Part 1 Dictation -- World Politics and Globalization

You will hear the recording three times. While listening, fill in the blanks with the exact words that you hear.

Have you ever wondered how the world works? Why should the United States care about what is happening in the Middle East? Why should you care about what is happening in Europe? 1) _____
_____? This is the base of our study.

We are all connected and it's not just politics. 2) _____
_____ ; it's people in this country and
across the world. The game is called international relations and 3) _____
_____,
where one singular move may be the difference between losing a pawn or winning the game. 4) _____
_____, we must be conscious of the
singular moves countries make as it may either positively or negatively affect 5) _____
_____.
Different political theories and approaches parallel strategies affecting the outcome of a game, 6) _____

for your opponents' and teammates' decisions.

History also dictates future moves, and therefore 7) _____
_____ becomes important in understanding current alliances, ideologies, beliefs
and fears. 8) _____,
especially as you explore issues related to the politics of social issues. Can trying to fix a problem lead to a
political power struggle leading to war, or can we 9) _____
_____.

It's a game of balancing power, and when the scales are tipped, peace becomes permeable,
10) _____, the world economy falters, and war
too quickly becomes the answer. By the end of this class, you will become more familiar with the game. It's
rules and the role you play. Come on, let's get started.

Part 2 Reading-based Exercises

I. Useful Chunks

Below are the Chinese equivalents of some useful chunks from paragraphs 10 - 16. Read the paragraphs closely and note down the English equivalents.

1. 超级全球化主义者对上述问题的回答是肯定的。

2. 由更基本的经济和技术力量推动

3. 全球化不可避免地涉及到

4. 随着领土划分变得越来越无关紧要

5. 强调政治在释放全球化力量方面的核心作用

6. 全球市场和新技术就开始发挥作用

7.是紧密相连的

8. 这样的让步并不一定意味着.....

9. 继续控制着教育

10. 限制人口流动

II. Translation

Translate the following sentences into Chinese.

1. Endowing economics with an inner logic apart from, and superior to, politics, these commentators look forward to a new phase in world history in which the main role of government will be to serve as a superconductor for global capitalism. (Para. 10)
2. Consequently, this group of commentators suggests that political power is located in global social formations and expressed through global networks rather than through territorially based states. (Para. 11)
3. Hyperglobalizers insist that the minimalist political order of the future will be determined by regional economies linked together in an almost seamless global web of production and exchange. (Para.)
4. Thus, global markets frequently undermine the capacity of governments to set independent national policy objectives and impose their own domestic standards. (Para. 13)
5. At the same time, however, the activities of global terrorist networks have revealed the inadequacy of conventional national security structures based on the modern nation-state system, thus forcing national governments to engage in new forms of international cooperation. (Para. 15)

III. Essay Questions

Write a paragraph to answer one of the questions below. Start your paragraph with a topic sentence and support it with details from the text. While writing, paraphrase instead of copying the exact words from the text.

1. Why do hyperglobalizers think national borders are becoming increasingly irrelevant?
2. What role does the author think nation-states are playing on the stage of world politics?

Unit Five

The Cultural Dimension of Globalization

1 As our opening discussion of the 2010 Football World Cup has shown, even a *very short* introduction to globalization would be woefully inadequate without an examination of its cultural dimension. Cultural globalization refers to the intensification and expansion of cultural flows across the globe. Obviously, ‘culture’ is a very broad concept; it is frequently used to describe the whole of human experience. In order to avoid the ensuing problem of overgeneralization, it is important to make analytical distinctions between aspects of social life. For example, we associate the adjective ‘economic’ with the production, exchange, and consumption of commodities. If we are discussing the ‘political’, we mean practices related to the generation and distribution of power in societies. If we are talking about the ‘cultural’, we are concerned with the symbolic construction, articulation, and dissemination of meaning. Given that language, music, and images constitute the major forms of symbolic expression, they assume special significance in the sphere of culture.

2 The exploding network of cultural interconnections and interdependencies in the last decades has led some commentators to suggest that cultural practices lie at the very heart of contemporary globalization. Yet, cultural globalization did not start with the worldwide dissemination of rock ‘n’ roll, Coca-Cola, or football. As noted in Unit 2, expansive civilizational exchanges are much older than modernity. Still, the volume and extent of cultural transmissions in the contemporary period have far exceeded those of earlier eras. Facilitated by the Internet and our proliferating mobile digital devices, the dominant symbolic systems of meaning of our age—such as individualism, consumerism, and various religious discourses—circulate more freely and widely than ever before. As images and ideas can be more easily and rapidly transmitted from one place to another, they profoundly impact the way people experience their everyday lives. Today, cultural practices have escaped fixed localities such as town and nation, eventually acquiring new meanings in interaction with dominant global themes.

3 The thematic landscape traversed by scholars of cultural globalization is vast and the questions they raise are too numerous to be fleshed out in this short introduction. Rather than offering a long laundry list of relevant topics, this unit will focus on three important themes: the tension between sameness and difference in the emerging global culture; the crucial role of transnational media corporations in disseminating popular culture; and the globalization of languages.

Global culture: sameness or difference?

4 Does globalization make people around the world more alike or more different? This is the question most frequently raised in discussions on the subject of cultural globalization. A group of commentators we might call ‘pessimistic’ hyperglobalizers argue in favour of the former. They suggest that we are not

woefully [ˈwəʊfəli] *ad.* 忧愁地, 可怜地

woefully inadequate 远远不够

dissemination [diˌsemɪˈneɪʃn] *n.*
宣传, 散播

assume special significance
承载特殊的意义

the sphere of culture 文化领域

pessimistic hyperglobalizers
悲观的过度全球化论者

moving towards a cultural rainbow that reflects the diversity of the world's existing cultures. Rather, we are witnessing the rise of an increasingly homogenized popular culture underwritten by a Western 'culture industry' based in New York, Hollywood, London, and Milan. As evidence for their interpretation, these commentators point to Amazonian Indians wearing Nike training shoes; denizens of the Southern Sahara purchasing Yankees baseball caps; and Palestinian youths proudly displaying their Chicago Bulls sweatshirts in downtown Ramallah. Referring to the diffusion of Anglo-American values and consumer goods as the 'Americanization of the world', the proponents of this cultural homogenization thesis argue that Western norms and lifestyles are overwhelming more vulnerable cultures. Although there have been serious attempts by some countries to resist these forces of 'cultural imperialism'—for example, a ban on satellite dishes in Iran, and the French imposition of tariffs and quotas on imported film and television—the spread of American popular culture seems to be unstoppable.

5 But these manifestations of sameness are also evident inside the dominant countries of the global North. American sociologist George Ritzer coined the term 'McDonaldization' to describe the wide-ranging sociocultural processes by which the principles of the fast-food restaurant are coming to dominate more and more sectors of American society as well as the rest of the world. On the surface, these principles appear to be rational in their attempts to offer efficient and predictable ways of serving people's needs. However, looking behind the façade of repetitive TV commercials that claim to 'love to see you smile', we can identify a number of serious problems. For one, the generally low nutritional value of fast-food meals—and particularly their high fat content—has been implicated in the rise of serious health problems such as heart disease, diabetes, cancer, and juvenile obesity. Moreover, the impersonal, routine operations of 'rational' fast-service establishments actually undermine expressions of forms of cultural diversity. In the long run, the McDonaldization of the world amounts to the imposition of uniform standards that eclipse human creativity and dehumanize social relations (see Figure G).

6 One particular thoughtful analyst in this group of pessimistic hyperglobalizers is American political theorist Benjamin Barber. In his popular book *Consumed* (2007), he warns his readers against an 'ethos of infantilization' that sustains global capitalism, turning adults into children through dumbed down advertising and consumer goods while also targeting children as consumers. This ethos is premised on the recognition that there is not an endless market for consumerist goods as was once thought. Global inequality contributes to stifling the growth of markets and of capitalism. In order to expand markets and make a profit, global capitalists are developing homogenous global products targeting the young and wealthy throughout the world, as well as turning children into consumers. Thus, global consumerism becomes increasingly soulless and unethical in its pursuit of profit.

7 Optimistic hyperglobalizers agree with their pessimistic colleagues that cultural globalization generates more sameness, but they consider this outcome to be a good thing. For example, American social theorist Francis Fukuyama explicitly welcomes the global spread of Anglo-American values and lifestyles, equating

homogenize [hə'mɒdʒənaɪz] vt. 使类同

denizen ['dentɪz(ə)n] n. 居民

manifestation [ˌmænfɛ'steɪʃ(ə)n]

n. 表现, 显示

coin [kɔɪn] v. 杜撰, 创造 (新词, 短语)

facade [fə'sɑ:d] n. 正面; 表面; 外观

juvenile obesity
[ˈdʒu:vənəl ə(ʊ)'bi:stɪtɪ] 青少年肥胖

eclipse [ɪ'klɪps] v. 遮住……的光;
(使)黯然失色

dehumanize [di'hju:mənəɪz] vt. 使失掉人性

analyst ['ænəlist] n. 分析者

an ethos of infantilization 幼儿化的社会思潮

be premised on 以……为前提
premise ['premis] vt. 以……为前提

stifle ['stɪfl(ə)] vt. 扼杀

homogenous [hə'mɒdʒɪnəs] adj. [生物] 同类的, 同源的

equate [ɪ'kweɪt] v. 使相等; 视为平等

the Americanization of the world with the expansion of democracy and free markets (see Illustration 9). But optimistic hyperglobalizers do not just come in the form of American chauvinists who apply the old theme of manifest destiny to the global arena. Some representatives of this camp consider themselves staunch cosmopolitans who celebrate the Internet as the harbinger of a homogenized 'techno-culture'. Others are free-market enthusiasts who embrace the values of global consumer capitalism.

8 It is one thing to acknowledge the existence of powerful homogenizing tendencies in the world, but it is quite another to assert that the cultural diversity existing on our planet is destined to vanish. In fact, several influential commentators offer a contrary assessment that links globalization to new forms of cultural expression. Sociologist Roland Robertson, for example, contends that global cultural flows often reinvigorate local cultural niches. Hence, rather than being totally obliterated by the Western consumerist forces of sameness, local difference and particularity still play an important role in creating unique cultural constellations. Arguing that cultural globalization always takes place in local contexts, Robertson rejects the cultural homogenization thesis and speaks instead of glocalization—a complex interaction of the global and local characterized by cultural borrowing. The resulting expressions of cultural 'hybridity' cannot be reduced to clear-cut manifestations of 'sameness' or 'difference'. As we noted in our discussion of Shakira and *Waka Waka* in Unit 1, such processes of hybridization have become most visible in fashion, music, dance, film, food, and language.

Average time Americans spend watching TV per week	34 hours
Average time Americans spend socializing per week	5 hours
Percentage of advertizing content that makes up one hour of prime time TV	36%
Number of advertisements, logos and labels seen by the average American every day	16,000
Percentage of Americans who regularly watch TV while eating dinner	66%
Percentage of adult Americans who are obese	35.7%
The percentage of the average American's daily vegetable intake that is made up of French fries	25%
Average annual intake of meat in the USA (vs. India)	100kg (5kg)
Average number of cows in a single fast-food hamburger patty	55–1,082
Average number of hamburgers eaten per week	3
Carbon dioxide produced to make one hamburger	3.6–6.1 kg CO ₂

chauvinist ['ʃəʊv(ɪ)nɪst] *n.* 盲目的爱国者; 沙文主义者

staunch [stɔːn(t)] *adj.* 坚定的

harbinger ['hɑːbɪndʒə] *n.* 先驱

reinvigorate [ˌriːɪnˈvɪɡəreɪt] *vt.* 使再振作, 使复兴

niches [niːʃ] *n.* 小生态环境

obliterate [əˈblɪtəreɪt] *vt.* 抹杀

constellation [ˌkɒnstəˈleɪ(ə)n] *n.* 星座, 荟萃

prime time 黄金时段

intake ['ɪnteɪk] *n.* 摄入

hamburger patty 汉堡肉饼

Carbon dioxide produced by the USA's hamburger consumption annually (more than Hungary's national CO ₂ output)	65,250,000 metric tons CO ₂	
The number of other countries that contribute ingredients to the average American meal	5	carbon dioxide 二氧化碳
The number of cars registered in the USA (2010)	250,272,812	metric ton 公吨
Amount of rubbish produced by Americans in 2010	226 million tonnes	
Total mass of living humans on Earth	287 million tonnes	
Percentage of Americans who believe that God created humans in their present form less than 10,000 years ago	46%	tonne [tʌn] <i>n.</i> 吨; 公吨
G. The American way of life ⁷		
9 But the respective arguments of hyperglobalizers and sceptics are not necessarily incompatible. The contemporary experience of living and acting across cultural borders means both the loss of traditional meanings and the creation of new symbolic expressions. Reconstructed feelings of belonging coexist in uneasy tension with a sense of placelessness. Indeed, some commentators have argued that modernity is slowly giving way to a new 'postmodern' framework characterized by a less stable sense of identity and knowledge.		respective [rɪ'spektɪv] <i>adj.</i> 分别的, 各自的 incompatible [ˌɪnkəm'pætəbl] <i>adj.</i> 不相容的; 不协调; 不一致 placelessness ['pleɪslɪsnɪs] <i>n.</i> 漂泊感
10 Given the complexity of global cultural flows, one would actually expect to see uneven and contradictory effects. In certain contexts, these flows might change traditional manifestations of national identity in the direction of a popular culture characterized by sameness; in others they might foster new expressions of cultural particularism; in still others they might encourage forms of cultural 'hybridity'. Those commentators who summarily denounce the homogenizing effects of Americanization must not forget that hardly any society in the world today possesses an 'authentic', self-contained culture. Those who despair at the flourishing of cultural hybridity ought to listen to exciting Bollywood pop songs, admire the intricacy of several variations of Hawaiian pidgin, or enjoy the culinary delights of Cuban-Chinese cuisine. Finally, those who applaud the spread of consumerist capitalism need to pay attention to its negative consequences, such as the dramatic decline of		pidgin ['pɪdʒɪn] <i>n.</i> 洋泾浜语; 混杂语言 culinary [ˌkʌlɪn(ə)rɪ] <i>adj.</i> 烹饪的; 食物的 communal [kə'mjuːnəl] <i>adj.</i> 公共的 commodification [kəˌmɒdɪfɪ'keɪʃən]

The role of the media

11 To a large extent, the global cultural flows of our time are generated and directed by global media empires that rely on powerful communication technologies to spread their message. Saturating global cultural reality with formulaic TV shows and mindless advertisements, these corporations increasingly shape people's identities and the structure of desires around the world. The rise of the global imaginary is inextricably connected to the rise of the global media. During the last two decades, a small group of very large TNCs have come to dominate the global market for entertainment, news, television, and film. In 2006, only eight media conglomerates—Yahoo, Google, AOL/Time Warner, Microsoft, Viacom, General Electric, Disney, and News Corporation—accounted for more than two-thirds of the US\$250–275 billion in annual worldwide revenues generated by the communications industry. In the first half of that year, the volume of merger deals in global media, Internet, and telecommunications totalled US\$300 billion, three times the figure for the first six months of 1999.

12 As recently as fifteen years ago, not one of the giant corporations that dominate what Benjamin Barber has appropriately called the 'infotainment telesector' existed in its present form as a media company. In 2001, nearly all of these corporations ranked among the largest 300 non-financial firms in the world. Today, most media analysts concede that the emergence of a global commercial-media market amounts to the creation of a global oligopoly similar to that of the oil and automotive industries in the early part of the 20th century. The crucial cultural innovators of earlier decades—small, independent record labels, radio stations, movie theatres, newspapers, and book publishers—have become virtually extinct as they found themselves incapable of competing with the media giants.

13 The commercial values disseminated by transnational media enterprises secure not only the undisputed cultural hegemony of popular culture, but also lead to the depoliticization of social reality and the weakening of civic bonds. One of the most glaring developments of the last two decades has been the transformation of news broadcasts and educational programmes into shallow entertainment shows—many of them ironically touted as 'reality' shows. Given that news is less than half as profitable as entertainment, media firms are increasingly tempted to pursue higher profits by ignoring journalism's much vaunted separation of newsroom practices and

business decisions. Partnerships and alliances between news and entertainment companies are fast becoming the norm, making it more common for publishing executives to press journalists to cooperate with their newspapers' business operations. A sustained attack on the professional autonomy of journalism is, therefore, also part of cultural globalization. The globalization of languages 14 One direct method of measuring and evaluating cultural changes brought about by globalization is to study the shifting global patterns of language use. The globalization of languages can be viewed as a process by which some languages are increasingly used in international communication while others lose their prominence and even disappear for lack of speakers. Researchers at the Globalization Research Center at the University of Hawai'i have identified five key variables that influence the globalization of languages: 1. Number of languages: The declining number of languages in different parts of the world points to the strengthening of homogenizing cultural forces. 2. Movements of people: People carry their languages with them when they migrate and travel. Migration patterns affect the spread of languages. 3. Foreign language learning and tourism: Foreign language learning and tourism facilitate the spread of languages beyond national or cultural boundaries. 4. Internet languages: The Internet has become a global medium for instant communication and quick access to information. Language use on the Internet is a key factor in the analysis of the dominance and variety of languages in international communication. 5. International scientific publications: International scientific publications contain the languages of global intellectual discourse, thus critically impacting intellectual communities involved in the production, reproduction, and circulation of knowledge around the world. 15 Given these highly complex interactions, research in this area frequently yields contradictory conclusions. The figure above represents only one possible conceptualization of the meaning and effects of language globalization. Unable to reach a general agreement, experts in the field have developed several different hypotheses. One model posits a clear correlation between the growing global significance of a few languages— particularly English, Chinese, and Spanish—and the declining number of other languages around the world. Another model suggests that the globalization of language does not necessarily mean that our descendants are destined to utilize only a few tongues. Still another thesis emphasizes the power of the Anglo-American culture industry to make English—or what some commentators call 'Globish'—the global lingua franca of the 21st century.	much vaunted 大肆吹嘘的 sustained [səˈsteɪnd] <i>adj.</i> 持续的; 持久的 autonomy [ɔːˈtɒnəmi] <i>n.</i> 自治, 自治权 prominence [ˈprɒmɪnəns] <i>n.</i> 重要 quick access to 快速获取(信息) intellectual discourse 知识分子话语 intellectual communities 学术界 conceptualization [kənˌseptʃʊəliˈzeɪʃən] <i>n.</i> 概念化 hypothesis [haɪˈpɒθɪsɪs] <i>n.</i> 假说; 假设 develop several different hypotheses 提出几种不同的假说 descendant [dɪˈsend(ə)nt] <i>n.</i> 子孙后代 destined [ˈdestɪnd] <i>adj.</i> 注定的; 命定的 Anglo-American culture industry 英美文化产业 lingua [ˈlɪŋgwə] franca [ˈfraːŋkaː] (母
---	---

16 To be sure, the rising significance of the English language has a long history, reaching back to the birth of British colonialism in the late 16th century. At that time, only approximately seven million people used English as their mother tongue. By the 1990s, this number had swollen to over 350 million native speakers, with 400 million more using English as a second language. Today, more than 80 percent of the content posted on the Internet is in English. Almost half of the world's growing population of foreign students is enrolled at institutions in Anglo-American countries.

Continents	Early 16 th Century (no./%)	Early 17 th Century (no./%)	Early 18 th Century (no./%)	Early 19 th Century (no./%)	Early 20 th Century (no./%)	Late 20 th Century (no./%)
Americas	2,175/15	2,025/15	1,800/15	1,500/15	1,125/15	1,005/15

World	14,500/100	13,500/100	12,000/100	10,000/100	7,500/100	6,703/100

G. The declining number of languages around the world, 1500–2000⁸

17 At the same time, however, the number of spoken languages in the world has dropped from about 14,500 in 1500 to less than 6,500 in 2012 (see Figure H). Given the current rate of decline, some linguists predict that 50–90 percent of the currently existing languages will have disappeared by the end of the 21st century. But the world's languages are not the only entities threatened with extinction. The spread of consumerist values and materialist lifestyles has endangered the ecological health of our planet as well.

Exercises

Part 1 Dictation -- Globalization in Music Industry

You will hear the recording three times. While listening, fill in the blanks with the exact words that you hear.

Our world is moving faster than ever before. Advances in technology have created an environment that 1) _____. The ability to connect, converse and collaborate on an international scale 2) _____. Globalization redefines and rekindles our desire to create and to explore what lies beyond our field of view.

Nearly every industry 3) _____. Take for example, the music industry. Over the last decade the ways in which we write, record and distribute music have evolved. Thanks to technological advances, 4) _____.

Some people may argue that today's world is smaller. 5) _____ puts millions of people in touch with anything we say. If it happens to strike the right chord, 6) _____. Others believe that our world is bigger, 7) _____. Both sides have valid arguments but there is one truth that remains constant. 8) _____.

People are closer than ever. No matter how far apart, 9) _____, and with the single word, bonds can be broken or mended. No matter how you look at it, 10) _____, making the need for a smooth global workflow more prominent than ever before.

Part 2 Reading-based Exercises

I. Useful Chunks

Below are the Chinese equivalents of some useful chunks from paragraphs 4 - 10. Read the paragraphs closely and note down the English equivalents.

1. 我们可以发现好多严重问题
2. 使人类丧失创造力，社会关系毫无人情味。
3. 全球不平等会扼杀市场和资本主义的增长。
4. 在追求利润的过程中变得越来越冷漠无情和毫无道德
5. 认同全球消费资本主义的价值观
6. 世界上存在强烈的同质化倾向
7. 重振地方文化特色
8. 并非不可兼容
9. 身份认同感较不稳定
10. 世界文化流动的复杂性

II. Translation

Translate the following sentences into Chinese.

- 1 . American sociologist George Ritzer coined the term ‘McDonaldization’ to describe the wide-ranging sociocultural processes by which the principles of the fast-food restaurant are coming to dominate more and more sectors of American society as well as the rest of the world. (Para. 5)
- 2 . In the long run, the McDonaldization of the world amounts to the imposition of uniform standards that eclipse human creativity and dehumanize social relations. (Para. 5)
- 3 . In his popular book *Consumed* (2007), he warns his readers against an ‘ethos of infantilization’ that sustains global capitalism, turning adults into children through dumbed down advertising and consumer goods while also targeting children as consumers. (Para. 6)
- 4 . Hence, rather than being totally obliterated by the Western consumerist forces of sameness, local difference and particularity still play an important role in creating unique cultural constellations. (Para. 8)
- 5 . In certain contexts, these flows might change traditional manifestations of national identity in the direction of a popular culture characterized by sameness; in others they might foster new expressions of cultural particularism; in still others they might encourage forms of cultural ‘hybridity’. (Para. 10)

III. Essay Questions

Write a paragraph to answer one of the questions below. Start your paragraph with a topic sentence and support it with details from the text. While writing, paraphrase instead of copying the exact words from the text.

1. What’s the attitude of the "pessimistic hyperglobalizers” towards cultural globalization? Give examples mentioned in the textbook to support their point.
2. How does global language use change with the progress of globalization?

Unit Six

The Ecological Dimension of Globalization

1 Although we have examined the economic, political, and cultural aspects of globalization separately, it is important to emphasize that each of these dimensions impacts on and has consequences for the other domains. 2 Nowhere is this more clearly demonstrated than in the ecological dimensions of globalization. In recent years, global environmental issues such as global climate change and transboundary pollution have received enormous attention from research institutes, the media, politicians, and economists. Indeed, the ecological effects of globalization are increasingly recognized as the most significant and potentially life threatening for the world as we have inherited it from our ancestors. The worldwide impact of natural and man-made disasters such as the horrifying nuclear plant accidents at Chernobyl, Ukraine (1986), and Fukushima, Japan (2011), clearly shows that the formidable ecological problems of our time can only be tackled by a global alliance of states and civil society actors. 3 In addition to economic and political factors, cultural values greatly influence how people view their natural environment. For example, cultures steeped in Taoist, Buddhist, and various animist religions tend to emphasize the interdependence of all living beings—a perspective that calls for a delicate balance between human wants and ecological needs. Judeo-Christian humanism, on the other hand, contains deeply dualistic values that put humans in control of nature. In Western modernity, the environment has thus come to be considered as a ‘resource’ to be used instrumentally to fulfil human needs and wants. The most extreme manifestation of this ‘anthropocentric’ paradigm is reflected in the dominant values and beliefs of consumerism. As pointed out previously, the capitalist culture industry seeks to convince its global audience that the meaning and chief value of life can be found in the limitless accumulation of material goods. 4 In the 21st century, however, it has become virtually impossible to ignore the fact that people everywhere on our planet are inextricably linked to each other through the air they breathe, the climate they depend upon, the food they eat, and the water they drink. In spite of this obvious lesson of interdependence, our planet’s ecosystems are subjected to continuous human assault in order to maintain wasteful lifestyles. Granted, some of the major ecological challenges the world faces today are problems that afflicted civilizations even in ancient times. But until the coming of the Industrial Revolution, environmental degradation was relatively localized and occurred slowly over many centuries. 5 In the last few decades, however, the scale, speed, and depth of Earth’s environmental decline have been unprecedented. Let us briefly consider	inherit [ɪnˈherɪt] <i>vt.</i> 继承; 遗传而得 formidable [ˈfɔːmɪdəb(ə)l] <i>adj.</i> 可怕的 tackle [ˈtæk(ə)l] <i>vt.</i> 应付, 处理 (难题或局面) alliance [əˈlaɪəns] <i>n.</i> 联盟, 联合; 联姻 steep [sti:p] <i>vt.</i> 泡; 浸; 使…充满 animist religion 万物有灵论宗教 Judeo-Christian humanism 犹太教和基督教人文主义 dualistic values 二元价值观 anthropocentric [ænθrəpəˈsentrɪk] <i>adj.</i> 以人类为中心的 paradigm [ˈpærədɒlm] <i>n.</i> 范例; 典范 be subjected to continuous human assault 遭受持续不断的人类侵犯 granted [ˈgrɑːntɪd] <i>conj.</i> 诚然; <i>adv.</i> 的确 afflict [əˈflɪkt] <i>vt.</i> 折磨; 使痛苦 environmental degradation 环境恶化 unprecedented [ˌʌnˈpresɪdɪntɪd] <i>adj.</i> 空前的; 无前例的
---	---

some of the most dangerous manifestations of the globalization of environmental degradation.

6 Two major concerns relate to uncontrolled population growth and lavish consumption patterns in the global North. Since farming economies first came into existence about 480 generations ago, the global population has exploded a thousand-fold to reach seven billion in 2012. Half of this increase has occurred in the last thirty years. With the possible exception of some rodent species, humans are now the most numerous mammals on earth. Vastly increased demands for food, timber, and fibre have put severe pressure on the planet's ecosystems.

7 Large areas of the Earth's surface, especially in arid and semi-arid regions, have been used for agricultural production for millennia, yielding crops for ever-increasing numbers of people. Concerns about the relationship between population growth and environmental degradation are frequently focused rather narrowly on aggregate population levels. Yet, the global impact of humans on the environment is as much a function of per capita consumption as it is of overall population size (see Figure I). For example, the United States comprises only 6 percent of the world's population, but it consumes 30–40 percent of our planet's natural resources. Together, regional overconsumption and uncontrolled population growth present a serious problem to the health of our planet. Unless we are willing to change the underlying cultural and religious value structure that sustains these ominous dynamics, the health of Mother Earth is likely to deteriorate further.

8 Some of the effects of overconsumption and population growth are painfully obvious in the current food crisis plaguing vast regions of our planet. Large-scale food riots in Haiti, Indonesia, the Philippines, and Cameroon in the last few years highlight increasing limitations on access to food in part as a result of environmental problems such as drought. Other factors include rising oil prices (which affect the cost of transportation of food), diversion of food staples such as corn into production of biofuels in efforts to reduce reliance on oil, and unequal access to resources across developed and developing countries. The current food crisis highlights the interconnections between political, economic, and ecological problems that are accentuated by the process of globalization.

9 Another significant ecological problem associated with population increases and the globalization of environmental degradation is the worldwide reduction of biodiversity. Seven out of ten biologists today believe that the world is now in the midst of the fastest mass extinction of living species in the 4.5-billion-year history of the planet. According to recent Organisation for Economic Co-operation and Development (OECD) reports, two-thirds of the world's farmlands have been rated as 'somewhat degraded' and one-third have been marked as 'strongly degraded'. Half the world's wetlands have already been destroyed, and the biodiversity of freshwater ecosystems is under serious threat. Three-quarters of worldwide genetic diversity in agricultural crop and animal

lavish consumption patterns 奢侈的消费模式

a thousand-fold 千倍

rodent ['rəʊd(ə)nt] *adj.* 啮齿目的

breeds has been lost since 1900. Some experts fear that up to 50 percent of all plant and animal species—most of them in the global South—will disappear by the end of this century. Hence, many environmentalists have argued that biodiversity should be treated as a planetary asset and held in trust for the benefit of future generations.

	Annual oil consumption per capita (in litres)	Automobiles per 1000 people	Annual meat consumption per capita (in kg)	Annual withdrawal of fresh water per capita (in cubic metres)
USA	3,504	808	123	1,518

I. Annual consumption patterns (per capita) in selected countries, 2010–12⁹

10 Some of the measures currently undertaken to safeguard biodiversity include the creation of hundreds of ‘gene banks’ located in over a hundred countries around the world. One of the most spectacular of these banks is the Svalbard Global Seed Vault buried in permafrost in a mountain on the Arctic island of Spitzbergen. Officially opened in 2008, this ‘Doomsday Vault’ was funded by The Global Crop Diversity Trust (financed by international donors like the Gates and Rockefeller Foundations) and specially designed to store back-up copies of the seeds of the world’s major food crops at minus 18 degrees Celsius. Operating like a safety deposit box in a bank, the Global Seed Vault is free of charge to public and private depositors and kept safe by the Norwegian government. But it is doubtful that such laudable ‘back-up’ measures are sufficient to reverse the escalating loss of biodiversity brought about by humanity’s ecological footprint.

11 Transboundary pollution represents another grave danger to our collective survival. The release of vast amounts of synthetic chemicals into the air and water has created conditions for human and animal life that are outside previous limits of biological experience. For example, chlorofluorocarbons have been used in the second half of the 20th century as nonflammable refrigerants, industrial solvents, foaming agents, and aerosol propellants. In the mid-1970s, researchers noted that the unregulated release of CFCs into the air seemed to be depleting Earth’s protective ozone layer. A decade later, the discovery of large ‘ozone holes’ over Tasmania, New Zealand, and large parts of the Antarctic finally resulted in a coordinated international effort to phase out production of CFCs and other ozone-depleting substances. In 2012, scientists warned that the risk of damage to the world’s ozone layer has

increased as a result of more frequent and severe storms as a result of global climate change. Other forms of transboundary pollution include industrial emissions of sulphur and nitrogen oxides. Returning to the ground in the form of 'acid rain', these chemicals damage forests, soils, and freshwater ecosystems. Current acid deposits in Northern Europe and parts of North America are at least twice as high as the critical level suggested by environmental agencies.

12 Finally, the issue of human-induced climate change has emerged as a major focus of domestic and intergovernmental policy as well as grass roots activism. Brought to public attention by former US Vice President Al Gore in the 2000s through his award-winning documentary, *An Inconvenient Truth*, as well as the production of numerous scientific reports outlining the dire consequences of unchecked global warming, climate change is clearly one of the top three 'global problems' facing humanity today. The consequences of worldwide climate change, especially global warming, could be catastrophic. A large number of scientists worldwide are calling for concerted action by governments to curb greenhouse gas emissions.

13 Indeed, global warming represents a grim example of the decisive shift in both the intensity and extent of contemporary environmental problems. The rapid build-up of gas emissions, including carbon dioxide, methane, nitrous and sulphur oxides, and chlorofluorocarbons in our planet's atmosphere has greatly enhanced Earth's capacity to trap heat. The resulting 'greenhouse effect' is responsible for raising average temperatures worldwide (see Illustration 10).

14 The precise effects of global warming are difficult to calculate. In 2006, Sir Nicholas Stern, former chief economist for the World Bank, released a comprehensive and alarming report on the economic and ecological impacts of climate change. The 'Stern Report', commissioned by the UK government, asserts that average global temperatures have already risen by 0.5 degrees Celsius based on pre-industrialization temperatures. Based on current trends, average global temperatures will rise by an additional 2 to 3 degrees Celsius over the next fifty years. In the next century, they might rise another 3 degrees Celsius. In some parts of Africa, average temperatures have already risen by more than 3 degrees Celsius in the last twenty years.

deplete [dɪ'pli:t] vt. 耗尽; 使空竭

curb [kɜ:b] vt. 控制; 抑制

grim [grɪm] adj. 糟糕的; 残忍的

methane ['mi:θeɪn] n. [有化] 甲烷

nitrous and sulphur oxides [无化] 一氧化二氮和硫化物

greenhouse effect 温室效应

commission [kə'mɪʃ(ə)n] vt. 委任; 委托制作

assert [ə'sɜ:t] vt. 维护, 坚持; 断言; 主张; 声称

10. The greenhouse effect

15 These significant increases in global temperatures have been leading to meltdowns of large chunks of the world's major ice reserves. The North Polar ice cap, for example, has lost 15–20 percent of its mass every decade since 1980 and might vanish by 2015. The complete melting of the large Greenland ice sheet would result in a global rise of sea levels of 22 feet. However, even a much smaller sea level rise would spell doom for many coastal regions around the world. The small Pacific island nations of Tuvalu and Kiribati, for example, would disappear. Large coastal cities such as Tokyo, New York, London, and Sydney would lose significant chunks of their urban landscapes.

16 But sea level and water temperature rise as a result of global warming are not the only serious problems threatening the health of our planet's oceans. Overfishing, the loss of coral reefs, coastal pollution, acidification, mega-oil spills such as the one following the 2010 BP oil rig explosion in the Gulf of Mexico, and illegal dumping of hazardous wastes have had a devastating impact on Earth's marine environments (see Figure J).

17 Consider, for example, the 'Great Pacific Garbage Patch'—a gigantic floating mass of often toxic, non-biodegradable plastics and chemical sludge twice the size of Texas that circulates permanently in the powerful currents of the Northern Pacific Ocean. Or, perhaps even more horrifying, take the huge floating debris field generated by the devastating Japanese earthquake and tsunami of March 2011 that killed more than 15,000 people across Japan. The disaster caused the partial destruction of the Fukushima Daiichi nuclear plant, in the process allowing the escape of harmful radioactive particles into air and water. Stretching for nearly 2,000 miles and still containing 1.5 million tons of detritus (3.5 million tons have already sunk), this debris field crossed the Pacific in only fifteen months. It deposited on North America's Pacific coast massive amounts of partially toxic materials such as wall insulation, oil and gas canisters, car tires, fishing nets, and Styrofoam buoys. Heavier items are drifting underwater and might wash up in years to come. Experts fear that some of these

detritus [dɪˈtrɪtəs] *n.* 碎石

insulation [ˌɪnsjuˈleɪʃ(ə)n] *n.* 绝缘; 隔离

materials might exceed safe levels of radioactivity. Various computer models show that the debris field will circle back to Hawai'i, and possibly Japan, between 2013 and 2015, only to start anew its ominous journey toward the Pacific shores of North America.

18 The central feature of all these potentially disastrous environmental problems is that they are 'global', thus making them serious problems for all sentient beings inhabiting our magnificent blue planet. Indeed, transboundary pollution, global warming, climate change, and species extinction are challenges that cannot be contained within national or even regional borders. They do not have isolated causes and effects for they are caused by aggregate collective human actions and thus require a coordinated global response.

J. Major manifestations and consequences of global environmental degradation¹⁰

19 To be sure, ecological problems aggravated by globalization also have significant economic ramifications. Although these effects will be more significant for less developed countries than for rich countries, they will nonetheless affect all people and all nations. Poor countries do not have the necessary infrastructure or income to adapt to the unavoidable climate changes that will occur because of carbon emissions already in the earth's atmosphere. As we noted above, developing regions are already warmer on average than most developed countries and consequently suffer from a high degree of variability in rainfall. To make matters worse, less developed countries are also heavily dependent on agriculture for the majority of their income. Since agriculture is the most climate sensitive of all economic sectors, developing nations will be more adversely affected by climate change than developed countries.

20 Further consequences of this vicious circle include increased illnesses, escalating death rates, and crumbling infrastructure. The cost of living will continue to rise, leaving poor households and communities unable to save for future emergencies. Recent scientific reviews like the Stern Report explicitly link the problem of climate change to

gas canister 储气罐

Styrofoam buoy 聚苯乙烯泡沫浮标

anew [ə'nju:] adv. 重新; 再

sentient ['sentient] adj. 有感情的; 有感觉力的; 意识到的

vicious circle 恶性循环

¹⁰ Source: Author

development and aid provision in poor countries. They will require assistance from the developed world if they are to adapt and survive climate change. Thus, climate change and global warming are not merely environmental or scientific issues. They are economic, political, cultural but above all ethical issues that have been expanded and intensified by the process of globalization. 21 There has been much debate in public and academic circles about the severity of climate change and the best ways for the global community to respond to it. As can be gleaned from the list of major global environmental treaties provided below, international discussion on the issue of global warming and environmental degradation has been occurring for over thirty years. Yet, while much has been written and spoken about this issue, few coordinated measures have been implemented. Most international environmental treaties still lack effective enforcement mechanisms. 22 For the most part, political will in favour of immediate change has been weak and limited. However, the most significant obstacles to the creation and implementation of an effective global environmental agreement has come from the unwillingness of the United States and Australia—the world's two largest polluter—to ratify key agreements. Both nations see measures to reduce carbon emissions and thereby slow global warming as threats to their economic growth. Yet inaction on climate change today will have more dire consequences for economic growth tomorrow. (see Figures K and L). 23 Still, there are some grounds for guarded optimism. For example, significant agreement exists that certain limitations on carbon emissions must be placed on all nations. Some rich countries in the EU and Australia managed to impose a national carbon tax on emitters. But poor countries argue that they should not be bound by the same carbon measures or trading schemes as developed countries. They make this argument for two reasons. Firstly, they need to build up their industries and infrastructures in order to pull themselves out of poverty. Placing significant carbon emissions restrictions on their industries would seriously impede their economic development. Secondly, they argue that poor countries have not been responsible for the production of most of the greenhouse gases that have caused the current problem. Identifying developed countries as the primary producers of greenhouse gases, they suggest that the major burden for limiting the production of greenhouse gases should fall on the developed world—at least until developing countries have pulled their populations out of extreme poverty. 24 The United States has expressed strong opposition to these arguments by insisting that all countries should be subjected to the same limitations on carbon emissions. At the Thirteenth Conference of the Parties (COP 13) to the United Nations Framework Convention on Climate Change (UNFCCC) in Bali 2007, the US delegation repeatedly blocked negotiations by demanding that developing countries take more responsibility for their contribution to global warming. At the same time, however, America has	crumbling ['krʌmblɪŋ] <i>adj.</i> 破碎的 household ['haʊshəʊld] <i>n.</i> 一家人, 一户 explicitly [ɪk'splɪtsɪtli] <i>ad.</i> 明确地; 明白地 ethical ['eθɪk(ə)l] <i>adj.</i> 伦理的; 道德的 severity [sɪ'verɪti] <i>n.</i> 严重; 严格; 猛烈 glean [gli:n] <i>vt.</i> 收集 (资料) enforcement mechanisms 执行机制 ratify ['ræɪtfaɪ] <i>vt.</i> 批准; 认可 inaction [ɪn'ækʃ(ə)n] <i>n.</i> 不作为 pull...out of poverty 让.....摆脱贫困 impede economic development 阻碍经济发展
---	--

been reluctant to enter into any agreement that might slow its own economic growth. Throughout the 2000s, the Bush administration walked away from key international treaties such as the Kyoto Protocol while remaining significantly behind other developed countries in its commitments on capping and reducing carbon emissions.

Country	Total emissions (1000 tons of CO ₂)	Per capita emissions (tonnes/capita)	Per capita emissions (rank)
China (mainland)	1,917,621	5.3	78

L. Long term global CO₂ emissions¹²

25 Unfortunately, the next US government did not fundamentally break with the approach of its predecessor. Although President Barack Obama made stronger rhetorical gestures in favour of environmental protection, his actions did not match his words. For example, at the 2009 Copenhagen Climate Summit, Obama acquiesced to unspecific, non-legally binding agreements that fell far short of the Summit's goal to establish a strong and binding global climate agreement by 2012.

26 In the same vein, the much anticipated 2012 UN conference on Sustainable Development in Brazil—known as Rio + 20 because it was held twenty years after the historic 1992 Rio Summit on Climate Change—merely produced toothless documents that paid lip service to a 'common vision' of environmental sustainability but failed to mandate binding emission reduction targets. National states proved themselves to be unwilling to engage in the sort of environmental multilateralism that would produce measurable results in the worldwide struggle against global warming. The only major achievement of Rio + 20 was the launching of the 'People's Sustainability Manifesto' by hundreds of civil society organizations which seek to build a global-local movement for the protection of the environment. The next UN Climate Summit to be held in Qatar in 2013—the country with the world's highest per capita carbon emissions—is unlikely to break the pattern of weak and non-binding state action (see Figure M).

¹² Source: CDIAC, 2011, <http://cdiac.ornl.gov/ftp/ndp030/global.1751_2008.ems>

(2013), the Australian political scientists Peter Christoff and Robyn Eckersley have identified five deep-seated and interlocking problems that have prevented the creation and ratification of an effective global environmental treaty system:

1. States have failed to integrate environmental and economic governance at the national level.
2. States have failed to integrate environmental and economic governance at the international level.
3. Powerful social forces continue to resist or co-opt efforts to transform economies and societies in a more ecologically sustainable direction.
4. The neoliberal economic discourse remains globally dominant, undermining sustainable development and ecological modernization discourses and practices.
5. All of the above persists because national and international accountability mechanisms remain weak and inadequate in a globalizing world.

28 Many leading scientists believe that a further decade of inaction would make it impossible to avoid the disastrous impacts of climate change and ecological degradation. Indeed, the 2012 edition of the UN Environment Program's *Global Environmental Outlook* confirms their worst fears by documenting a planet pushed to its ecological limits. Confronted with the ill health of our Mother Earth in the second decade of the 21st century, it has become abundantly clear to many people that the contemporary phase of globalization has been the most environmentally destructive period of human history. It remains to be seen, however, whether the growing recognition of the ecological limits of our planet will translate into tackling the five problems identified above by Christoff and Eckersley. As they note in Point 4, much depends on counteracting powerful ideologies that are rooted in the worship of unfettered markets and the desire for the unlimited accumulation and consumption of material things.

Exercises

Part 1 Dictation -- An Inconvenient Truth (excerpt)

You will hear the recording three times. While listening, fill in the blanks with the exact words that you hear.

The assumption is something like this. The Earth is so big 1) _____.
_____. And maybe that
was true at one time, but it's not anymore. And one of the reasons it's not true anymore 2) _____.

Vulnerable because it's so thin. My friend, the late Carl Sagan, used to say, 'If you had a big globe with
a coat of varnish on it, 3) _____
is pretty much the same as the thickness of the Earth's atmosphere compared to the Earth itself.' And
it's thin enough 4) _____.

5) _____. And I'm not
gonna spend a lot of time on this because you know it well. The sun's radiation comes in 6) _____.
_____. And then some of
the radiation that is absorbed and warms the Earth is reradiated back into space in the form of infrared
radiation. And some of the outgoing infrared radiation 7) _____.

And that's a good thing 8) _____.
_____, keep it relatively constant and livable. But the
problem is this thin layer of atmosphere 9) _____.

And what that does is it thickens this layer of atmosphere, more of the outgoing infrared is trapped. 10) _____.

That's global warming.

Part 2 Reading-based Exercises

I. Useful Chunks

Below are the Chinese equivalents of some useful chunks from paragraphs 11 - 18. Read the paragraphs closely and note down the English equivalents.

1. 跨国界污染是对我们集体生存的另一个严重威胁。
2. 导致国际社会协调一致共同努力
3. 至少是临界水平的两倍
4. 人类引发的气候变化问题出现了
5. 发布了一份关于.....的报告，报告内容详尽全面，令人震惊
6. 全球气温的显著上升已经导致了.....
7. 导致全球海平面上升了22英尺
8. 威胁地球海洋健康的唯一严重问题
9. 对地球的海洋环境造成了毁灭性的影响
10. 所有这些潜在的灾难性环境问题的主要特征

II. Translation

Translate the following sentences into Chinese.

1. In 2012, scientists warned that the risk of damage to the world's ozone layer has increased as a result of more frequent and severe storms as a result of global climate change. (Para. 11)
2. Brought to public attention by former US Vice President Al Gore in the 2000s through his award-winning documentary, *An Inconvenient Truth*, as well as the production of numerous scientific reports outlining the dire consequences of unchecked global warming, climate change is clearly one of the top three 'global problems' facing humanity today. (Para. 12)
3. Or, perhaps even more horrifying, take the huge floating debris field generated by the devastating Japanese earthquake and tsunami of March 2011 that killed more than 15,000 people across Japan. (Para. 17)
4. Indeed, transboundary pollution, global warming, climate change, and species extinction are challenges that cannot be contained within national or even regional borders. (Para. 18)
5. They do not have isolated causes and effects for they are caused by aggregate collective human actions and thus require a coordinated global response. (Para. 18)

III. Essay Questions

Write a paragraph to answer one of the questions below. Start your paragraph with a topic sentence and support it with details from the text. While writing, paraphrase instead of copying the exact words from the text.

1. What are the effects of human-induced global warming listed in this part?
2. What are the effects of environmental degradation to the marine environment?

Unit Seven

Ideologies of Globalization:

Market Globalism, Justice Globalism, Religious Globalism

1 Ideologies are powerful systems of widely shared ideas and patterned beliefs that are accepted as truth by significant groups in society. Serving as political mental maps, they offer people a more or less coherent picture of the world not only as it is, but also as it ought to be. In doing so, ideologies help organize the tremendous complexity of the human experiences into fairly simple claims that serve as guide and compass for social and political action.

2 These claims are employed to legitimize certain political interests and to defend or challenge dominant power structures. Seeking to imbue society with their preferred norms and values, the codifiers of ideologies—usually social elites—provide the public with a circumscribed agenda of things to discuss, claims to make, and questions to ask. These power elites speak to their audience in narratives that persuade, praise, condemn, distinguish ‘truths’ from ‘falsehoods’, and separate the ‘good’ from the ‘bad’. Thus, ideology connects theory and practice by orienting and organizing human action in accordance with generalized claims and codes of conduct.

3 Like all social processes, globalization operates on an ideological dimension filled with a range of norms, claims, beliefs, and narratives about the phenomenon itself. Indeed, the heated public debate over whether globalization represents a ‘good’ or a ‘bad’ thing occurs in the arena of ideology. But before we explore the ideological dimension of globalization in more detail, we should recall our important analytical distinction between *globalization*—a set of social processes of intensifying global interdependence—and *globalisms*—ideologies that endow the concept of globalization with particular values and meanings.

4 Today, three types of globalism compete for adherents around the globe. *Market globalism* seeks to endow ‘globalization’ with free-market norms and neoliberal meanings. Contesting market globalism from the political Left, *justice globalism* constructs an alternative vision of globalization based on egalitarian ideals of global solidarity and distributive justice. From the political Right, various *religious globalisms* struggle against both market globalism and justice globalism as they seek to mobilize a religious community imagined in global terms in defence of religious values and beliefs that are thought to be under severe attack by the forces of secularism and consumerism.

5 In spite of their considerable differences, however, these three globalisms share nonetheless an important function: they articulate and translate the rising global imaginary—a background understanding of

ideology [ˌaɪdɪˈɒlədʒi] *n.* 意识形态

legitimize [lɪˈdʒɪtəmaɪz] *v.* 使（坏事等）看起来可接受；使合法

imbue [ɪmˈbjuː] *vt.* 使充满；灌输

codifier [ˈkəʊdɪˌfaɪə] *n.* 法典编纂者

circumscribe [ˈsɜːkəmskraɪb] *vt.* 限制，约束（自由、权利、权力等）

globalisms [ˈɡləʊbəlaɪzəm] *n.* 全球主义

endow [ɪnˈdaʊ] *vt.* 赋予；给予

endow ---with 赋予/给予（某种特性，品质等）

adherents [ədˈhɪər(ə)nt] *n.* （政党、思想的）拥护者；信徒；追随者

egalitarian [ɪˌɡæliˈteəriən] *adj.* 平等主义的；主张人人平等的

secularism [ˈsekjələrɪzəm] *n.* 世俗主义；现世主义

community and belonging increasingly tied to the global—into concrete political programs and agendas. Hence, it would be inaccurate to accuse the two ideological challengers of dominant market globalism of being ‘anti-globalization’. Rather, their position could be described as ‘alter-globalization’— subscribing to alternative visions of an integrated world that resist neoliberal projections of universal free-market principles.

6 To be sure, there are powerful voices of ‘anti-globalization’— national-populists and economic protectionists such as Patrick Buchanan and many Tea Party adherents in the United States, Marine Le Pen in France, Nick Griffin in the UK, or Karl-Heinz Strache in Austria. Their respective programs look very similar in their fierce opposition to globalizing dynamics that challenge national unity imagined in homogenous terms. Buchanan, for example, supports in his best-selling books and fiery political speeches ‘economic nationalism’—the view that the economy should be designed in ways that serve narrow national interests. He frequently expresses the conviction that there exists at the core of contemporary American society an irrepressible conflict between the claims of American nationalism and the commands of the global economy. In Buchanan’s opinion, most mainstream American politicians are beholden to transnational corporate interests that are undermining the sovereignty of the nation by supporting a global governance structure headed by the World Trade Organization (WTO) and other international institutions. He also accuses ‘globalist advocates of multiculturalism’ of opening the doors to millions of immigrants who are allegedly responsible for the economic and moral decline of the United States.

Five rhetorical manoeuvres performed by national-populists

1. The emotional construction of unbridgeable political differences dividing the population into the majority of ‘good’ ordinary people (‘us’) and a small but powerful and ‘bad’ elite (‘them’);
2. Frequent verbal attacks of the people’s ‘enemies’ from a moralistic high-ground rather than a political level playing field;
3. The evocation of an extreme crisis brought on by the enemies of the people which requires an immediate and forceful response;
4. The imagination of the people as a homogenous national unit welded together by a common will and interests, an ancestral heartland, and shared cultural and religious traditions;
5. The rejection of globalization and multiculturalism as ominous dynamics threatening to destroy the national community.

7 Fearing the loss of national self-determination and the destruction of their national cultures, anti-globalization voices like Buchanan pledge to protect their nation from those ‘foreign elements’ they consider responsible for

anti-globalization 反全球化

alter-globalization 另类全球化

subscribe [səb'skraɪb] v. 捐赠; 订阅

subscribe to 同意; 赞同; 支持

projection [prə'dʒekʃn] n. 预测, 推测

national-populist 国家-民粹主义者

fiery ['faɪəri] *adj.* 充满激情的; (尤指) 怒气冲冲的

beholden [br'həʊld(ə)n] *adj.*

be beholden to (因受惠而心存) 感激; 感谢

rhetorical [rɪ'tɒrɪk(ə)l] *adj.* 修辞的

manoeuvre [mə'nu:və] n. 策略; 手段

unbridgeable [ʌn'brɪdʒəbl] *adj.* 无法弥合的; 无法沟通的

a moralistic high-ground 道德的高地

evocation [ˌevəʊ'keɪʃən] n. 引起; 唤起

weld [weld] v. 焊接; 使紧密结合

ominous ['ɒmɪnəs] *adj.* 不祥的; 不吉利的

unleashing the forces of globalization. Clinging to the weakening national imaginary, national-populists regard autonomous nation-states as the only legitimate form of community. Hence, they can be viewed as ‘reactionaries’ in the sense of reacting against all three globalist ideologies without providing their national audiences with constructive articulations of the rising global imaginary.

Market globalism

8 Market globalism is without question the dominant ideology of our time. Since the 1990s, it has been codified and disseminated worldwide by global power elites that include corporate managers, executives of large transnational corporations, corporate lobbyists, influential journalists and public-relations specialists, intellectuals writing for a large public audience, celebrities and top entertainers, state bureaucrats, and politicians. (see Illustration 11).

9 Serving as the chief advocates of market globalism, these individuals saturate the public discourse with idealized images of a consumerist, free-market world. Selling their preferred version of a single global marketplace to the public, they portray globalization in a positive light as an indispensable tool for the realization of such a global order. Such favourable visions of globalization pervade public opinion and political choices in many parts of the world. Indeed, neoliberal decision-makers emerged as expert designers of an attractive ideological container for their market-friendly political agenda. Given that the exchange of commodities constitutes the core activity of all societies, the market-oriented discourse of globalization itself has turned into an extremely important commodity destined for public consumption. *Business Week*, *The Economist*, *Forbes*, the *Wall Street Journal*, and the *Financial Times* are among the most powerful of dozens of magazines, journals, newspapers, and electronic media published globally that feed their readers a steady diet of market-globalist claims.

11. Microsoft CEO, Bill Gates, one of the world's most powerful advocates of market globalism

10 Thus, market globalism has become what some social theorists call a ‘strong discourse’—one that is notoriously difficult to resist and repel

reactionary [rɪˈækʃ(ə)n(ə)rɪ] n. 反动分子；反对政治（或社会）变革者

codify [ˈkɒdɪfaɪ] vt. 把…编成法典

lobbyist [ˈlɒbɪst] n. 说客

saturate [ˈsætʃəreɪt] v. 浸透，使充满

portray [pɔːˈtreɪ] vt. 描绘；描写

portray...as 将…描写成；给人以某种印象

pervade [pəˈveɪd] v. 遍及；弥漫

feed their readers a steady diet of market-globalist claims 持续不断地向读者灌输市场全球主义的主张

a strong discourse 强势话语

repel [rɪˈpel] vt. 驱逐；驱除

because it has on its side powerful social forces that have already pre-selected what counts as ‘real’ and, therefore, shape the world accordingly. The constant repetition and public recitation of market globalism’s core claims and slogans have the capacity to produce what they name. As more neoliberal policies are enacted, the claims of market globalism become even more firmly planted in the public mind. Analysing hundreds of newspaper and magazine articles—both online and offline—I have identified five major ideological claims that occur with great regularity in the utterances, speeches, and writings of influential market globalists.

The five claims of market globalism

1. Globalization is about the liberalization and global integration of markets
2. Globalization is inevitable and irreversible
3. Nobody is in charge of globalization
4. Globalization benefits everyone
5. Globalization furthers the spread of democracy in the world

11 It is important to note that globalists themselves construct these ideological claims in order to sell their political and economic agenda. Perhaps no single market-globalist speech or piece of writing contains all of the five assertions discussed below, but all of them contain at least some of these claims.

12 Like all ideologies, market globalism starts with the attempt to establish an authoritative definition of its core concepts. For neoliberals, such an account is anchored in the idea of the self-regulating market that serves as the framework for a future global order. As we noted in Unit 3, neoliberals seek to cultivate in the public discourse the uncritical association of ‘globalization’ with what they assert to be the benefits of market liberalization. In particular, they present the liberalization and integration of global markets as ‘natural’ phenomena that further individual liberty and material progress in the world. Here are two examples of claim 1:

Globalization is about the triumph of markets over governments. Both proponents and opponents of Globalization agree that the driving force today is markets, which are suborning the role of government.

Business Week, 13 December 1999

One role [of government] is to get out of the way -- to remove barriers to the free flow of goods, services and capital.

Joan Spero, former US Under-Secretary of State in the Clinton administration

13 The problem with claim 1 is that its core message of liberalizing and integrating markets is only realizable through the *political* project of engineering free markets. Thus, market globalists must be prepared to

enact [ɪˈnækt] v. 通过

be enacted 发生；进行；举行

occur with great regularity 非常有规律地出现

irreversible [ɪrɪˈvɜːsɪb(ə)l] adj. 不能逆转的；无法复原（或挽回的）

assertion [əˈsɜːʃ(ə)n] n. 断言；声明；主张；认定

the self-regulating market 自我调节的市场

suborn [səˈbɔːn] vt. 收买；买通（使作伪证等）；唆使（他人犯法）

utilize the *powers of government* to weaken and eliminate those social policies and institutions that curtail the market. Since only strong governments are up to this ambitious task of transforming existing social arrangements, the successful liberalization of markets depends upon *intervention* and *interference* by centralized state power. Such actions, however, stand in stark contrast to the neoliberal idealization of the limited role of government. Yet, globalists do expect governments to play an extremely active role in implementing their political agenda. The activist character of the earliest neoliberal administrations in the United States, the United Kingdom, Australia, and New Zealand during the 1980s and 1990s attests to the importance of strong governmental action in engineering free markets.

14 Moreover, the claim that globalization is about the liberalization and global integration of markets solidifies as ‘fact’ what is actually a contingent political initiative. Market globalists have been successful because they have persuaded the public that their neoliberal account of globalization represents an objective, or at least a neutral, diagnosis of the very conditions it purports to analyse. To be sure, neoliberals may indeed be able to offer some ‘empirical evidence’ for the ‘liberalization’ of markets. But does the spread of market principles really happen because there exists a metaphysical connection between globalization and the expansion of markets? More likely, it occurs because globalists have the political and discursive power to shape the world largely according to their ideological formula:

LIBERALIZATION + INTEGRATION OF MARKETS =
GLOBALIZATION

15 Claim 2 establishes the historical inevitability and irreversibility of globalization understood as the liberalization and global integration of markets. Let us consider the following statements:

Today we must embrace the inexorable logic of globalization—that everything from the strength of our economy to the safety of our cities, to the health of our people, depends on events not only within our borders, but half a world away ... Globalization is irreversible.

Bill Clinton, former US President

We need much more liberalization and deregulation of the Indian economy. No sensible Indian businessman disagrees with this ... Globalization is inevitable. There is no better alternative.

Rahul Bajaj, Indian industrialist

16 The portrayal of globalization as some sort of natural force, like the weather or gravity, makes it easier for market globalists to convince people that they must adapt to the discipline of the market if they are to survive and prosper. Hence, the claim of inevitability depoliticizes the public discourse about globalization. Neoliberal policies are portrayed to be above politics; they simply carry out what is ordained by nature. This

curtail [kɜːˈteɪl] vt. 限制; 缩减; 缩短

attest [əˈtest] v. 证实; 作证

attest to 证实; 证明

solidify [səˈlɪdɪfaɪ] v. (使)凝固, 变硬;
(使)变得坚定, 变得稳固

contingent [kənˈtɪndʒ(ə)nt] adj. 可能发生的,
可能的; 依情况而定的

empirical [ɪmˈpɪrɪkl] adj. 经验主义的, 实证的

metaphysical [metaˈfɪzɪk(ə)l] adj. 形而上学的

inexorable [ɪnˈeks(ə)rəb(ə)l] adj. 不可阻挡的; 无法改变的

ordain [ɔːˈdeɪn] vt. 授以圣职; (神、法律或

implies that, instead of acting according to a set of choices, people merely fulfil world-market laws that demand the elimination of government controls. As former British Prime Minister Margaret Thatcher used to say, 'There is no alternative'. If nothing can be done about the natural movement of economic and technological forces, then political groups ought to acquiesce and make the best of an unalterable situation. Resistance would be unnatural, irrational, and dangerous.

17 Market globalism's deterministic language offers yet another rhetorical advantage. If the natural laws of the market have indeed preordained a neoliberal course of history, then globalization does not reflect the arbitrary agenda of a particular social class or group. In that case, market globalists merely carry out the unalterable imperatives of a transcendental force. People aren't in charge of globalization; markets and technology are. Here are two examples of claim 3:

And the most basic truth about globalization is this: *No one is in charge ...* We all want to believe that someone is in charge and responsible. But the global marketplace today is an Electronic Herd of often anonymous stock, bond and currency traders and multinational investors, connected by screens and networks.

Thomas Friedman, *New York Times* correspondent and award-winning author

The great beauty of globalization is that no one is in control. The great beauty of globalization is that it is not controlled by any individual, any government, any institution.

Robert Hormats, former Vice Chairman of Goldman Sachs International

18 But Mr Hormats is right only in a formal sense. While there is no conscious conspiracy orchestrated by a single, evil force, this does not mean that nobody is in charge of globalization. The liberalization and integration of global markets does not proceed outside the realm of human choice. As we will discuss in the final unit, the market-globalist initiative to integrate and deregulate markets around the world both creates and sustains asymmetrical power relations. Despite the rise of China, the United States is still the strongest economic and military power in the world, and the largest transnational corporations (TNCs) are based in North America. This is not to say that the 'American Empire' rules supremely over these gigantic processes of globalization. But it *does* suggest that both the substance and the direction of globalization are to a significant degree shaped by American domestic and foreign policy.

19 Claim 4—globalization benefits everyone—lies at the very core of market globalism because it provides an affirmative answer to the crucial normative question of whether globalization should be considered a 'good' or a 'bad' thing. Market globalists frequently connect their arguments to the alleged benefits resulting from trade liberalization: rising global living standards, economic efficiency, individual freedom, and unprecedented technological progress. Let us consider the following two

命运) 主宰; 掌握; 规定

acquiesce [ˌækwiːs] vi. 默认, 默许

unalterable [ˌʌnˈɔːlt(ə)rəb(ə)l] adj. 无法改变的; 不可更改的

preordain [ˌpriːɔːˈdeɪn] vt. 预定; 预先注定

arbitrary [ˈɑːbit(ə)rɪ] adj. 任意的; 专制的; 武断的

imperative [ɪmˈperətɪv] n. 命令; 需要; 规则

transcendental [ˌtrænsenˈdɛntl] adj. 超越的; 超自然的

Electronic Herd 电子群体

conspiracy [kənˈspɪrəsi] n. 阴谋; 密谋策划

asymmetrical [eɪsɪˈmetrɪkl] adj. 非对称的; 不对等的

supremely [suːˈpriːmli] adv. 至上地; 极度

affirmative [əˈfɜːmətɪv] adj. 肯定的; 同意的

examples:

There can be little doubt that the extraordinary changes in global finance on balance have been beneficial in facilitating significant improvements in economic structures and living standards throughout the world....

Alan Greenspan, former Chairman of the US Federal Reserve Board

Globalization's effects have been overwhelmingly good. Spurred by unprecedented liberalization, world trade continues to expand faster than overall global economic output, inducing a wave of productivity and efficiency and creating millions of jobs.

Peter Sutherland, former Chairman of British Petroleum

20 Mr Sutherland does not seem to question the ideological assumptions behind his statement. Where are 'millions of jobs' created? Who has benefited from globalization? As we discussed in Unit 3, when the market goes too far in dominating social and political outcomes, the opportunities and rewards of globalization are spread often unequally, concentrating power and wealth amongst a select group of people, regions, and corporations at the expense of the multitude.

21 China and India are often referred to as the great 'winners' of globalization. But their astonishing economic growth and the rise of per capita income comes disproportionately from the top 10 percent of the population. Indeed, the incomes of the bottom 50 percent in India and China have actually stagnated or even declined during the 2000s. Empirical evidence suggests that income disparities within and between nations are widening at a quicker pace than ever before in recent history.

spur [spɜ:(r)] v. 激励; 促进

multitude ['mʌltitju:d] n. 群众; 大批民众

stagnated [stæg'neɪt; 'stægneɪt] vi. 停滞; 不发展; 不进步

empirical [em'pɪrɪk(ə)] adj. 以实验 (或经验) 为依据的; 经验主义的

disparity [dɪ'spærɪtɪ] n. 不等, 差异, 悬殊

alleviate [ə'li:vɪeɪt] vt. 减轻; 缓和; 缓解

N. Income divergence in the USA, 1980–2010¹⁴

22 Data published in the 1999 and 2000 editions of the *UN Human Development Report* show that, before the onset of globalization in 1973, the income ratio between the richest and poorest countries was at about 44 to 1. Twenty-five years later it had climbed to 74 to 1. In spite of some progress in alleviating poverty worldwide, the bottom 25 percent of humankind in 2012 lived on less than \$140 a year. Meanwhile, the assets of the world's top *three* billionaires are more than the combined GNP of all the least developed countries and their 600 million people.

Map 5. Geography of the rich: number of people in thousands with investable assets of \$1 million or more (2010)¹⁵

23 There are numerous other indications confirming that the global hunt for profits actually makes it more difficult for poor people to enjoy the benefits of technology and scientific innovation. For example, there is widespread evidence for the existence of a widening 'digital divide' separating countries in the global North and South (see Figure O).

24 Claim 5—globalization furthers the spread of democracy in the

digital divide 数字鸿沟（指上网者与不上网者之间的差别、隔阂）

compatibility [kəm.pætrɪ'bɪlɪtɪ] *n.* 和睦相处；并存；相容

conducive [kən'dju:sɪv] *adj.* 有益的；有助于...的

hinge [hɪndʒ] *v.* 给（某物）装铰链 hinge on 有赖于；取决于

the direct participation of broad majorities 大多数人直接参与

this 'thin' definition of democracy 对民主狭隘的定义

regimented [ˈredʒɪməntɪd] *adj.* 非常严格的；严格规划的；排列整齐的

insulated [ˈɪnsjuleɪtɪd] *adj.* 起隔热（或隔音、绝缘）作用的

¹⁴ Source: <www.census.gov/hhes/www/income/data/historical/household/index.html>

¹⁵ Source: <<http://www.tni.org>> (data from the 2011 World Wealth Report)

world—is rooted in the neoliberal assertion that free markets and democracy are synonymous terms. Persistently affirmed as ‘common sense’, the actual compatibility of these concepts often goes unchallenged in the public discourse. Here are two examples:

The level of economic development resulting from globalization is conducive to the creation of complex civil societies with a powerful middle class. It is this class and societal structure that facilitates democracy.

Francis Fukuyama, Stanford University

The Electronic Herd will intensify pressures for democratization generally, for three very critical reasons—flexibility, legitimacy, and sustainability.

Thomas Friedman, *New York Times* correspondent and bestselling author

25 These arguments hinge on a conception of democracy that emphasizes formal procedures such as voting at the expense of the direct participation of broad majorities in political and economic decision-making. This ‘thin’ definition of democracy reflects an elitist and regimented model of ‘low- intensity’ or ‘formal’ market democracy. In practice, the crafting of a few democratic elements onto a basically authoritarian structure ensures that those elected remain insulated from popular pressures and thus can govern ‘effectively’. Hence, the assertion that globalization furthers the spread of democracy in the world is largely based on a superficial definition of democracy.

World Regions	Population (2011 est.)	Population % of World	Internet Users, Latest Data 2012	% Population (Penetration)	Usage % World	% Usage Growth 2000- 2011

N. Global Internet users as a percentage of the regional population¹⁶

26 Our examination of the five central claims of market globalism suggests that the neoliberal language about globalization is ideological in the sense that it is politically motivated and contributes toward the construction of particular meanings of globalization that preserve and stabilize existing power relations. But the ideological reach of market globalism goes far beyond the task of providing the public with a narrow explanation of the meaning of globalization. Market globalism consists of powerful narratives that sell an overarching neoliberal worldview, thereby creating collective meanings and shaping people’s identities. Yet, as both massive justice-globalist protests and jihadist-globalist acts of terrorism have

overarching [ˌəʊvərˈɑːtɪŋ] *adj.* 非常重要的；
概莫能外的

jihadist [dʒɪˈhɑːdɪst] *n.* 伊斯兰圣战士

jihadist-globalist 圣战士全球主义者

draw to a close 渐近结束

street confrontations 街头对峙

social alliances 社会联盟

¹⁶ Source: <www.census.gov/hhes/www/income/data/historical/household/index.html>

shown, the expansion of market globalism has encountered considerable resistance from both the political Left and Right.

Justice globalism

27 As the 20th century was drawing to a close, criticisms of market globalism began to receive more attention in the public discourse on globalization, a development aided by a heightened awareness of how extreme corporate profit strategies were leading to widening global disparities in wealth and well-being. Starting in the late 1990s and continuing throughout much of the 2000s, the contest between market globalism and its ideological challenger on the political Left erupted in street confrontations in many cities around the world. Who are these justice-globalist forces and what is their ideological vision?

28 Justice globalism refers to the political ideas and values associated with the social alliances and political actors increasingly known as the ‘social justice movement’. It emerged in the 1990s as a progressive network of non-governmental organizations (NGOs) that see themselves as a ‘global civil society’ dedicated to the establishment of a more equitable relationship between the global North and South, the protection of the global environment, fair trade and international labour issues, human rights, and women’s issues.

29 Challenging the central claims of market globalism discussed in the previous unit, justice globalists believe that ‘another world is possible’, as one of their central slogans suggests. Envisioning the construction of a new world order based on a global redistribution of wealth and power, justice globalists emphasize the crucial connection between globalization and local well-being. They accuse market-globalist elites of pushing neoliberal policies that are leading to greater global inequality, high levels of unemployment, environmental degradation, and the demise of social welfare. Calling for a ‘Global New Deal’ favouring the marginalized and poor, justice globalists seek to protect ordinary people all over the world from a neoliberal ‘globalization from above’.

30 In the United States, the consumer advocate, Ralph Nader, and the human rights proponent, Noam Chomsky, are leading representatives of justice globalism. In Europe, the spokespersons for established Green parties have long suggested that unfettered neoliberal globalization has resulted in a serious degradation of the global environment. Neo-anarchist groups in Europe and the United States such as the ‘Black Bloc’ concur with this perspective, and some of these groups are willing to make selective use of violent means in order to achieve their objectives. In the global South, justice globalism is often represented by democratic-popular movements of resistance against neoliberal policies. Most of these groups have forged close links to other justice-globalist international non-governmental organizations INGOs.

envision [ɪnˈvɪʒn] vt. 展望; 想象

marginalize [ˈmɑːdʒɪn(ə)laɪz] vt. 使处于边缘; 使微不足道

anarchist [ˈænəkɪst] n. 无政府主义者

neo-anarchist 新无政府主义者

concur [kənˈkʊː(r)] v. 同意; 一致

forge [fɔːdʒ] vt. 艰苦干成; 努力加强

Occupy movements 占领运动

encampment [ɪnˈkæmpm(ə)nt] n. 营房, 营地

Name of Organization	Location	Areas of Concern/Focus
Association pour une taxation des transactions financières pour l'aide aux citoyens (Association for the Taxation of Financial Transactions for the Aid of Citizens (ATTAC))	Paris, France plus multiple regional offices	Reform of global financial institutions and infrastructure
Articulacion Feminista Mercosur (Southern Common Market)	Montevideo, Uruguay	Rights of women, indigenous people, and the marginalized
Africa Trade Network	East Legon, Accra, Ghana	Trade and investment issues in Africa; reform of global financial system
Corpwatch	San Francisco, California, USA	Human, environmental, and worker rights at the local, national, and global levels; transparency and accountability into global finance and trade
Food First International Action Network	Heidelberg, Germany	Promote the right to food, food sovereignty, and food security around the world
Focus on the Global South	Manila, Philippines; Bangkok, Thailand; Delhi, India	Policy research, advocacy, activism, and grassroots capacity building; critique of corporate-led globalization, neo-liberalism, and militarization

P. Examples of justice-globalist organizations¹⁷

31 Today, there exist thousands of these organizations in all parts of the world. Some consist only of a handful of activists, while others attract a much larger membership (see Figure P).

32 In the early 21st century, the forces of justice globalism have gathered political strength. This is evidenced by the emergence of the World Social Forum (WSF) and various 'Occupy' movements around the world. In the US, Occupy Wall Street burst onto the political scene in 2011 as part of a global Occupy movement that drew activists in the world's major cities within months. Inspired by the popular protests of the 'Arab Spring' and *Los Indignados* ('the indigents') encampments in Spain, Occupy demonstrators expressed outrage at the inequalities of global capitalism and the irresponsible practices of many financial institutions, all of which had been on stark display during the Global Financial Crisis. Brandishing their slogan 'We are the 99 percent', Occupy protesters across the world occupied spaces of symbolic importance—such as New York City's Zuccotti Park near Wall Street—and sought to create—in miniature—the kind of egalitarian society they wanted to live in. Rejecting conventional organizational leadership formations, Occupy formed General Assemblies and working groups that reached decisions through a consensus-based process.

33 In spite of the mass appeal of the Occupy movement, however, the WSF still serves as the key ideological site of justice globalism. It draws to its annual meetings in Brazil or India tens of thousands of delegates from around the world. The proponents of justice globalism deliberately set up the WSF as a 'shadow organization' to the market-globalist World Economic Forum (WEF) in Davos, Switzerland. Just like market globalists who treat the WEF as a platform to project their ideas and values to a global audience, justice globalists utilize the WSF as the main production site of their ideological and policy alternatives.

stark [stɑ:k] *adj.* 明显的, 鲜明的

brandish ['brændɪʃ] *vt.* 挑衅地挥舞, 激动地挥舞

egalitarian [i,gæli'teəriən] *adj.* 平等主义的; 主张人人平等的

a consensus-based process 基于共识的过程

shadow organization 影子组织

Utilize ['ju:tɪlaɪz] *vt.* 利用; 使用; 运用

reflective thinking 反思性思维

confessional [kən'feʃ(ə)n(ə)l] *adj.* 忏悔的; 自白的

decentralized [di'sentrəlaɪz] *adj.* 分散的; 去中心化的

affiliate [ə'fɪliet] *vt.* 使隶属; 使并入

like-minded ['laɪk'maɪndɪd] *adj.* 想法相同的; 志趣相投的

¹⁷ Source: Author

From the WSF Charter of Principles

1. The World Social Forum is an open meeting place for reflective thinking, democratic debate of ideas, formulation of proposals, free exchange of experiences, and interlinking for effective action by groups and movements of civil society that are opposed to neoliberalism and to domination of the world by capital and any form of imperialism and are committed to building a planetary society directed toward fruitful relationships among humankind and between it and the Earth....

8. The World Social Forum is a plural, diversified, confessional, nongovernmental, and non-party context that, in a decentralized fashion, interrelates organizations and movements engaged in concrete action at levels from the local to the international to build another world....

13. As a context for interrelations, the World Social Forum seeks to strengthen and create new national and international links among organizations and movement of society that—in both public and private life—will increase the capacity for non-violent social resistance to the process of dehumanization the world is undergoing.

...

34 Most of the justice-globalist groups affiliated with the WSF started out as small, seemingly insignificant groups of like-minded people in South America and Europe. Many of them learned important theoretical and practical lessons from justice-globalist struggles in developing countries, particularly from Mexico's Zapatista rebellion.

35 On 1 January 1994, the day NAFTA went into effect, a small band of indigenous rebels calling themselves the *Zapatista Army of National Liberation* captured four cities in the Chiapas region of southeast Mexico. Engaging in a number of skirmishes with the Mexican army and police over the next few years, the Zapatistas continued to protest the implementation of NAFTA and what their leader, Subcomandante Marcos, called the 'global economic process to eliminate that multitude of people who are not useful to the powerful'. In addition, the Zapatistas put forward a comprehensive programme that pledged to reverse the destructive consequences of neoliberal free-market policies. Although the Zapatistas insisted that a major part of their struggle related to the restoration of the political and economic rights of indigenous peoples and the poor in Mexico, they also emphasized that the fight against neoliberalism had to be waged globally.

Mexico's Zapatista rebellion 墨西哥的扎帕蒂斯塔叛乱

go into effect 生效; 施行

indigenous [ɪnˈdɪdʒənəs] adj. 本土的; 土著的

skirmish ['skɜːmɪʃ] n. 小规模战斗; 小冲突

wage [weɪdʒ] vi. 开始, 发动, 进行, 继续 (战斗, 斗争等)

trash [træʃ] vt. 损坏; 毁坏

eclectic [ɪˈklektɪk] adj. 折中的, 折中主义的

multilateral investments 多边投资

scramble ['skræmb(ə)] v. 推挤, 争抢; 爬, 攀登

Five principal claims of justice globalism

1. Neoliberalism produces global crises.
2. Market-driven globalization has increased worldwide disparities in wealth and wellbeing.
3. Democratic participation is essential in solving global problems.
4. Another world is possible and urgently needed.
5. People power, not corporate power!

36 The legendary 'Battle of Seattle' in late 1999 was the first in a decade-long series of large-scale confrontations between the forces of market globalism and justice globalism. 40,000 to 50,000 people took part in this massive anti-WTO protest in Seattle, Washington. In spite of the predominance of North American participants, there was also a significant international presence. Activists like José Bové, a French sheep farmer who became an international celebrity for trashing a McDonald's outlet, marched shoulder to shoulder with Indian farmers and leaders of the Philippines' peasant movement. Articulating some of the five principal justice-globalist claims featured above, this eclectic alliance included consumer activists, labour activists (including students demonstrating against sweatshops), environmentalists, animal rights activists, advocates of Third World debt relief, feminists, and human rights proponents. Criticizing the WTO's neoliberal position on agriculture, multilateral investments, and intellectual property rights, this impressive crowd represented more than 700 organizations and groups.

37 Eventually, large groups of demonstrators interrupted traffic in the city centre and managed to block off the main entrances to the convention centre by forming human chains. As hundreds of delegates were scrambling to make their way to the conference centre, Seattle police employed tear gas, batons, rubber bullets, and pepper spray stingers against the demonstrators (see Illustration 12). Altogether, the police arrested over 600 persons.

12. Police use tear gas to push back WTO protesters in downtown Seattle, 30 November 1999

stinger ['stɪŋə] *n.* 螫针, 刺

hail [heɪl] *v.* 赞扬; 称颂

hallmark ['hɔ:lma:k] *n.* 特点; 特征

arrange logistics 安排物流

shifting police tactics 摆脱警察的战术

a blanket forgiveness 全面免除

levy ['levɪ] *vt.* 征收; 征税

offshore financial centres 离岸金融中心

38 Ironically, the Battle of Seattle proved that many of the new technologies hailed by market globalists as the true hallmark of globalization could also be employed in the service of justice-globalist forces and their political agenda. Text-messaging on mobile devices enabled the organizers of events like the one in Seattle to arrange for new forms of protest such as a series of demonstrations held simultaneously in various cities around the globe.	stringent ['strɪn(d)ʒ(ə)nt] <i>adj.</i> 严格的; 严厉的
39 As we have seen in the 2011 revolutions in the Middle East and the Occupy protests around the world, individuals and groups all over the world can utilize applications like Twitter and Facebook to readily and rapidly recruit new members, establish dates, share experiences, arrange logistics, identify and publicize targets—activities that only two decades ago would have demanded much more time and money. Digital technologies also allow demonstrators not only to maintain close contact throughout the event, but also to react quickly and effectively to shifting police tactics. This enhanced ability to arrange and coordinate protests without the need for a central command, a clearly defined leadership, a large bureaucracy, and significant financial resources has added an entirely new dimension to the nature of political demonstrations.	accountability [əˌkaʊntəˈbɪlɪti] <i>n.</i> 有责任, 有义务
40 To summarize, then, justice globalism translates the global imaginary into a concrete political program reflected in the following nine policy demands:	perish ['perɪʃ] <i>vi.</i> 死亡; 毁灭
1. A global 'Marshall Plan' that includes a blanket forgiveness of all Third World Debt;	execute ['eksɪkjʊ:t] <i>vt.</i> 执行; 完成
2. Levying of the so-called 'Tobin Tax': a tax on international financial transactions that would benefit the global South;	sect [sekt] <i>n.</i> 派别; 宗派
3. Abolition of offshore financial centres that offer tax havens for wealthy individuals and corporations;	cult [kʌlt] <i>n.</i> (有极端宗教信仰的) 异教团体
4. Implementation of stringent global environmental agreements;	
5. Implementation of a more equitable global development agenda;	reactionary [rɪˈækj(ə)n(ə)n] <i>adj.</i> 保守的, 反动的
6. Establishment of a new world development institution financed largely by the global North through a Tobin Tax and administered largely by the global South;	encompass [ɪnˈkʌmpəs] <i>vt.</i> 包含; 包括
7. Establishment of international labour protection standards, perhaps as clauses of a profoundly reformed WTO;	all-encompassing 包含所有的
8. Greater transparency and accountability provided to citizens by national governments and international institutions;	
9. Making all governance of globalization explicitly gendersensitive.	feed on 因…而壮大; 从…中得到滋养
Religious globalisms	secular ['sekjələ(r)] <i>adj.</i> 世俗的; 非宗教的
41 Justice globalists were preparing for a new wave of demonstrations	

against the IMF and World Bank, when, on 11 September 2001, three hijacked commercial airliners hit, in short succession, the World Trade Center in New York and the Department of Defense's Pentagon Building in Washington, DC. A fourth plane crashed in Pennsylvania before the hijackers were able to reach their intended target, most likely the White House. Nearly 3,000 innocent people perished in less than two hours, including hundreds of heroic New York police and firefighters trapped in the collapsing towers of the World Trade Center. In the weeks following the attacks, it became clear that the operation had been planned and executed years in advance by the Al Qaeda terrorist network.

42 Al Qaeda is but one extreme example of organizations that subscribe to various forms of religious globalism. Other religiously inspired visions of global political community include some fundamentalist Christian groups such as the Army of God and Christian Identity, and the Aum Shinrikyo cult in Japan. Despite their deep conservatism, religious globalisms also promote an alternative global vision. This is not to suggest that *all* religiously inspired visions of global community are conservative and reactionary. Indeed, most religions incorporate a sense of a global community united along religious lines, although in general this is largely informal. A key point about the religious globalist visions, however, is that these groups desire for their version of a global religious community to be all-encompassing, to be given primacy and superiority over state-based and secular political structures. In some cases, they are prepared to use violent means to achieve this end goal.

43 Indeed, 'jihadist Islamism'—represented by such groups as Al Qaeda, Jemaah Islamiya, Hamas, and Hezbollah—is today's most spectacular manifestation of religious globalism. It feeds on a common perception in the Muslim world that Western modes of modernization have not only failed to put an end to widespread poverty in the region, but that they have also enhanced political instability and strengthened secular tendencies. Thus, jihadist Islamism is a response to what is often experienced as a materialistic assault by the liberal or secular world.

44 Drawing on revivalist themes popularized in the 18th century by theologian Muhammad ibn Abd al-Wahhab, jihadist Islamists seek to globalize a 'pure' and 'authentic' form of Islam—by any means necessary. Their enemies are not merely the American-led forces of market globalism, but also those domestic groups who have accepted these alien influences and imposed them on Muslim peoples. Jihadists like Osama bin Laden left no doubt that the men linked to his organization committed the atrocities of 9/11 in response to the perceived 'Americanization' of the world: the expansion of the American military around the globe, especially the presence of US military bases in Saudi Arabia; the internationalization of the 1991 Gulf War; the escalation of the Palestinian-Israeli conflict; the 'paganism', 'secularism', and 'materialism' of American-led market globalism; and the eighty-year history of 'humiliation and disgrace' perpetrated against the global *umma* (Islamic community of believers) by a sinister global 'Judeo-Crusader alliance'.

draw on 凭借; 利用

revivalist [rɪ'vaɪvəlɪst] *n.* 推动复兴者; 复兴运动倡导者

theologian [θə'lɒdʒɪən] *n.* 神学家, 神学研究者

atrocious [ə'trɒsɪtɪ] *n.* 残暴行为

escalation [eskeɪ'leɪʃ(ə)n] *n.* 上涨; 加剧

paganism ['pegən,ɪzəm] *n.* 异教徒; 无宗教信仰者

secularism ['sekjələ,rɪzəm] *n.* (尤指在伦理上反对宗教的) 世俗主义, 现世主义

perpetrate ['pɜ:pə'treɪt] *v.* 犯(罪); 做(恶)

equate [ɪ'kweɪt] *vt.* 同等看待; 使等同

strand [strænd] *n.* (观点、故事、计划等的) 部分, 方面

45 Clearly, it would be a mistake to equate jihadist Islamism of the Al Qaeda variety with the religion of Islam or even more peaceful strands of ‘political Islam’ or ‘Islamist fundamentalism’. Rather, the term ‘jihadist Islamism’ is meant to apply to those extremely violent strains of Islam-influenced ideologies that articulate the global imaginary into concrete political agendas and terrorist strategies to be applied worldwide. Even after the killing of Osama bin Laden by US Navy SEALs in Pakistan on 2 May 2011, jihadist Islamism Al Qaeda-style is the most influential and successful attempt yet to articulate the rising global imaginary into a religious globalism anchored in the core concepts of *umma* and *jihad* (armed or unarmed struggle against unbelief purely for the sake of God and his *umma*).

Osama bin Laden on *jihad* and America

And the West’s notion that Islam is a religion of *jihad* and enmity toward the religions of the infidels and the infidels themselves is an accurate and true depiction.... For it is, in fact, part of our religion to impose our particular beliefs on others.... Their [moderate Muslims] reluctance in acknowledging that offensive *jihad* is one of the exclusive traits of our religion demonstrates nothing but defeat. (2003)

For example, Al Qaeda spent \$500,000 on the September 11 attacks, while America lost more than \$500 billion, at the lowest estimate, in the event and its aftermath. That makes a million American dollars for every Al Qaeda dollar, by the grace of God Almighty. This is in addition to the fact that it lost an enormous number of jobs—and for the federal deficit, it made record losses, estimated at over a trillion dollars. Still more serious for America was the fact that the mujahideen forced Bush to resort to an emergency budget in order to continue fighting in Afghanistan and Iraq. This shows the success of our plan to bleed America to the point of bankruptcy, with God’s will. (2004)

I tell you [Americans] that the war [on terror] will be either ours or yours. If it is the former, it will mean your loss and your shame forever—and the winds are blowing in this direction, by Allah’s grace. But if it is the latter, then read history, for we are a people who do not stand for injustice, and we strive for vengeance all days of our lives. And the days and nights will not pass until we avenge ourselves as we did on September 11. (2006)

46 Indeed, jihadist Islamists understand the ‘*umma*’ as a single community of believers united in their belief in the one and only God. Expressing a populist yearning for strong leaders who set things right by fighting alien invaders and corrupt Islamic elites, they claim to return power back to the ‘Muslim masses’ and restore the *umma* to its earlier glory. In their view, the process of regeneration must start with a small but dedicated vanguard willing to sacrifice their lives as martyrs to the holy cause of awakening people to their religious duties—not just in traditionally Islamic countries, but wherever members of the *umma* yearn for the establishment of God’s rule on earth. With a third of the world’s Muslims living today as minorities in non-Islamic countries, jihadist Islamists regard the restoration as no longer a local, national, or even regional event. Rather, it requires a

enmity ['enməti] *n.* 仇恨;敌意;敌对

infidel ['ɪnfɪd(ə)l] *n.* 异教徒

aftermath ['ɑːftəməθ] *n.* 后果;创伤

resort to 诉诸; 求助于

strive [straɪv] *v.* 努力; 奋斗; 力争; 力求

vengeance ['ven(d)ʒ(ə)ns] *n.* 报复; 报仇

yearn for 渴望

vanguard ['væŋɡə:d] *n.* 领导者; 先锋; 先驱者

martyr ['mɑːtə] *n.* 烈士;殉道者

emancipate ['ɪmənsɪpeɪt] *vt.* 解放; 使不受 (法律、政治或社会的) 束缚

regime [rer'ʒi:m] *n.* 统治制度; 政权; 政体

fault lines 断层

concerted *global* effort spearheaded by jihadists operating in various localities around the world.

47 Thus, Al Qaeda's desired Islamization of modernity takes place in a global space emancipated from the confining territoriality of 'Egypt', or the 'Middle East' that used to constitute the political framework of religious nationalists fighting modern secular regimes in the twentieth century. Although Al Qaeda embraces the Manichean dualism of a 'clash of civilizations' between its imagined *umma* and 'global unbelief', its globalist ideology clearly transcends clear-cut civilizational fault lines. Its desire for the restoration of a transnational *umma* attests to the globalization of the Muslim world just as much as it reflects the Islamization of the West. Constructed in the ideational transition from the national to the global imaginary, jihadist Islamism still retains potent metaphors that resonate with people's national or even tribal solidarities. And yet, its focus is firmly on the global as jihadist Islamists have successfully redirected militant Islamism's struggle from the traditional 'Near Enemy' (secular-nationalist Middle Eastern regimes) to the 'Far Enemy' (the globalizing West).

48 Al Qaeda's core ideological claim—to rebuild a unified global *umma* through global *jihad* against global unbelief—resonates well with the dynamics of a globalizing world. It holds special appeal for Muslim youths between the ages of fifteen and thirty who have lived for sustained periods of time in the individualized and deculturated environments of Westernized Islam. This 'second wave' of jihadist recruits, responsible for the most spectacular terrorist operations like the 9/11 attacks or the London bombings of 7/7 (2005), were products of a Westernized Islam. Most of them resided in Europe or North Africa and had few or no links to traditional Middle East political parties. Their enthusiasm for the establishment of a transnational *umma* by means of *jihad* made them prime candidates for recruitment. These young men followed in the footsteps of Al Qaeda's 'first-wavers' in Afghanistan in the 1980s who developed their ideological outlook among a multinational band of idealistic *mujahideen* bent on bringing down the 'godless' Soviet empire.

49 Their extremist rhetoric notwithstanding, jihadist Islamists like bin Laden's successor Ayman al-Zawahiri never lose sight of the fact that jihadist globalists are fighting a steep uphill battle against the forces of market globalism. They emphasize the ability of American media imperialism to seduce the Muslim world with its consumerist message. They also make frequent references to a continuing and biased campaign waged against the Muslim world by the corporate media—especially 'Hollywood'—for the purpose of misrepresenting Islam and hiding the alleged failures of the Western democratic system.

50 And yet, even against seemingly overwhelming military odds that translated into a significant weakening of the Al Qaeda network over the last decade, jihadist leaders express their confidence in the ultimate triumph of their vision over 'American Empire'. Despite its chilling and violent content, this vision contains an ideological alternative to market

Exercises

Part 1 Dictation — Globalization and Social Patterns

You will hear the recording three times. While listening, fill in the blanks with the exact words that you hear.

Today we're going to be discussing globalization and social patterns.

Globalization has led to the struggle between modernization or westernization and tradition. This is the struggle to embrace modern technology 1) _____

_____. So how do these collide?

Traditional values may dictate a sense of duty and sacrifice as in Japan. In Iran and Saudi Arabia, 2) _____, but the embrace of Western technology and education may show them glimpses of other cultures with different values, putting strains on their cultural norms. One major example of this was the Arab Spring protests. In Tunisia,

Egypt, Libya and Yemen, 3) _____,
and they utilize modern technology to do so.

Unfortunately, once the protest subsided and new governments were put in place, new issues developed as the tensions between ultra conservative Islamists and liberals continue to cause problems. Once again, modernism versus traditionalism. 4) _____
_____. This is the movement of people into cities. This happens as people move towards densely populated areas, 5) _____
_____.

Cities can offer a better way of life with better healthcare, educational opportunities and modern conveniences. Of course, this means that 6) _____
_____. The large movement also ends up leading to poverty, as some people are forced outside of the cities, sometimes forming shanty towns. A shanty town is an area of makeshift shacks outside of city limits, formed by the very poor, there, without sewer systems, electricity or 7) _____
_____. To solve this problem, we look to education, providing ways for all the citizens to find employment. 8) _____
_____. Religious groups also offer charity services in an attempt to aid the poor.

Similar to urbanization, 9) _____,
that is, people moving from poor regions into wealthier ones, both to find greater economic conditions and to escape from repressive governments and war. 10) _____
_____. This is the transporting of people for slavery, forced labor and sex work. With the world becoming more and more technologically advanced and the spread of globalization, the struggle of modernization and traditionalism will continue to be a major theme.

Part 2 Reading-based Exercises

I. Useful Chunks

Below are the Chinese equivalents of some useful chunks from paragraphs 8-14. Read the paragraphs closely and note down the English equivalents.

1. 源源不断地向它们的读者灌输市场全球主义的主张
2. 只要说得出口, 他们就有能力生产出来
3. 经常出现在.....

4. 兜售其政治经济议题
5. 植根于自我监管市场的理念
6. 促进个人自由与物质进步
7. 利用政府的权力来削弱和消除那些限制市场的社会政策和制度
8. 能胜任这个艰巨的任务
9. 与.....形成鲜明的对比
10. 发挥极其积极的作用

II. Translation

Translate the following sentences into Chinese.

1. Selling their preferred version of a single global marketplace to the public, they portray globalization in a positive light as an indispensable tool for the realization of such a global order. (Para. 9)
2. Indeed, neoliberal decision-makers emerged as expert designers of an attractive ideological container for their market-friendly political agenda. (Para. 9)
3. Given that the exchange of commodities constitutes the core activity of all societies, the market-oriented discourse of globalization itself has turned into an extremely important commodity destined for public consumption. (Para. 9)

4. As we noted in Unit 3, neoliberals seek to cultivate in the public discourse the uncritical association of ‘globalization’ with what they assert to be the benefits of market liberalization. (Para. 12)
5. Moreover, the claim that globalization is about the liberalization and global integration of markets solidifies as ‘fact’ what is actually a contingent political initiative. (Para. 14)

III. Essay Questions

Write a paragraph to answer one of the questions below. Start your paragraph with a topic sentence and support it with details from the text. While writing, paraphrase instead of copying the exact words from the text.

1. How has the market globalism become the dominant ideology of this era since the 1990s?
2. What does Mr. Steger think of market globalists’ claim 1?

Unit Eight

Global Crises and the Future of Globalization

1 No doubt, the decade following 9/11 gave an unexpected jolt to the struggle over the meaning and the direction of globalization. As US President George W. Bush made clear time and again, his ‘global war on terror’ was bound to be a lengthy conflict of global proportions. Against all expectations, the first term of his successor Barack Obama saw as much continuity as change in this regard. Although President Obama removed the last remaining troops from Iraq in December 2011, he failed to close down the infamous military prison at the Guantanamo Bay Naval Base that still houses nearly 200 alleged ‘unlawful combatants’ in violation of international law. He also continued the ‘war of the willing’ in Afghanistan, but made clear that his administration was no longer engaged in a global war against a tactic—terrorism—but against Al Qaeda and its terrorist affiliates. But what seemed to worry the charismatic US President more than terrorism were the lingering effects of the Global Financial Crisis (GFC) as the US, Europe, and many countries around the world remained mired in enormous budgetary problems, high unemployment, and anaemic economic growth.

2 As we noted in previous units, however, the GFC is not the only crisis of global proportions that is stalking our interdependent world of the 21st century. Across political, economic, and cultural dimensions, the expansion and intensification of social relations across world-space and world-time has both generated and responded to new ‘global crises’ beyond the reach of the nation-state and its affiliated political institutions. In addition to worldwide financial volatility and transnational terrorism, these new challenges include climate change and environmental degradation; increasing food scarcity; pandemics such as AIDS, SARS, and H1N1; threats to cyber-security; widening disparities in wealth and well being; increasing migratory pressures; and manifold cultural and religious conflicts. Moreover, the remarkable new wave of popular demonstrations and mass protests (see Illustration 13) cresting in the Arab world and elsewhere might succeed in toppling entrenched undemocratic regimes, but it also has the potential to lead to savage civil wars or condemn vast regions to long-term social and political instability.

3 This raises the final question we will consider in our examination of globalization: Will these global crises eventually contribute to more extensive forms of international cooperation and interdependence, or might they stop the powerful momentum of globalization? On first thought, it seems highly implausible that even a protracted GFC or European debt crisis could stop, or even slow down, such a powerful set of social processes as globalization. In fact, the recent emergence of the Group of

jolt [dʒəʊlt; dʒɒlt] *n.* 一阵强烈的感情（如震惊）；颠簸，摇晃；一份（烈酒）

lengthy ['leŋθi; 'leŋkθi] *a.* 漫长的，冗长的；啰唆的

infamous ['ɪnfəməs] *adj.* 声名狼藉的；无耻的；邪恶的；不名誉的

Guantanamo Bay Naval Base 关塔那摩湾海军基地

combatant ['kɒmbət(ə)nt; 'kʌm-] *n.* 战士；争斗者

war of the willing 以美国为首的多国部队对伊拉克的战争

Al Qaeda “基地”组织

affiliate [ə'fɪliet] *n.* 隶属机构；分支机构

charismatic [kærɪz'mætɪk] *adj.* 有魅力的；神赐能力的

mire ['maɪə] *v.* 使...陷于泥泞，使...陷入困境

anaemic [ə'ni:mɪk] *a.* 无活力的；贫血的

volatility [ˌvɒlə'tɪləti] *n.* 易变；活泼

pandemics 流行病

disparity [dɪ'spærɪti] *n.* 不平等；差异

migratory ['maɪgrət(ə)rɪ] *adj.* 迁移的；流浪的

manifold ['mænfɔld] *adj.* 多种多样的

mass protest 大规模抗议

crest [krest] *vi.* 到达绝顶；形成浪峰
n. (山、浪等的)顶，峰，尖

entrenched [ɪn'tren(t)ft; en-] *adj.* 根深蒂固的；确立的，不容易改的

implausible [ɪm'plɔːzɪb(ə)l] *adj.* 难以置信的，不像真实的

protracted [prə'træktɪd] *a.* 拖延的

Twenty (G20) (see Illustration 14) as a rather effective deliberative body with the ability to design and coordinate action on a global scale suggests that perhaps the solution to our global problems is not less but more (and better forms of) globalization.

4 On the other hand, a close look at modern history reveals that large and lasting social crises often lead to the rise of extremist political groups. The large-scale violence they unleashed proved capable of stopping and even reversing previous globalization trends.

13. Hundreds of thousands of protestors at Cairo's Tahrir Square, 20, April 2012

5 As we noted in Unit 2, the period from 1860 to 1914 constituted an earlier phase of globalization, characterized by the expansion of transportation and communication networks, the rapid growth of international trade, and a huge flow of capital. Great Britain, then the most dominant of the world's 'Great Powers', sought to spread its political system and cultural values across the globe much in the same way the United States does today. But this earlier period of globalization was openly imperialistic in character, involving the transfer of resources from the colonized global South in exchange for European manufactures. Liberalism, Great Britain's chief ideology, translated a national, not a global, imaginary into concrete political programmes. In the end, these sustained efforts to engineer an 'inter-national' market under the auspices of the British Empire resulted in a severe backlash that culminated in the outbreak of the Great War in 1914.

14. US President Barack Obama with German Chancellor Angela Merkel and Australian Prime Minister Julia Gillard at the G20 Summit in Los Cabos, Mexico, 19 June 2012

6 In an enduring study on this subject, the late political economist Karl Polanyi locates the origins of the social crises that gripped the world during the first half of the 20th century in ill-conceived efforts to liberalize and

under the *auspices* of somebody or something
[ˈɔːspɪs] 在...的帮助/支持或保护之下

backlash [ˈbækləʃ] *n.* 激烈反应; 强烈反对

culminate [ˈkʌlmɪneɪt] *v.* 达到高潮; 达到顶点

globalize markets. Commercial interests came to dominate society by means of a ruthless market logic that effectively disconnected people's economic activities from their social relations. The competitive rules of the free market destroyed complex social relations of mutual obligation and undermined deep-seated norms and values such as civic engagement, reciprocity, and redistribution. As large segments of the population found themselves without an adequate system of social security and communal support, they resorted to radical measures to protect themselves against market globalization.	grip [grɪp] <i>v.</i> 握紧, 支配 ill-conceived ['ɪlkən'si:vd] <i>adj.</i> 计划或设计不周
7 Polanyi notes these European movements against unfettered capitalism eventually gave birth to political parties that forced the passage of protective social legislation on the national level. After a prolonged period of severe economic dislocation following the end of the Great War, such national-protectionist impulses experienced their most extreme manifestations in Italian fascism and German Nazism. In the end, the liberal dream of subordinating all nation-states to the requirements of the free market had generated an equally extreme counter-movement that turned markets into mere appendices of the totalitarian state. The applicability of Polanyi's analysis to the current situation seems obvious. Like its 19th-century predecessor, today's version of market globalism also represents a gigantic experiment in unleashing economic deregulation and a culture of consumerism on the entire world. Like 19th-century Britain, the United States is the dominant cheerleader of neoliberalism and thus draws both admiration and contempt from less developed regions in the world. And those who find themselves to be oppressed and exploited by a global logic of economic integration led by an 'American Empire' tend to blame the hegemon for both the emergence and persistence of global crises.	civic engagement 公民参与 reciprocity [ˌresɪˈprɒsɪti] <i>n.</i> 互惠; 相互性; dislocation [ˌdɪslə(ə)'keɪʃ(ə)n] <i>n.</i> [医] 脱臼, 错位; 混乱, 紊乱 subordinate to 使从属于; 使...服从 appendix [ə'pendɪks] <i>n.</i> 附属物; 附录; 阑尾 totalitarian [ˌtəʊtəli'teəriən] <i>adj.</i> 极权主义的 applicability [ˌæplɪkə'bɪləti] <i>n.</i> 适用性
8 Hence, the United States—together with China, India, Russia, Brazil, and other rising powers—has a special responsibility to search for new and alternative ways of dealing with problems such as the precarious state of the world economy and the natural environment of our beleaguered planet. Only a decade ago, in the wake of the first powerful justice-globalist demonstrations, representatives of the wealthy countries assured audiences worldwide that they would be willing to reform the global economic architecture in the direction of greater transparency and accountability. Yet, even in the wake of the most serious economic crisis since the Great Depression, little progress has been made to honour these commitments and consider justice-globalist alternatives to market-globalist business-as-usual.	hegemon [hɪ'gemən] <i>n.</i> 霸主 precarious [prɪ'keəriəs] <i>adj.</i> 危险的; 不稳定的 beleaguered [bɪ'liɡə-d] <i>adj.</i> 围困的; 包围的 transparency [træn'spær(ə)nəsi] <i>n.</i> 透明, 透明度 accountability [əˌkaʊntə'bɪləti] <i>n.</i> 责任, 义务
9 This questionable strategy of reacting to global crises by fortifying the market-globalist paradigm with a new rhetoric of mild reformism might work for a relatively short period. But in the long run, the growth of global inequality and the persistence of social instability harbours the potential to unleash reactionary social forces that dwarf even those responsible for the suffering of millions during the 1930s and 1940s. In order to prevent the escalation of violent confrontations between market globalism and its	business as usual 照常 fortify ['fɔ:tɪfaɪ] <i>vt.</i> 加强; 增强 harbour ['hɑ:bə(r)] <i>v.</i> 心怀, 怀有 (尤指负面想法或感情)

ideological opponents on the Left and Right, world leaders must design and implement a comprehensive Global New Deal that builds and extends genuine networks of solidarity around the world. 10 Without question, the years and decades ahead will bring new crises and further challenges. Humanity has reached yet another critical juncture—the most important in the relatively short existence of our species. Unless we are willing to let global problems fester to the point where violence and intolerance appear to be the only realistic ways of confronting our unevenly integrating world, we must link the future course of globalization to a profoundly reformist agenda. As I have emphasized in the Preface of this book, there is nothing wrong with greater manifestations of social interdependence that emerge as a result of globalization. However, these transformative social processes must have a moral compass and an ethical polestar guiding our collective efforts: the building of a truly democratic and egalitarian global order that protects universal human rights without destroying the cultural diversity that is the lifeblood of human evolution.	reactionary [rɪˈækj(ə)n(ə)rɪ] <i>adj.</i> 反动的; 反对政治或社会变革的 juncture [ˈdʒʌŋ(k)tʃə] <i>n.</i> 特定时刻, 时间节点; 汇合处, 连接处 fester [ˈfestə] <i>vi.</i> 溃烂; 化脓; 恶化 transformative [træns ˈfɔːmətɪv] <i>adj.</i> 变革性的, 革新性的 compass [ˈkæmpəs] <i>n.</i> 指南针; 圆规; 指引

Exercises

Part 1 Dictation -- Globalization Explained

You will hear the recording three times. While listening, fill in the blanks with the exact words that you hear.

But, where there is light there is also shadow. 1) _____
_____, people and the environment often suffer. 2) _____
_____,
people in industrialized countries lose their jobs. At the same time, 3) _____
_____. Many people in these countries
work for very little money 4) _____
_____. Therefore, they often remain poor, and more often than not, do not have
5) _____.

A further disadvantage of globalization is ecological problems, such as climate change. 6) _____

is constantly on the increase. This causes more carbon dioxide to be released into the atmosphere, which in turn is
the main cause of global warming. 7) _____
_____. This is a further cost factor in the worldwide international site
competition, 8) _____
_____.

There are therefore many sides to globalization, which affect almost all aspects of life, causing me to think that
9) _____.
What's important is to realize that globalization itself is neither good nor bad. 10) _____
_____.

Part 2 Reading-based Exercises

I. Useful Chunks

Below are the Chinese equivalents of some useful chunks from paragraph 1 - 12. Read the paragraphs closely and note down the English equivalents.

1. 违反国际法
2. 全球金融危机的持续影响
3. 超出...的能力所及
4. 阻止甚至扭转先前的全球化趋势
5. 国际贸易的快速增长与资本的大量流动
6. 在全球传播其政治制度与文化价值观念
7. 这些社会变革进程必须得有一个道德和伦理上的指引
8. 保护普遍的人权而不毁坏人类进化的命脉：文化多样性

II. Translation

Translate the following sentences into Chinese.

1. Across political, economic, and cultural dimensions, the expansion and intensification of social relations across world-space and world-time has both generated and responded to new ‘global crises’ beyond the reach of the nation-state and its affiliated political institutions. (para.1)
2. Will these global crises eventually contribute to more extensive forms of international cooperation and interdependence, or might they stop the powerful momentum of globalization? (para.3)
3. The large-scale violence they unleashed proved capable of stopping and even reversing previous globalization trends. (para.5)
4. Great Britain, then the most dominant of the world’s ‘Great Powers’, sought to spread its political system and cultural values across the globe much in the same way the United States does today. (para.6)
5. Commercial interests came to dominate society by means of a ruthless market logic that effectively disconnected people’s economic activities from their social relations. (para.7)

III. Essay Questions

Write a paragraph to answer one of the questions below. Start your paragraph with a topic sentence and support it with details from the text. While writing, paraphrase instead of copying the exact words from the text.

1. According to this unit, what are the challenges faced by the world?
2. What responsibilities do countries like the United States, China, Russia and India have in dealing with global challenges?

Rubrics of Essay Writing

Band	Task Response	Coherence and Cohesion	Lexical Resource	Grammatical Range and Accuracy
9	♦ fully addresses all parts of the task ♦ presents a fully developed position in answer to the question with relevant, fully extended and well supported ideas	♦ uses cohesion in such a way that it attracts no attention ♦ skilfully manages paragraphing	♦ uses a wide range of vocabulary with very natural and sophisticated control of lexical features; rare minor errors occur only as 'slips'	uses a wide range of structures with full flexibility and accuracy; rare minor errors occur only as 'slips'
8	♦ sufficiently addresses all parts of the task ♦ presents a well-developed response to the question with relevant, extended and supported ideas	♦ sequences information and ideas logically ♦ manages all aspects of cohesion well ♦ uses paragraphing sufficiently and appropriately	♦ uses a wide range of vocabulary fluently and flexibly to convey precise meanings ♦ skilfully uses uncommon lexical items but there may be occasional inaccuracies in word choice and collocation ♦ produces rare errors in spelling and/or word formation	♦ uses a wide range of structures ♦ the majority of sentences are error-free ♦ makes only very occasional errors or inappropriacies
7	♦ addresses all parts of the task ♦ presents a clear position throughout the response ♦ presents, extends and supports main ideas, but there may be a tendency to overgeneralise and/or supporting ideas may lack focus	♦ logically organises information and ideas; there is clear progression throughout ♦ uses a range of cohesive devices appropriately although there may be some under-/over-use ♦ presents a clear central topic within each paragraph	♦ uses a sufficient range of vocabulary to allow some flexibility and precision ♦ uses less common lexical items with some awareness of style and collocation ♦ may produce occasional errors in word choice, spelling and/or word formation	♦ uses a variety of complex structures ♦ produces frequent error-free sentences ♦ has good control of grammar and punctuation but may make a few errors
6	♦ addresses all parts of the task although some parts may be more fully covered than others ♦ presents a relevant position although the conclusions may become unclear or repetitive ♦ presents relevant main ideas but some may be inadequately developed/unclear	♦ arranges information and ideas coherently and there is a clear overall progression ♦ uses cohesive devices effectively, but cohesion within and/or between sentences may be faulty or mechanical ♦ may not always use referencing clearly or appropriately; ♦ uses paragraphing, but not always logically	♦ uses an adequate range of vocabulary for the task ♦ attempts to use less common vocabulary but with some inaccuracy ♦ makes some errors in spelling and/or word formation, but they do not impede communication	♦ uses a mix of simple and complex sentence forms ♦ makes some errors in grammar and punctuation but they rarely reduce communication

Rubric of Team Presentation

Score on a scale of 5 to 1. You may use whole numbers or .5. Below are descriptions of some of the range. A score of 4 or 2 are in the middle. For example, for #1, a '4' would be 'somewhat' clear; a '2' would be somewhat evident but not entirely.

1. States the purpose.

Points	Criteria
5	The purpose is clear and captures the listener's attention.
3	The purpose is apparent.
1	The purpose is not evident.

2. Organizes the content.

5	The content is organized logically with fluid transitions to capture and hold the listener's attention throughout the entire presentation.
3	The organization of the content is congruent; transitions are evident.
1	The content lacks organization; transitions are abrupt and distracting.

3. Supports ideas.

5	Important details add to the interest and depth of the presentation; details work to connect the listener to the speech.
3	The speaker provides the basic details necessary for the listener to understand the premise of the presentation.
1	The majority of ideas are unsupported by additional information or explanation.

4. Incorporates stories and examples.

5	Relevant examples or stories work to interest the listener and further develop main ideas.
3	Stories and examples obviously relate to the content of the speech.
1	Stories and examples are missing or unrelated.

5. Summarizes the main idea(s).

5	The conclusion unites the important points of the presentation and encourages future discussion.
3	The conclusion summarizes the main ideas.
1	The speech ends without a summary.

6. Demonstrates awareness of listener's needs.

5	Choices of language, examples, and aids work together to heighten the listener's interest & connection to topic.
3	Speaker's word choices, explanations, and enthusiasm are appropriate for the topic and for each point; appropriate aids are incorporated.
1	Presentation is uninteresting.

7. Speaks clearly with appropriate vocabulary and information.

5	Vocabulary is descriptive & accurate, engaging the listener through imagery.
3	Vocabulary provides clarity & avoids confusion.
1	Vocabulary is awkward or inappropriate for the topic, making the speaker difficult to understand.

8. Uses tone, speed, and volume as tools.

5	Speaker manipulates tone, speed, & volume, using these tools to emphasize important ideas & hold listener's attention.
3	Speaker avoids distracting vocal fillers or physical mannerisms and uses adequate speed & volume throughout presentation.
1	Vocal fillers are present throughout the presentation. Speed & volume are inappropriate for the presentation.

9. Demonstrates complexity of thought & vocabulary.

5	Variation of sentence structure & word choiceworks to keep listener interested & provides multiple examples/descriptions.
3	Sentence structure & word choice are varied to avoid monotony of tone & repetition of ideas.
1	Sentence structure and word choice are monotonous and uninteresting.

10. Appears comfortable with audience.

5	Eye contact, interaction with aids, and physical gestures demonstrate the speaker's energy and interest, guiding the listener through the presentation.
3	Eye contact, interaction with aids, and physical gestures are natural and fluid.
1	Eye contact with the audience is lacking. Gestures are missing or awkward. Speaker depends heavily on written speech or notes.
